

DLOG Series

Autoclaves working under pressure for treatment of materials sensitive to high temperatures and humidity (e.g. syringes, defluxers, catheters, cartridges for dialysis, plastic articles, bandages, sutures, etc.), paper materials, wood and for sterilization of powders which deteriorate by heating exposure.

Horizontal autoclaves working under pressure.

Standard and customized models.

Sizes available from 100 lts. to 50,000 lts.

In compliance with:

cGMP, GAMP, EN 556, EN 1422, EN 550, EMC 89/336/EC, 93/68/EC, 73/23/EC, PED 97/23/EC.

Main applications:

products sensitive to high temperatures and humidity.

Examples:

- Syringes, defluxers, catheters, cartridges for dialysis, plastic articles, bandages, sutures, etc.
- Powders which deteriorate by heating exposure
- Paper materials: books, parchments, etc.
- Wood
- Antique furniture
- Pictures

ETHYLENE OXIDE (EtO) GAS STERILIZERS DLOG and DLOG/V

Over 50 years of experience in the design and manufacture of equipment for use in pharmaceutical and hospital field lead to offer instruments and services marked by the high quality, reliability and able to provide also interesting opportunities in terms of convenience. The ethylene oxide sterilizers prove to be among the most effective methods to achieve satisfactory and safe results

DLOG/V Series

Autoclaves working under vacuum for treatment of materials sensitive to high temperatures and humidity (e.g. syringes, defluxers, catheters, cartridges for dialysis, plastic articles, bandages, sutures, etc.), paper materials, wood and for sterilization of powders which deteriorate by heating exposure.

Horizontal autoclaves working under vacuum.

Standard and customized models.

Sizes available from 100 lts. to 50,000 lts.

Possibility of explosion-proof execution (DLOGV-Ex type) to increase equipment safety.

In compliance with:

cGMP, GAMP, EN 556, EN 1422, EN 550, EMC 89/336/EC, 93/68/EC, 73/23/EC, PED 97/23/EC, CEI 64-5, ATEX 94/9/EC.

Main applications:

Products sensitive to high temperatures and humidity.

Examples:

- Syringes, defluxers, catheters, cartridges for dialysis, plastic articles, bandages, sutures, etc.
- Powders which deteriorate by heating exposure
- Paper materials: books, parchments, etc.
- Wood
- Antique furniture
- Pictures

DLOG/CA Series

Autoclaves working under pressure for treatment of materials sensitive to high temperatures and humidity (e.g. syringes, defluxers, catheters, cartridges for dialysis, plastic articles, bandages, sutures, etc.), paper materials, wood and for sterilization of powders which deteriorate by heating exposure.

The plant is designed for the installation on any customer's vehicle

Standard and customized models.

Sizes available from 100 lts. to 50,000 lts.

In compliance with:

CGMP, GAMP, EN 556, EN 1422, EN 550, EMC 89/336/EC, 93/68/EC, 73/23/EC, PED 97/23/EC.

Main applications:

Products sensitive to high temperatures and humidity.

Examples:

- Syringes, defluxers, catheters, cartridges for dialysis, plastic articles, bandages, sutures, etc.
- Powders which deteriorate by heating exposure
- Paper materials: books, parchments, etc.
- Wood
- Antique furniture
- Pictures
