

HIRSCHMANN

A Belden Company

Hirschmann. Simply a good Connection.

Industrial Connectors

Some faults can be very expensive.

What good are the greatest inventions if there are problems with the small details later on?

There can be no doubt that mankind is capable of great inventions. Some of these inventions have made a major contribution to the fields of production, process and traffic management technology. However, even very minor faults can affect operational reliability, dependability and availability, and they can prove to be very expensive. Fault-free automation systems significantly enhance productivity and competitiveness, and they preserve jobs over the long term.

Our extremely versatile intelligent connectors set technical standards and provide individual and absolutely reliable solutions in state-of-the-art automation systems. As data rates continue to increase, our connectors minimize possible sources of system failure and guarantee high availability right from the start. Customers get powerful, reliable cabling solutions which can handle

extreme vibration and are resistant to contamination and moisture. The solutions continue to provide a reliable connection even under the harshest operating conditions. Hirschmann Automation and Control delivers open, high-availability, future-proof industrial solutions for the construction, heavy vehicle, shipbuilding and offshore industries, and they are backed up by comprehensive service and support. Our specialists are always available to answer your questions, and our worldwide distribution network guarantees optimal delivery to ensure that time as well as the latest technology is on your side.

With us, when you add one and one you get more than two.

Lumberg Automation and Hirschmann Automation and Control: Two powerful brands under a strong umbrella.

Nothing is more constant than change, and the world of technology is no exception. Hirschmann Automation and Control GmbH is part of Belden Inc. The US-based corporation is one of the leading suppliers of data transmission products. The connector experts at Lumberg Automation and Hirschmann now work together to address the Industrial Connecting Solutions market as part of the Belden Automation business. These two brands with a long history can now leverage enormous synergy effects. Over the course of the past 70 years, Lumberg Automation has developed into a well-respected supplier of standard and tailored solutions, and similar to Hirschmann, it has a reputation for driving innovation. The industry focus, expertise and product portfolios of the two companies complement each other very well. As a customer, you have one point of contact for two brands. Is there any better proof that one plus one makes three?

This partnership takes Belden a major step forward in the industrial connection market, as the company evolves from its cable-manufacturing base into a full-capability specialist for signal transmission. The product portfolios and market positions of Hirschmann/Lumberg Automation and Belden are nearly an ideal match. Belden benefits from Hirschmann's position as the Industrial ETHERNET market leader, and Hirschmann will be able to enhance its market presence in North America and Asia under the Belden umbrella. Together, Lumberg Automation, Hirschmann and Belden may make the strongest connection since connectors were invented.

A whole new world of individuality.

Versatile plug-in connectivity from Hirschmann.

Sometimes standard solutions are simply not enough. That is why we offer highly flexible connector solutions, some of which are not included in our catalog. We can deliver standard connectors from the catalog, modular OpenConnector variations and highly customized versions to meet specific customer requirements. Connectors Unlimited® provides a maximum of individuality. We deliver the most cost-effective solution for any application as an added service.

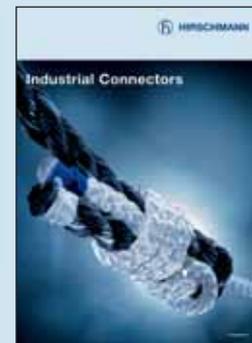

Connectors Unlimited®

No matter what your specific needs are for an "ex-catalog" connector, our OpenConnector and Connectors Unlimited® offer maximum flexibility.

Product overview
Industrial Connectors

The product you need is just a few mouse clicks away.

The Electronic Consultant helps you find what you are looking for.

Our Electronic Consultant at www.hirschmann.com/xpert/ comes up with a recommendation after only four fast, simple steps no matter what product you are looking for including connectors, Industrial ETHERNET components or FiberINTERFACES. You select the application, product category, criteria and requirements, and you receive our individual product recommendation right away.

The Electronic Consultant is also available on the catalog CD.

The best connection – across the board.

Hirschmann – the right solution for any application.

Industrial ETHERNET

Hirschmann was one of the pioneers of Industrial ETHERNET. We offer extremely reliable, high-quality products and solutions which keep the world of automation moving and guarantee excellent transmission security. We would be pleased to send you more information about Industrial ETHERNET and suitable bus connectors.

FiberINTERFACES

If you are looking for optical transmission equipment and fiber optics, Hirschmann offers a broad range of FiberINTERFACES for the process, transportation and factory automation industries which deliver high data rates and absolute immunity to interference. Why not request more information on our FiberINTERFACES today?

Top quality products for cutting-edge solutions.

The Hirschmann Competence Center gives you the help you need.

Hirschmann can provide more than top-quality connectors and network components. Our Competence Center has the consulting, service, support and training expertise to help you design your total solution without supplier dependencies. Contact us to discuss your specific requirements.

You can access our extensive range of services and support at www.hicomcenter.com. We offer everything from pre-sales advice to after-sales support.

www.hicomcenter.com

Our communication experts.

Size no longer determines whether you can move worlds.
It is simply enough to have higher intelligence.

In order to ensure the operating reliability and accessibility of your machines, the best is just enough – and this is exactly where tiny items can make a big difference. Your Hirschmann installation consultant recommends: intelligent plug for sensor devices and actuator devices connectors in various designs, passive plug connectors and conductors for network and control voltages, control line connections in hydraulic systems, pneumatic

systems and for special machines, and installation-friendly universal rectangular connectors.

You can't find the connector you are looking for in our catalog? No problem. With the Hirschmann OpenConnector kit and our tailored customer-specific Connectors Unlimited solutions, you have the right connection for any job.

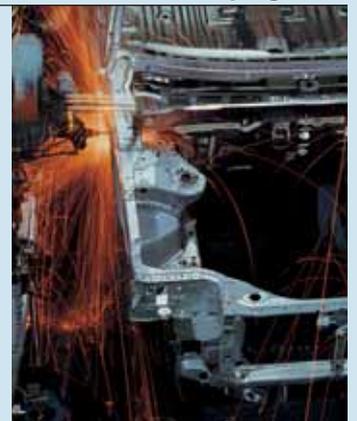

The pico professional sensor

page 14

Circular connectors: E-series M8

Hirschmann M8 sensor connectors can be supplied in molded or customized versions. Innovative design and a wide range of cables ensure maximum flexibility and variety in any application.

- IEC 60947-5-2 compliant layout
- Snap-lock or threaded lock M8 x 1
- number of poles: 3, 4
- 60 V operating voltage (Uc) and 4 A operating current
- environmental pollution level 3
- gold-plated contacts
- IP 67/68/69 K (as defined in DIN 40050)
- ambient temperature – 25 °C up to + 90 °C

The large professional sensor

page 62

Circular connectors: E-series M12

To be a real sensor expert, you have to keep a couple of key issues in mind. Clearly identifiable gripping surfaces ensure that users can quickly connect the Hirschmann E-series M12 round connectors to proximity switches, light barriers, flow sensors and fieldbus components. These connectors meet all of the requirements for sensors and actuators in automation systems.

- IEC 947-5-2 layout/ M12 x1 threaded locking
- number of poles: 3, 4, 5, 8
- UC 250 V operating voltage (Uc) and 4 A operating current
- environmental pollution level 3
- gold/tin plated contacts
- IP 67/68/69 K (as defined in DIN 40050)
- ambient temperature – 25 °C up to + 90 °C
- M12 push-pull version available

Bus connectors

Industrial ETHERNET as an uniform standard in all levels of automation – Hirschmann has been working on this idea much before the others. That is why we are today one of the most highly experienced manufacturers in industrial network solutions based on ETHERNET, and as systems suppliers, we not only have M12 ETHERNET connectors in our product range but also an IP 67 switch and M12-RJ 45 control cabinet lead-throughs. And since we have already been thinking much longer

about ETHERNET than most people, we also tend to think much further than others: As 4-pole D-coded ETHERNET components have been uniformly recommended by the important standards organizations in the field, Hirschmann offers a comprehensive installation concept for field ETHERNET components. The Hirschmann **microFX** M12 range features innovative optical transmission technology.

Transmission made easy

Connecting cables and junction boxes

Truly versatile connector technology has to offer good variety. Cabling is needed everywhere, and Hirschmann OpenConnector offers a whole range of options. In addition to cable plugs and sockets, Hirschmann can supply M8 junction box solutions with 4, 6, 8 or 10 ports as well as 4 and 8 port M12 junction boxes. You get everything you need from a single source. What can we do for you today?

- IEC 947-5-2 compliant circular connector, M8 Snap-on, M8/M12 with threaded locking
- DIN 43650 compliant rectangular connectors, A, B, C versions and industry standard for B, C
- number of poles: 2, 2 + PE, 3, 4, 5
- 250 V operating voltage (Uc) and 4 A operating current, max. 10 A
- environmental pollution level 3
- gold/tin plated contacts
- IP 67/68/69 K (as defined in DIN 40050)
- ambient temperature –25 °C up to +110 °C (GDM-series) or 90 °C (E-series)
- other variations on request

The valve professional for pneumatic and hydraulic systems

Rectangular connectors: GDM-series

The GDM-series rugged rectangular connectors are designed to withstand high loads. The molded versions now offer even greater variety. They are dust-proof and hose-proof, and the tailored versatile industrial connectors are ideal for nearly any application where hydraulic, pneumatic and electro-magnetic actuators have to deliver dependable service.

- global permits from VDE, GL, CSA and UL
- model design A, B and C as per DIN EN 175301-803 and industrial standard for model design B and C
- number of poles: 3, 4 (including PE)
- operating voltage UC 250V and operating current 16 A
- pollution severity 3
- protection type up to IP 67
- ambient temperature –40 °C up to +125 °C

Rectangular connectors: G-series

Compact versions are a good choice when space is at a premium. Hirschmann's rectangular G-series connectors fit into tight spaces in hydraulic and pneumatic controls and electrical power systems. The versatile G-series is even designed to withstand the harsh conditions in mines and any other confined spaces.

- number of poles: 2, 4, 5, 6, 7 (including PE) with leading earth contact if so desired
- operating voltage up to UC 250 V
- pollution severity 3
- protection type up to IP 65

Rectangular connectors: ST-series

When the power is always on, you need components that can handle the load. Hirschmann's compact ST-series rectangular connectors are a very good solution for interior and exterior building automation, power distribution, signal transmission and machine manufacturing applications. The ST-series is also suitable for very demanding power distribution applications such as medical equipment and instrumentation.

- global permits from VDE, SEV and UL
- number of poles: 3, 4, 5 and 6 (including PE)
- operating voltage UC 250 V or AC 40 V/DC 25 V and operating current 16 A/10 A
- pollution severity 2/3
- contact surface tin-coated/silver-coated
- protection type up to IP 54
- ambient temperature -30 °C up to +90 °C

Circular connectors: CA-/CM-series

The general-purpose CA/CM series circular connectors easily handle tough everyday use. Dust, submersion and vibration do not adversely affect the performance of these connectors in hydraulic, pneumatic and special machinery applications. They also meet the need for metal-free housings in the chemical industry.

- operating voltage UC 50 V/250 V or AC 400 and operating current 16 A/10 A
- CM-series plug-compatible with metal plug connectors as per MIL-C-5015 or VG 95342
- pollution severity 3
- contact surface silver-coated
- protection type up to IP 67
- ambient temperature -30 °C up to +90 °C
- CM-series available in sizes 14 S and 20 shell; number of poles: 3 to 17
- CA-series available in 3 pole plus ground and 6 pole plus ground

Circular connectors: NR-series

The Hirschmann rugged NR series of circular connectors is built to withstand tough operating environments. They operate reliably in extreme conditions, for example in the presence of very heavy vibration. The compact design saves space, and the connectors are suitable for continuous operation in power distribution and control cabling, and they can also be used with shielded cables.

- model design as per DIN 43650, ICE standardization in process
- number of poles: 7 (including PE), 12 (including PE)
- operating voltage UC 250 V, UC 60 V
- pollution severity 3
- contact surface tin-coated/silver-coated
- protection type up to IP 65

It doesn't get easier than this

PV connector system: SunCon

Connectors for solar systems (rooftop and solar parks) have to be designed for fast, reliable and uncomplicated installation, and they have to be built to withstand the elements. There should be no need for special tools or complex installation instructions. Hirschmann has developed the SunCon connector system which is the perfect solution for solar applications.

- the new solar power connector system
- fast, uncomplicated installation
- withstands any weather conditions
- excellent transmission line characteristics
- tested to RoHS and IP 68 requirements
- operating voltage 1000 V DC
- rated current 30 A

The perfect connection advantage

Accessories

A special advantage in terms of comfort functionality and safety makes your connections solution complete: Accessories from Hirschmann offer you sensible, practical solutions, are perfectly adjusted to the product series in question and eliminate the need for expensive self-made designs. There are therefore several reasons why there is only one optimum

supplement to Hirschmann plug connectors: namely our high-class accessories such as our crimp tool. When contact is to be restored as soon as possible, the job can be done at lightning speed. In this connection, a corrosion-free crimp connection with BO crimping may be made on both devices and machines that have heavy vibrations.

Content

A service to you: standard products and more.

In addition to our dependable standard connectors, the modular Hirschmann OpenConnector range can be configured online, and customizable Connectors Unlimited® always provide the most cost-effective solution.

Circular connectors: E-series M8.

Success is no big deal: the E-series M8.

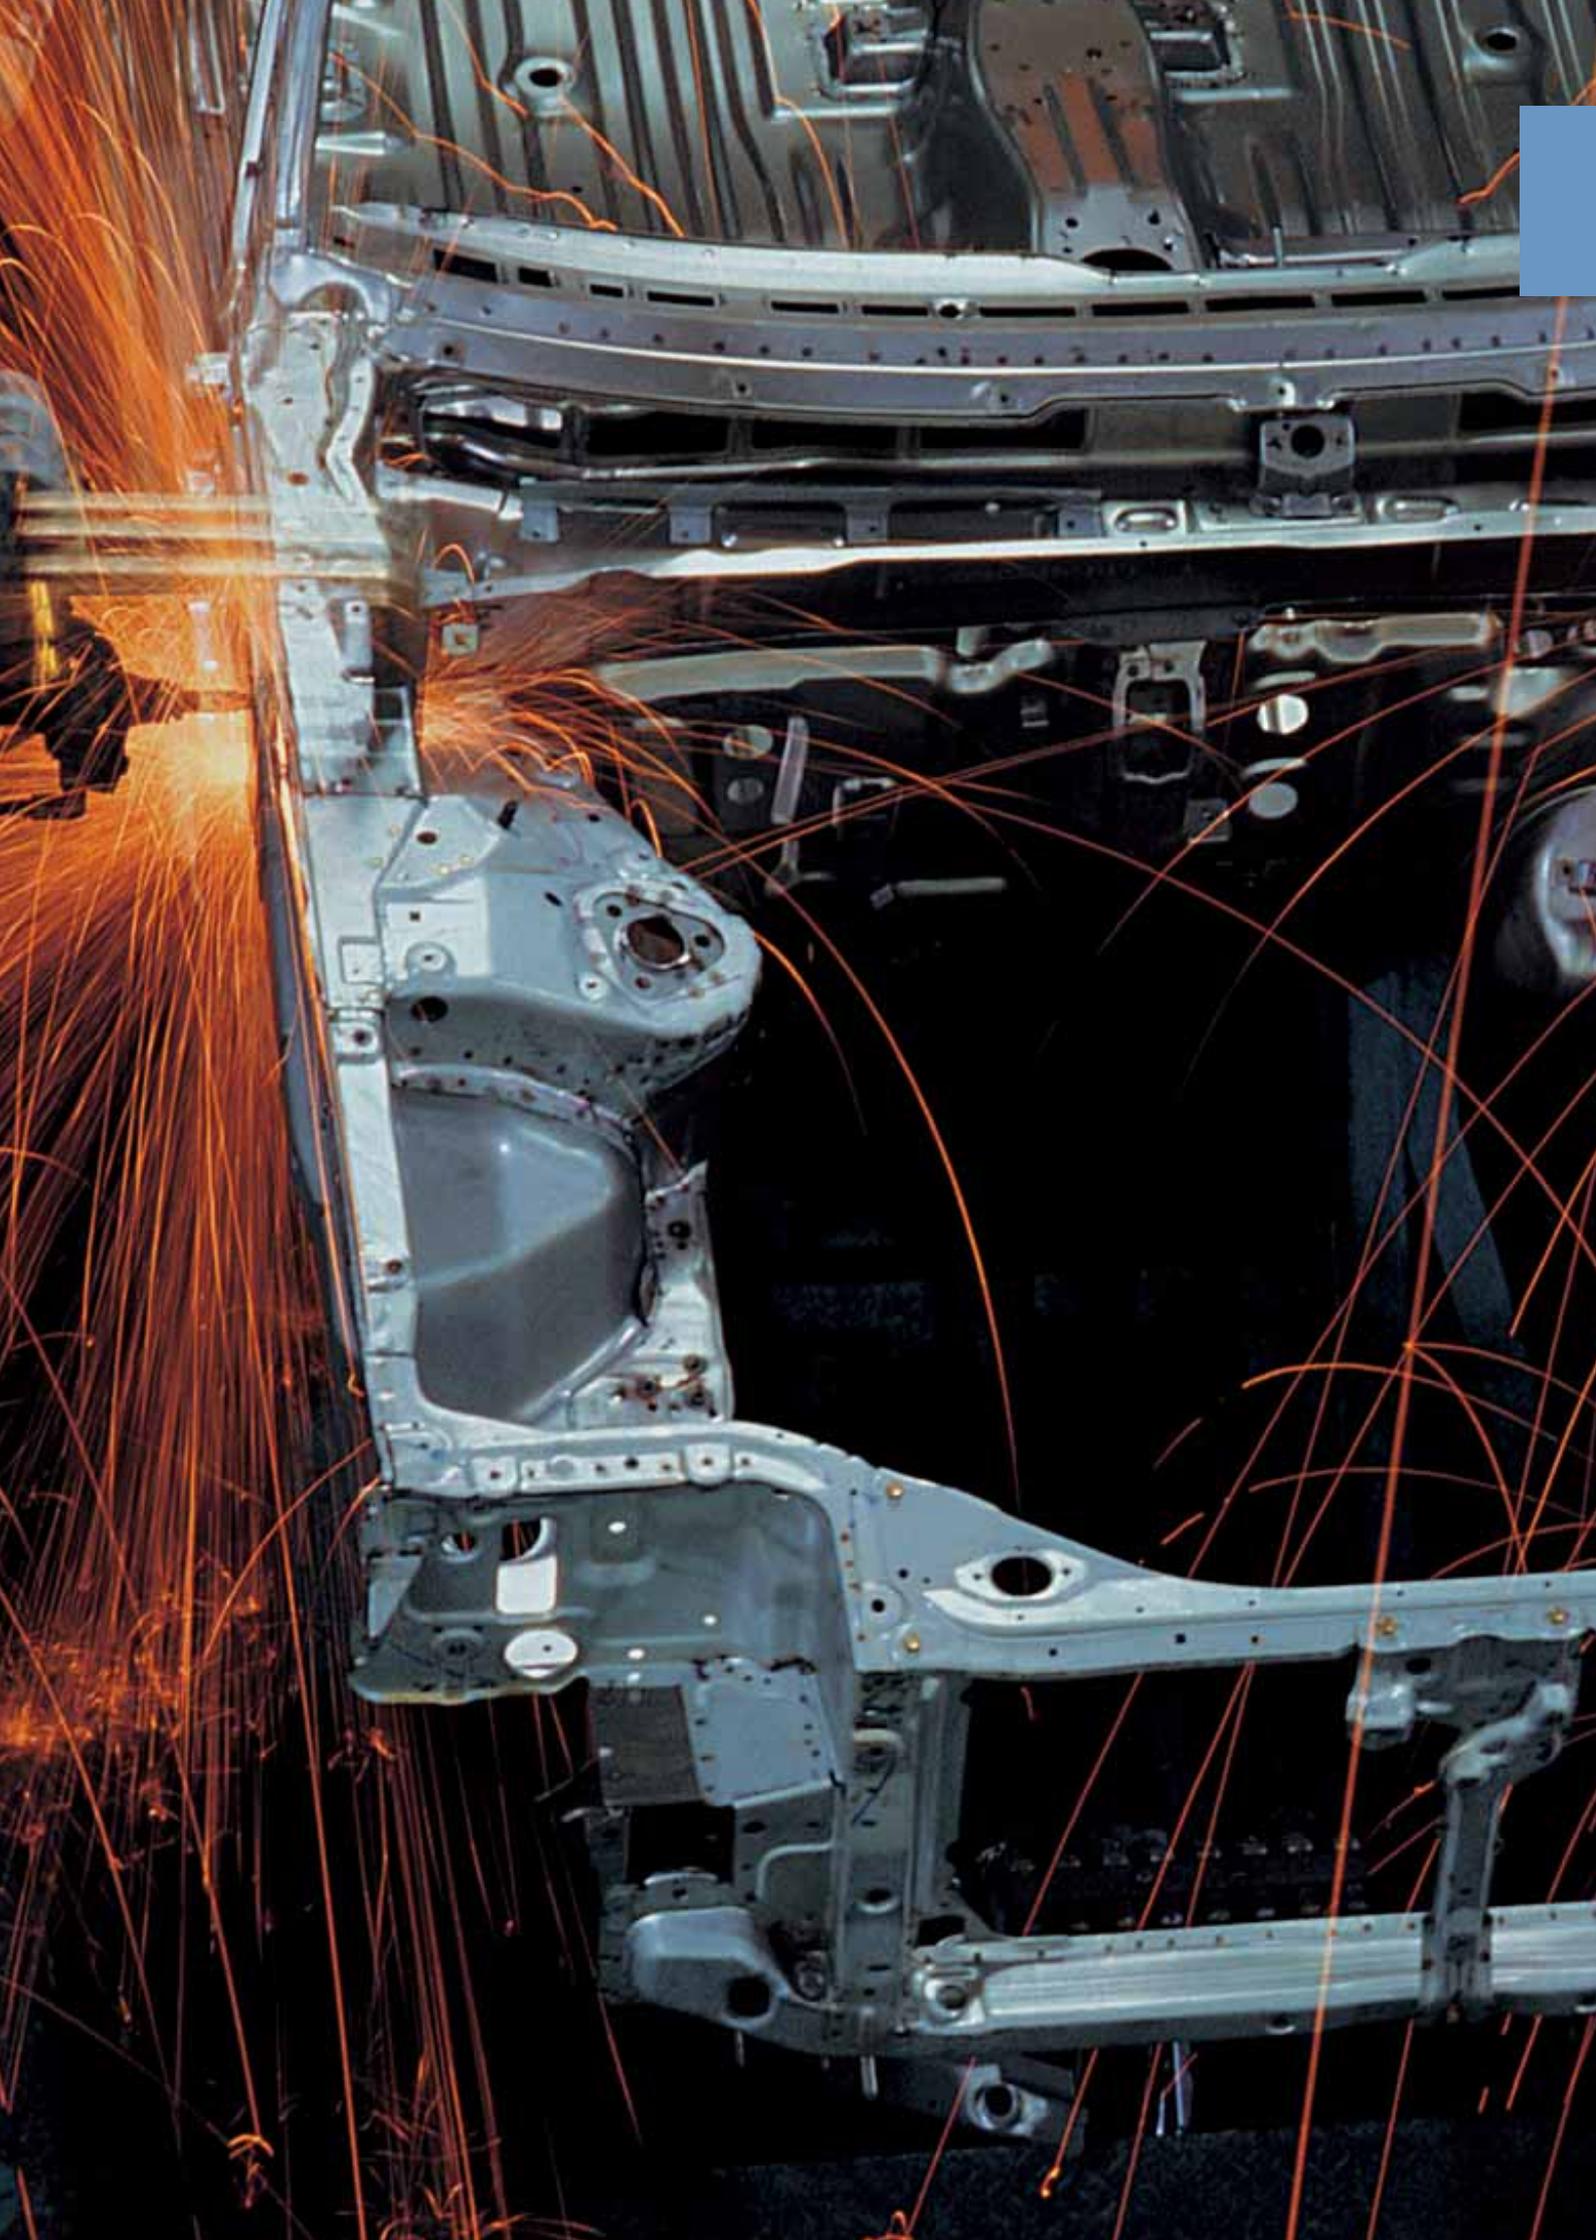

From time to time new connectors are introduced which are better suited for the intended purpose than the previous generation and always perform flawlessly even in extreme conditions. The new Hirschmann M8 series sensor connectors are one example. Featuring an innovative design and greater ease of installation, they offer the same outstanding features as the familiar M12 version. Engineering excellence and flexible production enable Hirschmann to offer individual Open-Connector versatility in the M8 class. What else would you expect from the quality leader?

The new M8 sensor connectors featuring a compact, contamination-resistant design offer improved grip at junction boxes, and the expanded cable range adds additional flexibility and variety. There are nine versions with threaded or snap-on locking, various cable grades, UL approval and halogen-free design. The new design and outstanding performance characteristics ensure that you get a reliable connection and fault-free operation in every sensor and actuator application.

The new E08 series with snap-on or threaded locking and a variety of cable variations gives you even more options.

E08 series connectors with an IEC 60947-5-2 compliant layout deliver exactly what the name Hirschmann promises, for example excellent resistance to bending stress in cable carriers or extremely high resistance to vibration.

Order No.	934 556-031
	
	Angled cable socket, with integrally molded lead, selfsecuring screw locking, LED display
Product description	
Other standard types	cable length 5 m: order no. 934 556-032
Cable material	PUR
Cable color	orange
Cable specification	high flexible lead
Cable type	LiY11Y
Standard	IEC 61076-2-101 (Ed. 1)/ IEC 60947-5-2
Description of Wiring	
LED color	LED green = power, LED yellow = switch state,
Technical data	
Rated current	3 A
Material	
Contact material	Cu Sn 6
Environmental conditions	
Protection class (IEC 60529)	IP 68
Temperature range	-25 °C to +90 °C
Inflammability class	
Housing	94 V-2
Cable	VDE 0472 part 804
Contact bearer	94 V-2
Packing unit	
Packaging unit	50 pieces

The large professional sensor.

Fixed sizes for the future: the E-series M12.

Challenges are a routine matter for the circular connectors of the E-series M12: inductive or capacitive proximity switches, photoelectric barriers, flow-monitoring devices, pressure switches, limit switch connections, photoelectric barriers, AS interface bus components and field bus components – the best is just good enough. And in order to ensure a particularly long life, Hirschmann circular connectors are protected against dust and moisture and are resistant to many oils and chemical substances.

The ergonomic design of E-series makes handling easier; as a result, the connection of sensor and actuator technology in automation systems as for example in automatic installation units and machine tools can be done quickly and promptly. Our engineered design prevents the accidental unscrewing of the coupling nut. This provides an additional advantage in terms of safety in all fields of application that are subject to high vibration loads, for example in conveyor belt equipment and automatic punch presses.

Hirschmann circular connectors are used in all sensor and actuator device applications in automation technology – particularly where the risk of vibrations is especially high.

The E-series M12 with plug design as per IEC 61076-2-101 (Ed. 1) can be obtained in the design type with screw locking M12 x 1, and also in a shielded version if so desired.

Circular connector M12.

Program overview E-series M12.

CIRCULAR CONNECTORS E-SERIES M12

 with screw locking > Straight cable plug with integrally molded lead

Type		E12-AB4A1A-AD0200C1-XA500-AC
Order No.	934 553-009	
		
		Straight cable plug, with integrally molded lead, self-securing screw locking
Product description		
Other standard types		cable length 5 m: order no. 934 553-010
Type of contact		male
Number of contacts		4
Cable material		PVC
Cable color		black
Cable length		2 m
Conductor size		0.34 mm ²
Cable specification		high flexible lead
Cable type		LiYY
Standard		IEC 61076-2-101 (Ed. 1)/ IEC 60947-5-2
Housing Color		black
Drawing		
Technical data		
Pin dimensions		1 mm
Wire stranding		42 x 0.1
Rated voltage		AC/DC 250 V
Rated current		4 A
Material		
Contact material		Cu Sn 6
Contact surface material		Au
Contact bearer material		PUR
Housing material		PUR
Coupling nut material		Zn Al/Ni
Environmental conditions		
Protection class (IEC 60529)		IP 65, IP 67, IP 68
Pollution severity		3
Temperature range		-25°C to +90°C (connector)/+70°C (cable)
Inflammability class		
Cable		fire resist. IEC 60332-1
Contact bearer		94 HB
Approvals

The digital one, where speed counts.

ETHERNET connectors, the reason why the future of automation has already begun in the recent past.

For some years now, ETHERNET has become a standard feature in offices – the most widely used communications technology has particularly proven its worth in areas where speed is extremely important: in information processing systems. In addition, ETHERNET offers the widest variety of transmission media, such as copper, glass fiber or wireless LAN. The transmission rates range from 10 Mbit/s and 100 Mbit/s to 1 Gigabit/s up to 10 Gigabit/s.

In industrial automation as well, the importance of ETHERNET is on the increase. Because apart from the advantages of standardized communication, it makes possible a seamless infrastructure that extends from the office to the machine or to the individual sensor. And as a result, process and manufacturing information are available not only at the field level but also pass seamlessly into data collection

systems. Hirschmann offers the new 4-pole M12 ETHERNET connector for use in field ETHERNET components – the 4-pole ETHERNET connector has been unanimously specified by the most important standards organizations in the sector. The D-coding for ETHERNET recommended in DKE/IEC 61076-2-101 has been implemented. On the other hand, we are convinced that RJ 45 plug connectors are not suitable for industrial IP 67 applications, regardless of the casing design.

Incidentally: As a systems supplier, Hirschmann not only has ETHERNET plug connectors in its product range, but also an IP 67 switch as well as M12-RJ 45 lead-throughs for control cabinets. Do enquire with us about the same!

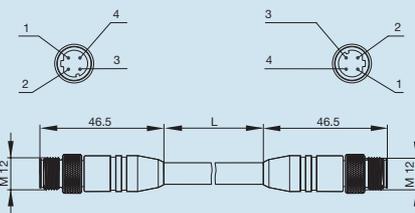

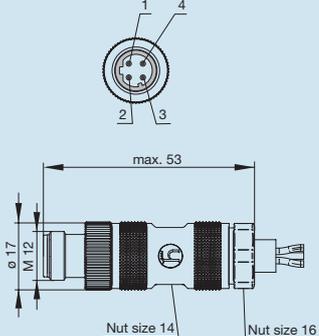

In time to come, ETHERNET will take on an increasing number of industrial automation tasks that were hitherto carried out by field bus systems. For this reason, it is good to know that with Hirschmann as your system supplier, you are optimally prepared for the challenges of tomorrow: the robust M12 plug connector with a high protection type (IP 67) is itself capable of handling the most demanding applications.

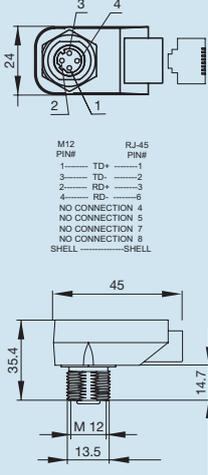

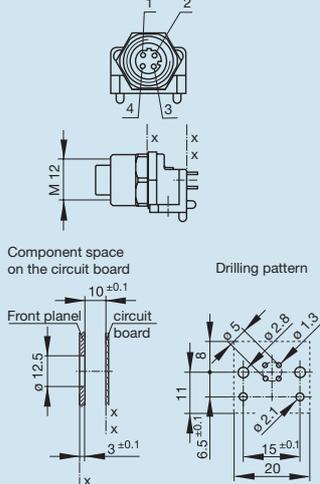

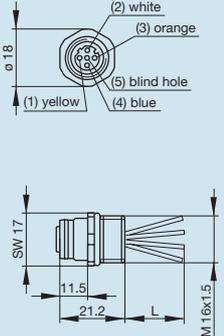

Please note that some recommended accessory parts only support a temperature range from -25°C to $+70^{\circ}\text{C}$ and might limit the possible operating conditions for the entire system. Specially designed connector types with protection class IP 67 and extended temperature range are available on request. Furthermore, unsealed accessories like RJ 45 adapters or terminal access cables are certainly not suitable inside IP 67 areas.

Onward transmission made easy.

Boosting the radius of action of connecting cables and conductors.

In sensors and actuator devices, in passive junction boxes and active field bus components, connecting conductors provide even more flexibility in connecting technology. Wherever the E-series M 8/M 12 or valve plug connectors are used, Hirschmann connecting cables extend the action radius of your automation solution with extruded-insulation cable connecting boxes, cable connectors and client-specific solutions. This gives you full control – over automation, the future, and over your costs.

In the future, you can comfortably order Hirschmann connecting cables “à la carte” – and that will suit you as our deserving customer just fine: You will receive exactly the number of units that you select. In addition, you can also specify additional characteristics yourself, such as for example the number of poles, whether sockets or pins, straight or angled version, as well as different cable lengths, cable qualities and cable ends.

Whether in the logistics industry or in the packing industry, in racking installations or automatic installation units – wherever sensors or valve plug connectors are in use, Hirschmann connecting cables can greatly enhance the possibilities.

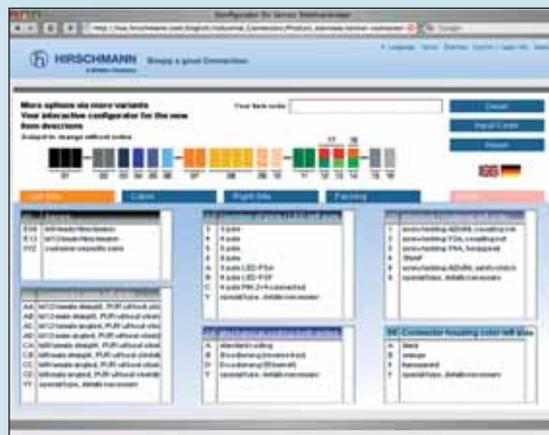

Ordering à la carte.

Connecting cables.

Exact-fit connecting cables do not normally take longer than the standard order, but save a lot of time and precious resources. Because leftover quantities and cut cable lengths will be a thing of the past. Thus if in the future the standard item in large quantities does not meet your individual requirements, simply use this flexible configuration possibility. The best thing would be to speak directly to us.

Using the online tool OpenConnector your individual sensor or valve connector solution in any batch size is only a few mouse clicks away.

More choice thanks to the wider range.

The new cable combination for valve connectors.

The greater flexibility which Hirschmann now offers in the field of valve connectors also means a greater variety of characteristics for the article designation. You now have the possibility of configuring these cables directly via the online tool "OpenConnector".

www.hirschmann.com

With the launching of the new molded GDM connectors the new article designation is already implemented.

The following overview will help you to be able to assign these new characteristics.

01	series
GAN	GDM type A (DIN)
GBI	GDM type B (industrial version)
GBN	GDM type B (DIN)
GCI	GDM type C (industrial version)
GCN	GDM type C (DIN)

02	connector style left side
DA	blank version
DB	with LED yellow for 24 V
DC	with LED yellow for 120 V
DE	with LED yellow for 250 V
DF	with suppressor diode & LED yellow for 24 V
DH	for pressure switch; LED red/green for 24 V
DK	for pressure switch; LED yellow/green for 24 V
DL	with varistor & LED yellow for 250 V
DM	with varistor & bridge rectifier for 250 V
DN	with varistor & bridge rectifier & LED yellow for 250 V
DO	with RC circuit LED yellow for 120 V
DP	with Zener diode & LED yellow for 24 – 250 V
DR	with varistor & LED yellow for 120 V
DS	with suppressor diode & LED yellow for 12 V
YY	special type, details necessary

The valve professional for pneumatic and hydraulic systems.

Durability tests successful: the GDM-series can outplug many others.

Hydraulic, pneumatic and electromagnetic actuators and sensors – where hardness meets hardness, the GDM-series is fully within its element. And for this reason, the rectangular connector with a high loading capacity is especially well-suited for use with solenoid valves, pressure sensors, flow controllers and in heating equipment in control systems for gas appliances and oil burners. Even in vibration-endangered devices and structural components such as construction machines or in conveyor installations, it is possible to have a highly durable solution with the use of crimp technology.

With built-in electronic components such as rectifiers, optical status displays and protective elements, the GDM-series can be connected to devices where these functions have not been integrated. And last but not least, the GDM-series can be used wherever a “metal-free” environment is required, for example in the food sector and the chemical industry.

The GDM-series is used wherever rectangular connectors have to have resilient qualities, such as for example on drilling rigs, conveyor installations or in construction machines.

The rectangular connector with a large range of cable diameters from 4.5 mm to 14 mm is protected against dust and sprayed water with vibration-free locking with a central screw; a knurled screw can also be supplied for use without tools.

Rectangular connectors.

Program overview GDM-series.

RECTANGULAR CONNECTORS GDM-SERIES

Type A EN 175301-803 (DIN 43650) / ISO 4400 > Cable socket with electronic insert

Type	GDM 2016 LED 24 VR YE black	GDM 2016 LED 24 VR black
Order No.	934 417-002	934 418-002
	 <p>function indicator (LED) with freewheeling diode and protective circuit (varistor)</p>	 <p>function indicator (LED) with freewheeling diode and protective circuit (varistor)</p>
Product description Other standard types	transparent housing, cable gland grey: Order no. 934 417-003	
Number of contacts	2 + PE	2 + PE
Cable gland	M 16 (black)	M 16 (black)
Conductor size	max. 1.5 mm ²	max. 1.5 mm ²
Standard	DIN EN 175 301-803-A	DIN EN 175 301-803-A
Housing Color	transparent	transparent
Construction type	A	A
Description of Wiring		
LED color	LED yellow	LED red
Voltage rectifier	varistor	varistor
Suppressor	LED-half-wave rectifier	LED-half-wave rectifier
Other characteristics		
Drawing	 <p>—○— connection terminal —C— fork type spring</p>	 <p>—○— connection terminal —C— fork type spring</p>
Technical data		
Pin dimensions	6.3 mm x 0.8 mm, 4.8 mm x 0.8 mm	6.3 mm x 0.8 mm, 4.8 mm x 0.8 mm
Rated voltage	AC/DC 24 V	AC/DC 24 V
Rated current	8 A	8 A
Contact resistance	≤ 4 mOhm	≤ 4 mOhm
Type of termination	screw	screw
Suitable cables	4.5 mm to 10 mm diameter	4.5 mm to 10 mm diameter
Mounting	central nut	central nut
Material		
Contact surface material	Sn	Sn
Contact bearer material	PA	PA
Housing material	PA	PA
Environmental conditions		
Protection class (IEC 60529)	IP 65 (gasket necessary)	IP 65 (gasket necessary)
Pollution severity	3	3
Temperature range	-40 °C to +90 °C	-40 °C to +90 °C
Inflammability class		
Housing	94 HB	94 HB
Contact bearer	94 HB	94 HB
Approvals

RECTANGULAR CONNECTORS GDM-SERIES

Type B Industrial standard > Molded Cable Socket

Type		GBI-DLDF7X-AG0200C1-XC607-AD
Order No.	934 563-014	
		
		<p>Cable socket with integrally molded lead (2 m), function indicator (LED), protective circuit (varistor), gasket (captive) and central screw M3 (stainless steel, Phillips cross-head), outgoing cable unit in PE direction</p>
Product description		
Other standard types	cable length 5 m: order no. 934 563-015	
Number of contacts	2 + PE	
Cable material	PVC	
Cable color	grey	
Cable length	2 m	
Cable diameter	5.5 mm	
Conductor size	0.75 mm	
Cable specification	LiYY 3G x 0.75 mm ²	
Cable type	fire resist. IEC 60332-1, DIN VDE 0472 Part 804 type B	
Standard	industrial standard (11 mm)	
Housing Color	transparent blue	
Construction type	B	
Description of Wiring		
LED color	LED yellow (bipolar)	
Voltage rectifier	-	
Suppressor	varistor	
Other characteristics	for pressure switch	
Drawing		
		 <p>1 = brown 2 = blue PE = green/yellow</p>
Technical data		
Contact dimensions	6.3 mm x 0.8 mm	
Wire stranding	24 x 0.2	
Rated voltage	AC/DC 250 V	
Rated current	10 A	
Contact resistance	≤ 10 mOhm	
Mounting	central nut M3	
Material		
Contact surface material	Cu/Sn	
Contact bearer material	PA 66	
Housing material	PUR	
Environmental conditions		
Protection class (IEC 60529)	IP 65, IP 67	
Pollution severity	3	
Temperature range	-25 °C to +80 °C, notice derating	
Inflammability class		
Housing	94 HB	
Cable	fire resist. IEC 60332-1	
Contact bearer	94 V0	
Approvals		
UL	-	
VDE	VDE	
Packing unit		
Packaging unit	50 pieces

The compact model, with several keying options.

We have something that addresses your space concerns: the G-series.

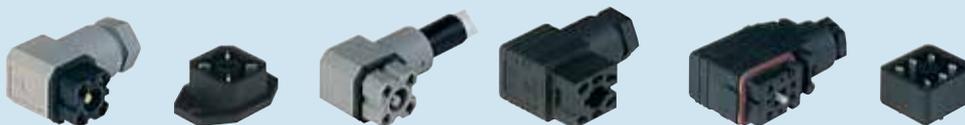

Where other plug connectors have a tough time finding space, the G-series does very well within space constraints – for this reason, the rectangular connector, with its compact dimensions, is a fixed entity in miniaturization. One can find the G-series in power and control cable connections for small drives in hydraulic and pneumatic control systems, electromedical devices and photo cells for example, as well as in microfilm viewers and slide projectors, coolers and garage door control systems.

Hirschmann offers the G-series in two structurally identical versions either with or without earthing contact – in all cases with numbering in order to prevent accidental miswiring. The space-saving connection of sensors, position-measuring and wind-measuring devices is also possible, apart from use in underground construction.

And since difficult environmental conditions are not a problem, the G-series may be found very often in oil-drilling rigs and tractors, container ships and loading stations, heavy construction machinery, racking and painting installations.

The small rectangular connector is a big success where space is scarce, such as for example in the case of photoelectric barriers and curtains and in underground construction.

The design and materials of the G-series fulfill the specifications as per VDE 0660 and offer protection against dust and sprayed water.

Rectangular connectors.

Program overview G-series.

For networks, you need power.

The ST-series brings you continuous power.

Without power, almost all the aspects of our modern life will quickly screech to a halt – and therefore, failure safety is indispensable, not only in the electromedical field, but elsewhere as well. The rectangular connectors of the compact ST-series have been specially designed for power applications and are intended for current supply and signal transmission in industrial installations, in machinery manufacture as well as in indoor and outdoor building automation.

For this reason, you will find the universally stable ST-series both in small drives such as in shutters, tube and servo drives as well as in domestic water supply installations and in the mains voltage supply to lighting equipment, in wind turbine control systems and manufacturing equipment. The highly reliable rectangular connectors of the ST-series perform excellently even in current supply under extremely demanding conditions, for example in sensitive measuring devices.

The ST-series units are secured in place, protected against vibrations, can be installed quickly and easily, are resistant to sprayed water (IP 54) and can be supplied in both molded cable as well as discrete connector versions.

Rectangular connectors for building automation can also be used as mains and control cable connections – and thanks to solid contact technology, can resist even heavy vibrations.

Rectangular connectors.

The universal item for the most demanding environments.

To New Zealand and back: the CA-/CM-series excels in every part of the world.

The powerful CA-/CM-series is a genuine all-rounder: the screw-locking industrial plug connector for all control cable connections in hydraulic and pneumatic systems and special machinery construction may be found in continuous and proportional valves as well as in testing and inspection devices in environmental technology. Even in far-away New Zealand, one does not have to look too hard to find it: In this case as a weighing device connection, this plug contributes to the determination of weights in agricultural technology.

With a housing made of impact-proof glass fiber-reinforced plastic, protected against dust and submerging, the CA-/CM-series can also be used in flow meters or dosing units – and in various other areas where only a VD-tested plug connector can do the job. The universal plug connector carries out other tasks with UL recognition (CA-series), for example as DC/AC converter for solar technology, in theater technology and in automatic outdoor advertising surfaces.

Whether in general machinery manufacturing, in control technology, the electromedical field or in the chemical industry – the sky is the limit for the robust CA/CM-industrial connector.

Special screw-locking and additional internal strain relief ensure that the CA-/CM-series is highly vibration-proof and can therefore withstand even the highest stresses.

Circular connectors.

CIRCULAR CONNECTORS CA-SERIES

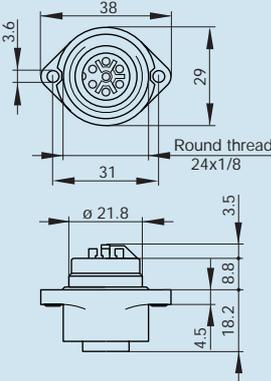

Circular connectors CA series > Cable socket and panel-mounted socket

Type		CA 6 GD
Order No.	932 325-100	
	 <p>Panel-mounted socket with flange</p>	
Product description		
Number of contacts	6 + PE	
Cable gland		
Cable diameter	6 mm to 12 mm	
Conductor size	max. 0.75 mm ²	
Housing Color	black	
Drawing		
Technical data		
Pin dimensions	1.5 mm	
Rated voltage	AC/DC 250 V	
Rated current	10 A AC/DC	
Contact resistance	≤ 5 mOhm	
Type of termination	solder, concave pins	
Mounting	flange	
Material		
Contact surface material	Ag	
Contact bearer material	PA 66-GF 25	
Housing material	PA 66-GF 25	
O-Ring	NBR	
Environmental conditions		
Protection class (IEC 60529)	IP 67	
Pollution severity	3	
Temperature range	-40 °C to +90 °C	
Inflammability class		
Flammability, UL standard	94 V-0	
Approvals		
UL	UL	
VDE	VDE	
Packing unit		
Packaging unit	100 pieces	
Scope of delivery and accessories		
Scope of delivery	1 panel-mounted socket with sealing ring, in polyphene bag	
Accessories to order separately	can be plugged into CA 6 LS; cap CA 00 SD 4, order no. 831 531-100	

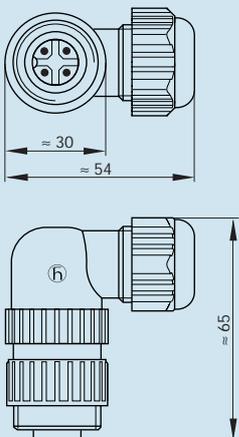

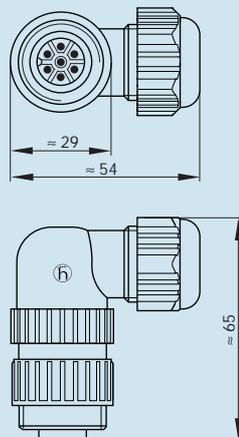

CIRCULAR CONNECTORS CA-SERIES

Scope of delivery and accessories		
Scope of delivery	1 cap with external thread, nylon loop	
Accessories to order separately	can be plugged into CM 06 EA 20-...	

Where metal is concerned, you need our robust model.

Never down and out: the NR-series.

The impact-proof, fracture-proof, glass fiber-reinforced housing of the NR-series is practically indestructible. Because of these highly robust characteristics, this circular connector is able to excel, thanks to its compact design, and can be used in many ways on the basis of various structural designs. The built-in housing can be supplied with a flange if so desired or for installation in a variety of PG and metric threads and in all cases with freely selectable cable output. Thanks to crimping technology, it is also possible to use it without any problems in installations that are subject to a lot of vibration stress. The highly resistant circular connector can easily withstand extreme environmental

conditions as well as vibrations and is therefore a preferred item in conveyor installations. The transmission of control and regulation signals, such as in hydraulic and pneumatic systems, the drives of machine tools as well as the connection of small gears and pump drives are other preferred task areas for the NR-series which is also suitable for the connection of shielded cables.

The NR-series can also be installed very quickly and easily in industrial conditions using crimping technology – BO crimping with strain relief is provided through the insulation.

Additional information: The installation, connecting terminal and material of circular connectors of the NR-series satisfy the requirements of EN 175201-804.

SunCon: the world's fastest PV connectors.

Superior technology on the roof.

The SunCon system is the ideal solution for cabling between modules or connecting individual solar panels. It provides a fast, simple connection for photovoltaic systems which are exposed to the elements and have to deliver efficient operation and low-loss power transmission with virtually no maintenance. Applications include off-grid systems, single homes, farms, open-field installation, static or tracking systems or collectors on the walls of commercial and industrial buildings.

The Hirschmann SunCon connector system features extremely fast and uncomplicated connector assembly. All you need is a standard crimp tool. Other outstanding features of the SunCon connectors include slim-line design (only a plastic housing and a connector) and excellent mechanical and electrical characteristics.

Hirschmann always keeps the big picture in mind when it develops its standard solar connectors and customized photovoltaic solutions. We offer small but crucial advantages in solar applications.

Truly excellent solar connectors have a low component count, are easy to assemble and install and guarantee long-term reliability and durability in all weather conditions.

The added perfect connection advantage.

Ready to go in the blink of an eye: crimping technology makes it all so easy.

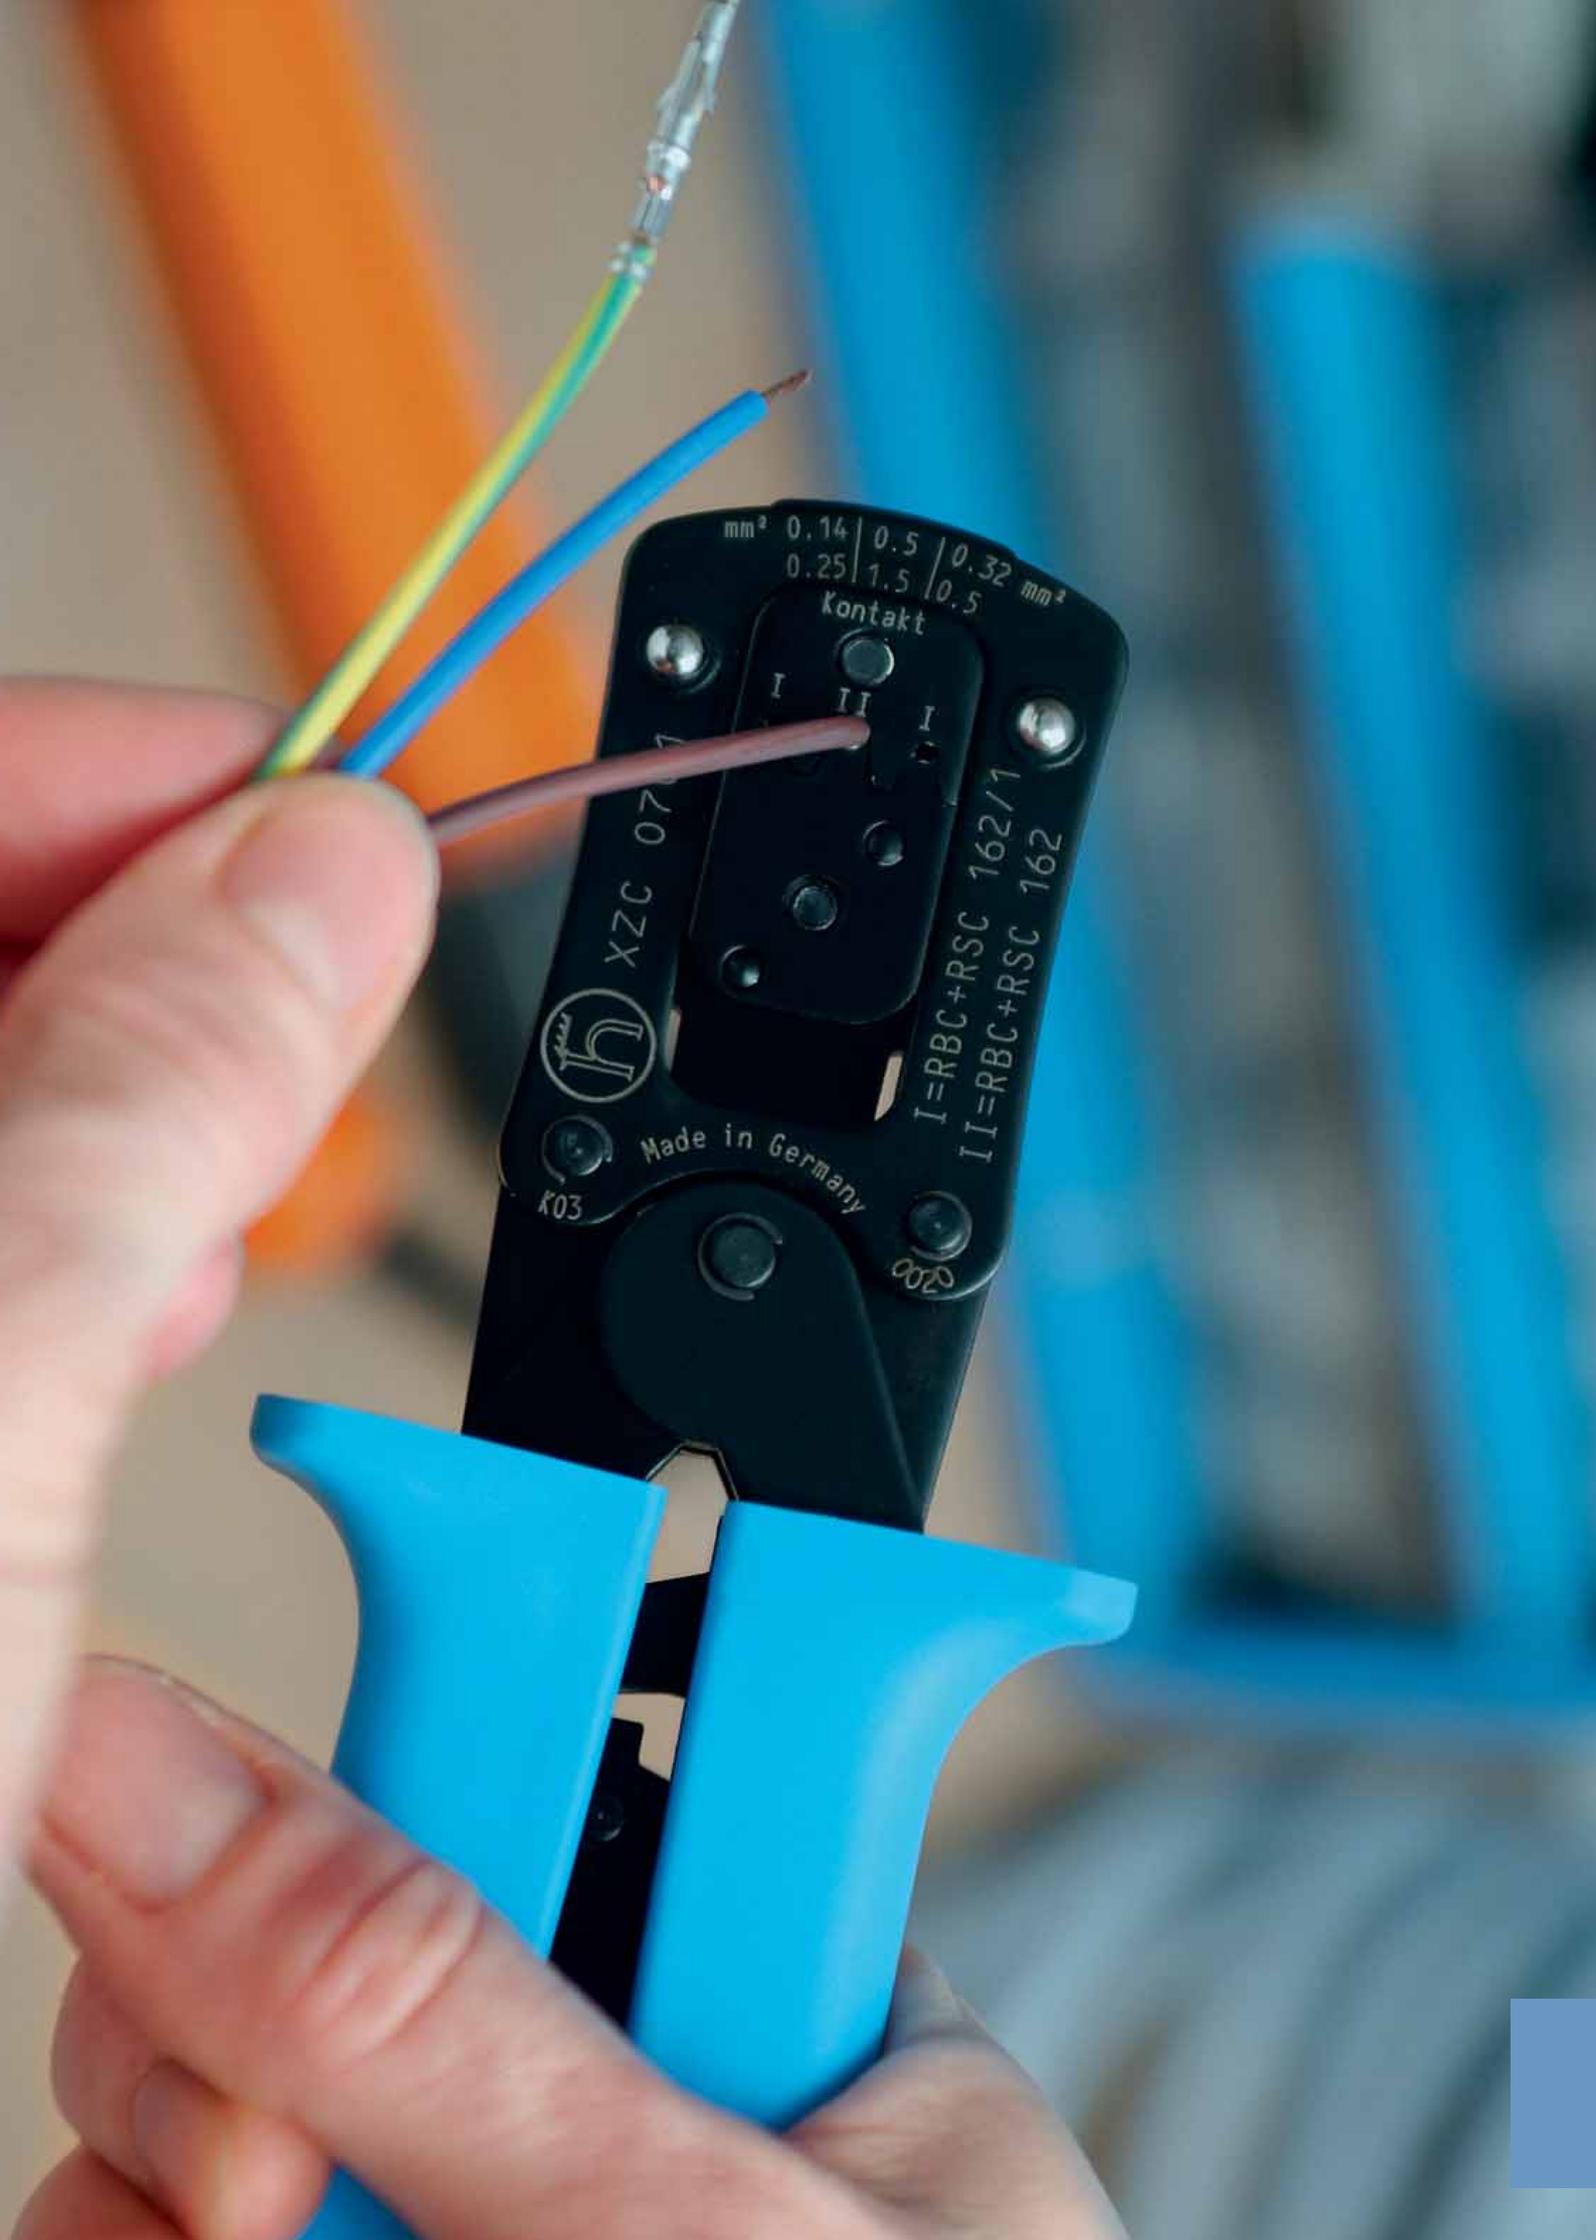

Crimping is a mechanical connecting technology in which a contact is crimped permanently to the cable to be connected. This is done in the blink of an eye, and for this reason, crimping technology is used very often when installing industrial connectors – specifically, the use of a crimp tool appropriate to the cable and contact, with which the installer can carry out crimping anywhere without any problems.

The crimp contact however is not just easy to make, but also ensures a permanent and reliable electrical connection.

Connections using crimp technology are therefore especially suitable in areas subject to heavy vibration stresses as well as in conveyor and vehicle technology. With a hand-crimping tool for contacts of the NR-, G- and ST-series or the GDM-series and crimp contacts by Hirschmann, you are optimally equipped to set up a very fast connection – no matter where and when.
