

K 811 / K 821 free-standing convectors

Heat wherever it is needed

Cosy warmth for every requirement

Providing cosy warmth as and when it is needed is becoming increasingly significant in many households. Especially between seasons and on cold days, it is essential that heat can be provided where it is required. For this reason, devices which can be carried are particularly popular. These should be inexpensive to buy, and at the same time be economical and reliable in operation.

Heating for in-between

The K 811 and K 821 free-standing convectors offer a practical solution for heating between seasons, as well as complete heating for small and medium-sized rooms. The air flowing quietly upward over the heating elements is heated and distributed evenly throughout the entire room. Heat is circulated effectively over a large area. All you need is an electric power supply to make the full heating capacity readily available - without delays and without efficiency losses.

K 811 / K 821 free-standing convectors

K 811 / K 821 free-standing convectors

- ✓ Wall mounting or free-standing installation
- ✓ Infinitely adjustable thermostat, frost protection function
- ✓ Colour white / grey
- ✓ BEAB
- ✓ Degree of protection IP 20 / protection class I

Safe protection from frost

The frost protection function is also ideal for protecting unheated small rooms like cellars, garages, workrooms and conservatories. When the temperature drops below a given level, the convector switches on automatically.

Device information

Order reference		K 811	K 821
Connection voltage	V	1/N/PE ~230 V, 50 Hz	1/N/PE ~230 V, 50 Hz
Performance levels		OFF / 1,0 / 2,0 kW	OFF / 1,0 / 2,0 kW
Colour		White/Grey	White/Grey
Width x Height x Depth	mm	575 x 418 x 200	575 x 418 x 200
Weight	kg	4,1	4,1

Turbo blower in the K 821

The K 821 free-standing convector is equipped with an additional turbo blower, which transports the heat even more quickly to the areas to be heated.
