

# iRobot Looj™125

## Gutter Cleaning Robot

Cleaning gutters can be a dangerous and time consuming job but it is an essential part of home maintenance. Gutters need to be cleaned regularly to avoid water damage, overflows and ice dams. Plus, dirty gutters create a breeding ground for carpenter ants, mosquitoes and other pests. Now, there's an easier, faster way to clean your gutters and protect the investment in your home.

### How iRobot Looj works:

- Just under 2 1/4" high and 3 1/4" wide, iRobot Looj propells itself through your gutters, under gutter straps and over downspout holes.
- Using a three-stage auger, Looj breaks up clogs, lifts out the debris and brushes your gutters clean.
- Spinning at 500 RPM, the high velocity auger delivers the power needed to dislodge, lift and toss out wet leaves, pine needles and other debris.
- iRobot looj cleans a 60-foot section of gutter in just 10 minutes!
- Designed for use in wet gutters, Looj is waterproof in up to 1 foot of water. Cleanup is fast and easy; simply hose the robot off.
- The detachable handle is also a wireless remote control.
- Looj moves in both forward and backward directions. You control the direction of the robot and the auger, so debris is propelled out of the gutter and away from your home.

**iRobot recommends that you measure your gutters to ensure the gutter straps are at least 2 1/4" above the bottom of the gutter.**

### iRobot Looj is easy to use:

1. Place the ladder in one secure position
2. Use the included belt clip to carry Looj while keeping both hands on the ladder.
3. Place Looj in the gutter and remove the detachable handle/remote.
4. Drive Looj back and forth using the remote
5. When the job is done, hose the robot off for easy cleanup.

### Standard Features

- Internal antenna provides greater range and reliability.
- Control forward and backward movement of the robot and bi-directional auger using the handle/remote.

- The new smart speed feature allows the robot to speed up and slow down as needed, to finish the job more quickly.
- Designed for use in wet gutters, the robot is waterproof in up to 1 foot of water.
- At just under 2 1/4" high and 3 1/4" wide, Looj easily passes through gutters and under gutter straps.
- Works with standard K-style gutters in aluminum, copper, metal or vinyl. Straps must be 2 1/4" above the bottom of the gutter.
- Tool-less battery door makes recharging fast and easy.
- Includes a high-power battery and charger.

### Additional Features

- Included belt clip allows you to keep both hands on the ladder while climbing up and down

### Specifications:

Package dimensions: 21.25" L x 8.25 W "x 5" H

Package weight: 4.66 lbs

### What's in the Box:

- 1 iRobot Looj 125 Gutter Cleaning Robot
- 1 3-Stage Gutter Cleaning Auger
- 1 Remote Control with 75' range (requires 2 AAA batteries - not included)
- 1 iRobot Looj 7.2V Rechargeable battery pack
- 1 battery charger
- 1 Belt Clip

**Price: \$129.99**
