

TTR 86

Dry system carpet cleaner

Ingredients:

TTR 86 contains: less than 5% anionic surfactants, less than 5% aliphatic hydrocarbons, fragrance, Methylchloroisothiazolinone, Methylisothiazolinone, Benzyl Salicylate. Other ingredients: plant fibres as an organic vehicle.

Performance:

Excellent cleaning action. Dirt and stains are dissolved, absorbed by the carpet cleaning powder and vacuumed up. Short drying time. No dust. No sticky residues. Delayed resoiling. Textile covering can be walked on during cleaning. No risk of overwetting and hence no risk of added staining, e.g. because of conductive adhesives. 1 bag is enough for approx. 10-15 m².

Application notes:

Ideal for regular cleaning of carpets made from natural and synthetic fibres in department stores, computer centres, hotels, catering establishments and for cleaning panelled floors, dirt-absorbing mats, textile-covered stairs, etc. Also suitable for all places where wet cleaning is impossible because of the long drying time.

Usage:

Tear open the bag and sprinkle the powder onto the dirty surfaces (approx. 50-120g/m², depending on the degree of soiling). Work in sections (approx. 5-10 m²). Work in with single-disk, multiple-disk or contra-rotating roller machine using shampoo or powder brushes or white super-pad and driving disk.

Spray stubborn stains with FLECK-EX top, briefly leave to take effect and work with TTR 86 and machine. The solvents and stain substances are absorbed by the powder. After approx. 20 min. drying time, thoroughly vacuum the carpet. Brush vacuums intensify the suction process. Empty or replace dust collecting bins or dust bags promptly in order to guarantee suction power. Any powder residues left in the carpet will bind to the dirt and are removed with the next vacuuming. Not suitable for needed felt and shag-pile carpets. Variations in bag volume (not content) are caused by the production technology.

Ecology:

This product is subject to regulations governing the environmental compatibility of washing and cleaning agents and the associated regulations on the biological degradability of the raw materials used.

Comprehensive information on the environmental characteristics of this product is available on request.

Give only completely emptied packaging to special waste disposer.

This product is designated for industrial use.

Product code: GT 10

Waste Key: 070608

Art.-Nr.: 04767	6 x 1 kg
