BA series patio radiators

Heat - when and where you need it

Cosy warmth for every requirement

The importance of heat availability based on need is becoming increasingly significant in many households. This is why devices are needed which are suitable for areas that are not constantly in use, e.g. the patio. Especially between seasons and on cold days, it is pleasant not to have to go without cosy warmth outside the direct living area. The device should be inexpensive to buy, and at the same time be economical and reliable in operation.

Cosy warmth - without the sun

The sun sets and a wonderful day draws to an end. Thanks to the BA 1200 and BA 1900 patio radiators from Dimplex, you can go on enjoying the day in comfortable warmth even after the sun has gone down. With Dimplex, you now have all the warmth of the sun at your fingertips - warmth you can feel straight away.

The original - BA patio radiator

- ✓ Fixed connection
- ✓ Robust aluminium casing
- ✓ Rain guard
