

# Tubular Elements

Tubular Elements are the most versatile, dependable, and rugged of any heat generating device. These qualities make it an ideal heat source for many applications. The Tubular Element is the core of the most common heating solutions found today.

ASB Heating is a Canadian manufacturer and the products offered are made from the highest quality of materials. This gives you the most dependable heat source for your specific needs. When you have to rely on heat to get the job done, you can rely on ASB to do it right.

**ASB offers you the absolute best tubular element available:**

### Experts in Element Design

With many years experience designing and applying heating elements, we have mastered both the science and art of tubular element manufacturing. Your ASB heater will perform as you expect it to.

### Components

ASB uses 80-20 ni-chrome wire, "A" grade magnesium oxide, and the highest quality tubing. Filling machines and roll reduction equipment are expertly maintained to manufacturer's tolerances, and final test equipment is fully calibrated. You can expect high quality from us.

### Applications Expertise

Our technical staff is available to help you solve your heating situation. Use our experience and skills, and together we can get you the heating results you need.
