

Table Poultry Feather Plucker Manufactured From Stainless Steel

425,00 EUR

30233

Table poultry feather plucking machine with 24 high quality rubber fingers. Before plucking, the birds have to be scalded in hot water as you do for handpicking. The water temperature is very important and must be between 52° and 55°. This machine is suitable for chickens, pheasants, ducks and geese. Geese have to be plucked several times, as their strong feathers tend to dry off during plucking time. Strong and effective appliance. Pullets are totally plucked within 45 seconds.

Total weight: ca. 24 KG
Power: 0,75 PS, 900 U/Min.
Voltage: 50 hz, 220 V

Wet Plucking Machine Size 1 (230 Volt)

729,00 EUR

30235
