

Electric Heater Without Thermostat For Drinkers 19 cm (15W)

17,80 EUR

21200

**Heka Electric Heater
Developed by Heka – in time and tested well
known Heka quality.**

- high quality synthetic material
- cast heating elements
- reliable and failure free, even in very moist conditions
- optional with thermostat
- suitable for all metal and plastic drinkers
- New and only available at Heka- The heater for large poultry drinkers, Ø 31 cm
- special heater for pigeon drinkes

When the weather turns cold, electric heaters for drinkers become essential to every breeder. They keep water available for your poultry in freezing temperatures and save you the job of thawing waters during winter. We would like to draw your special attention to our electric heaters with an integrated thermostat. The thermostat comes automatically on at freezing point, and turns itself off as soon as the outside temperatures rise again. Very efficient and energy saving. No worries about water available during winter – our electric heaters with or without thermostat assure your poultry keeping happy and hydrated. Until now breeders had problems to find electric heaters for very large drinkers. Don't look any further, we can offer you an option designed for founts up to a diameter of 31 cm. Also, we have given special thought to pigeon breeders - an electric heater fitting all pigeon drinkers.

This 19cm-Heater is suitable for the following drinkers:

- 1Ltr.-Drinker (Art. 20000)
- 2Ltr.-Drinker (Art. 20005)
- 1Ltr.-Drinker (Art. 20020)
- 2Ltr.-Drinker (Art. 20025)
- 1,5Ltr.-Drinker (Art. 20065)
- 0,75Ltr.-Drinker (Art. 20063)
- 1,5Ltr.-Drinker (Art. 20064)
- 1,5Ltr.-Drinker (Art. 20040)
- 1,5Ltr.-Drinker (Art. 20051)
- 2,5Ltr.-Drinker (Art. 20150)
- 4Ltr.-Drinker (Art. 20155)
