

## Making Cabin

It is possible to make special cabins which are appropriate to all kind of outer side of machines together with different colors of plexiglasses with the help of those equipments. You can see various kinds of covers at the cabin components division.

Cabins

Compartment Cabinet

Filling Machine Cabinet

Hangern Robot Cabinet

Hinge Cabinet

Hydraulic Press Off

Label Machine Cabinet

Laser Cutting Machine Cabinet

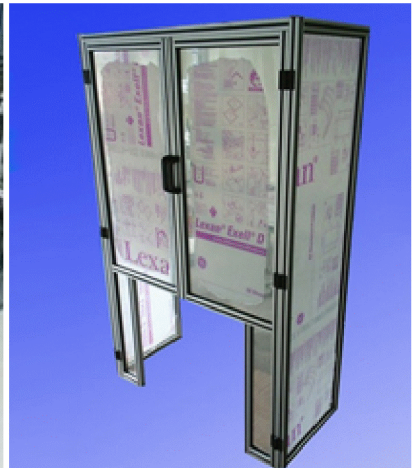

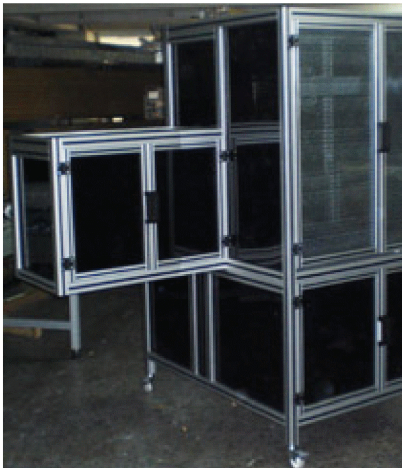

Machine Cabinet

Motor Unit Off

Packing Machine Cabinet

Yarn Machine Cabinet

## Automation Applications

The aspects of the point that our age has reached which requires quality in production and serial production make automation very important. Aluminium profiles are ideal infrastructure materials in automation formations.

Styrofoam Line

## Mechanical Applications

In machine production very important practicability can be achieved by aluminium profiles.  
 With combination of connection options required resistant is established  
 It is practical so cost and time advantages are preference reason

## Conveyors

By the means of profiles designed specially for outer sides of all kind of machines, it is possible to produce fast. Requested sizes of conveyor can be produced.

Two Storeys Conveyor

Avare Roller Conveyor

Barrier Bar Conveyor

Chain Belt Conveyor

Conveyor

Custom Conveyor

Grade Metal Pedestal Conveyor L-type Elevator

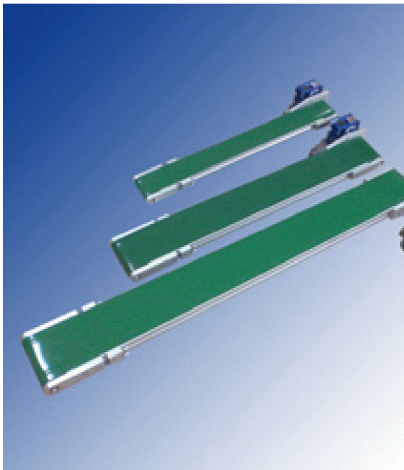

Miniature Conveyor

Narrow Band Press Conveyor

Narrow Conveyor

Oring Conveyor Belt

PVC Belt Conveyor

PVC Conveyor - Metal Pedestal

Rated Conveyor

Rated Conveyor Applications

Roller Conveyor Line

Z Type Elevator

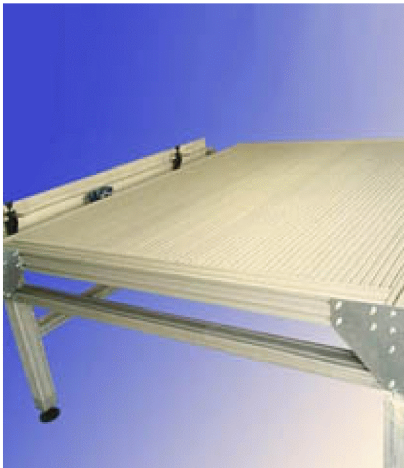

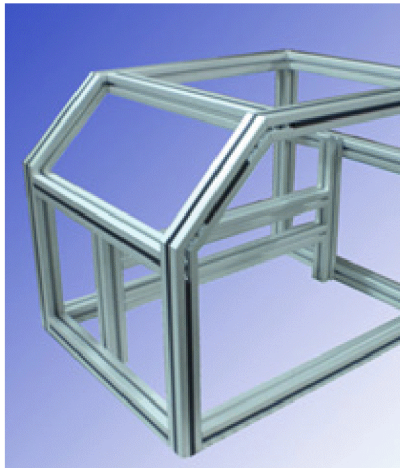

## Profile Applications Chassis

Combination of standard connection elements and specific sigma profile section, required momentum can be achieved at body of machines and chasis
