High efficiency circulators for domestic heating

Ecocirc® Series

MARKET SECTORS

RESIDENTIAL.

APPLICATIONS

- Water circulation in heating and air conditioning systems.
- Refurbishment or extension of existing systems.
- Recommended for facilities fitted with thermostatic valves.
- Single-family houses or apartment buildings.
- Floor heating systems.

SPECIFICATIONS

PUMP

- **Flow rate:** up to 3,2 m³/h.
- **Head:** up to 5,7 m.
- **Maximum power consumption:** 23 W (for the 4 m model) and 42 W (for the 6 m model).
- **Temperature of pumped liquid:** -10°C ÷ +110°C.
Avoid condensation and ice formation.
Maximum 20% glycol and water mixture.
For glycol quantities higher than 20%, hydraulic performances must be checked.
- **Maximum operating pressure:** 10 bar (PN 10).
- **Rotor assembly group:** made of stainless steel/composite material/carbon.

MOTOR

- Permanent magnet EC (Electronically Commutated) type motor with spherical rotor/stator.
- Wet rotor with a single spherical ceramic/carbon bearing.
- Integrated motor protection; no external protection required.
- Single-phase 200-240 V 50/60 Hz power supply.
- Variable-speed motor, with automatic speed adjustment based on system requirement.
- **Insulation class** F (155°C).
- **Protection class** IP 44.

*) model 15-6/130 excluded.

Ecocirc® Series

CONSTRUCTION CHARACTERISTICS

- **Improved hydraulics to improved efficiency:** The very latest computer simulations have further optimized the pump housing and the impeller. The cast iron pump housing is cataphoresis coated completely and is therefore resistant to corrosion.
- **The spherical rotor.** The permanent magnet rotor/impeller unit is the only moving part. Spherical motor pumps are shaftless, and therefore whisper quiet over the whole lifetime. In case of an indicated rotor blocking, emergency software shakes and vibrates the rotor to avoid further blocking.
- The revolutionary **Anti-Block-Technology** allows to separate the magnetic chamber from the flow, preventing magnetite and sludge to block and damage the pump. Blocking up, even in very old, open systems is impossible by our pump design.
- Easy to control, **Two in one control:** Step-less manually control with constant speed, displayed by a white LED, or alternatively automatic differential pressure, displayed by a blue LED.
- **Optimized motor technology:** Doubled electric windings combined with the latest 32 Bit processor technology - that also makes the Ecocirc® even more efficient.
- **Overttemperature protection feature** that slows down the circulator in case the temperature of the electronic module is too high and shuts it down when temperature rises above the safety limit. The circulator will automatically restart after having cooled down.
- Always **easy to access:** The screw ring design results in a pump motor that can be rotated in any position around the 360°circle. The electrical connection as well as the control knob is therefore easy to access.
- 2 metres length **three cores cable** (3G0.75) for connection to the single-phase power source.
- **Automatic air purge:** Quick automatic air-venting-mode for a safe operation.
- According to EN standards 60335-1, 60335-2-51, 55014-1, 55014-2, 16297-1, 16297-2.

CONTROL MODES

- Automatic regulation: the pump automatically adjusts the working conditions based on the requirement of the system. When the pump detects a decrease in the flow, the inverter reduces the differential pressure of the pump until it reaches the required head.

ACCESSORIES

- Pipe unions.
- Insulation shell.

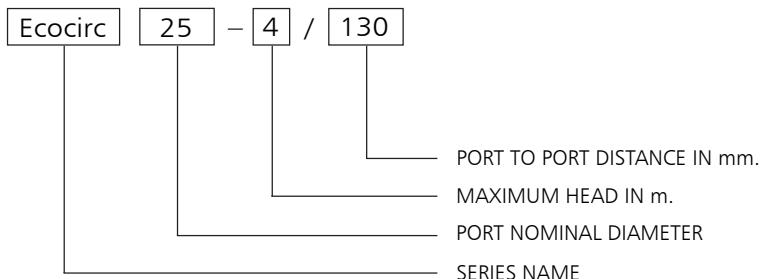

INSTALLATION

- Suitable for installation in vertical or horizontal piping, in this last case not with the motor housing upward.

a xylem brand

Ecocirc® SERIES IDENTIFICATION CODE

EXAMPLE : Ecocirc 25-4/130

Electronic circulator of the Ecocirc series, port nominal diameter = 25,
max head = 4 m, with port to port distance 130 mm.

TABLE OF MATERIALS

PART	MATERIAL
Pump body	Cast iron (EN-GJL-200) cataphoretically coated
Rotor assembly group	Stainless steel
	Composite material
	Carbon
Bearing	Ceramics
Gaskets	EPDM Rubber
Motor housing	Aluminum (AlSi11Cu2)
Screw ring	Aluminum (AlMgSi05)

High efficiency electronic sanitary circulators

EB, EBV Series

MARKET SECTORS

RESIDENTIAL.

APPLICATIONS

- Hot water circulation.

SPECIFICATIONS

PUMP

- **Flow rate:** up to 1 m³/h.
- **Head:** up to 3 m.
- **Temperature of pumped liquid:** +2°C ÷ +65°C.
Avoid condensation and ice formation.
- **Maximum operating pressure:** 10 bar (PN 10).
- **Rotor assembly group:** made of stainless steel/composite material/carbon.

MOTOR

- Permanent magnet EC (Electronically Commutated) type motor with spherical rotor/stator.
- Wet rotor with a single spherical ceramic/carbon ball bearing.
- Integrated motor protection; no external protection required.
- Single-phase 200-240V 50/60 Hz power supply.
- Motor type:
 - Fixed speed for temperature sensor and temperature sensor + timer models;
 - Variable speed with automatic regulation for basic and timer models.
- **Insulation class** F (155°C).
- **Protection class:** IP 44 no-timer models.
IP 42 timer models.

a xylem brand

EB, EBV Series

CONSTRUCTION CHARACTERISTICS

- Electric circulator pumps for domestic hot water applications at maximum temperature of 65°C, at maximum hardness of 25° f (14°dH).
- Brassy pump body for direct installation onto piping for 1/2" and 1/2" - 1" 1/4" threaded union connections.
- The design is based on spherical rotor/stator technology.
This means that:
 - The only moving part is the spherical rotor/impeller unit that turns on a hard ceramic ball.
 - Shaft seals or conventional bearing bushings with a shaft have been eliminated for a single self realigning spherical bearing.
- Blockage free rotor: the spherical motor principle does not require a manual unblocking device thanks to the small touching surface of the bearing on the ball. The starting torque required is minimal.
- Models available:
 - Fixed speed (EB.. models)
 - Temperature sensor to maintain the water onto piping at the required temperature . The circulator automatically turns off when the water temperature achieves the value. Temperature can be set up between 20°C and 70°C by the selector on the motor.
 - Temperature sensor and timer for more energy saving.
 - Variable speed (EBV.. models):
 - Performances optimized by system requests. Speed set up is done by a selector on the motor by 7 different positions. At 2 and 3 positions (ECO) the consumption is especially low.
 - Timer as a standard in order to daily set up the performances.
- 110 mm port-to-port length models are fitted out with non-return and shut off valve. 65 mm port-to-port length models are fitted out with a non-return valve to install to supply connection.
- According to EN standards 60335-1, 60335-2-51, 55014-1, 55014-2.

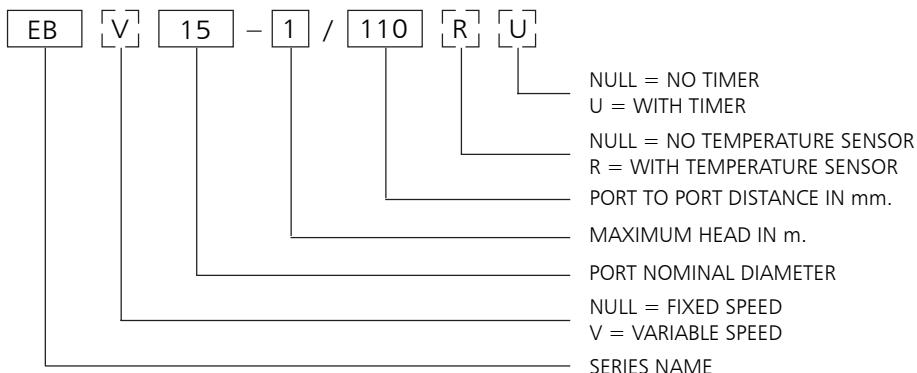

ACCESSORIES

- Pipe unions.
- Insulation shell.

INSTALLATION

- Suitable for installation in vertical or horizontal piping, in this last case not with the motor housing upward.

EB, EBV SERIES IDENTIFICATION CODE

EXAMPLE : EB 15-1/110 RU

Electronic circulator of the EB series, port nominal diameter = 15,
max head = 1 m, port to port distance 110 mm, with temperature probe and timer.

Sanitary Circulators

MARKET SECTORS

RESIDENTIAL.

APPLICATIONS

- Circulation of sanitary hot water.

TLCB Series

SPECIFICATIONS

PUMP

- **Flow rate:** up to 5 m³/h.
- **Head:** up to 6 m.
- **Temperature of pumped liquid:** +2°C ÷ +65°C.
Avoid condensation and ice formation.
- **Maximum operating pressure:** 10 bar (PN 10).
- **Impeller:** made of composite material.
- **Wear ring:** ceramic.

MOTOR

- Wet rotor type, with bearings lubricated by the pumped liquid.
Axial and radial bearings made of ceramic.
- Single-phase 230 V 50 Hz power supply.
Terminal box axially integrated in the motor.
- Three speed hand selector motor.
- **Insulation class** 180 (H).
- **Protection class** IP 44.

CONSTRUCTION CHARACTERISTICS

- Electric circulator pumps for sanitary hot water circulation, at a maximum temperature of 65°C, maximum hardness of 25° f (14°dH) and maximum viscosity of 10 mm²/s.
- Bronze pump body designed for direct installation onto copper piping, with 1", 1" 1/4 and 1" 1/2 threaded connections.
- According to EN standards 60335-1, 60335-2-51, 55014-1, 55014-2.

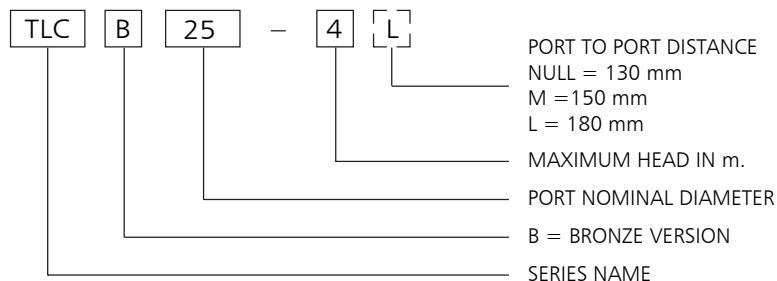

ACCESSORIES

- Pipe unions.
- Insulation shell.

INSTALLATION

- Suitable for installation in horizontal or vertical piping, in any position provided that motor axis is horizontal.

TLCB SERIES IDENTIFICATION CODE

EXAMPLE : TLCB 25-4L

TLC series circulator, bronze B version, port nominal diameter = 25, max head= 4 m, with port to port distance of 180 mm.

TABLE OF MATERIALS

PART	MATERIAL
Pump body	Bronze
Impeller	Composite material
Shaft	Ceramics
Inner jacket	Stainless steel
Wear ring	Ceramics

Sanitary Circulators

MARKET SECTORS

SANITARY LIGHT COMMERCIAL.

APPLICATIONS

- Circulation of sanitary hot water in high flow/high head installations.

TLCHB Series

SPECIFICATIONS

PUMP

- **Flow rate:** up to 12 m³/h.
- **Head:** up to 12 m.
- **Temperature of pumped liquid:** +2°C ÷ +65°C.
Avoid condensation and ice formation.
- **Maximum operating pressure:** 10 bar (PN 10).
- **Impeller:** made of composite material.
- **Wear ring:** ceramic.

MOTOR

- Wet rotor type, with bearings lubricated by the pumped liquid.
Axial and radial bearings made of ceramic.
- Single-phase 230 V 50 Hz power supply.
Terminal box axially integrated in the motor.
- Three speed hand selector motor.
- **Insulation class** 180 (H).
- **Protection class** IP 44.

CONSTRUCTION CHARACTERISTICS

- Electric circulator pumps for sanitary hot water circulation, at a maximum temperature of 65°C, maximum hardness of 25° f (14°dH) and maximum viscosity of 10 mm²/s.
- Bronze pump body designed for direct installation onto copper piping, with 1" 1/4 and 1" 1/2 threaded connections.
- According to EN standards 60335-1, 60335-2-51, 55014-1, 55014-2.

ACCESSORIES

- Pipe unions.
- Insulation shell.

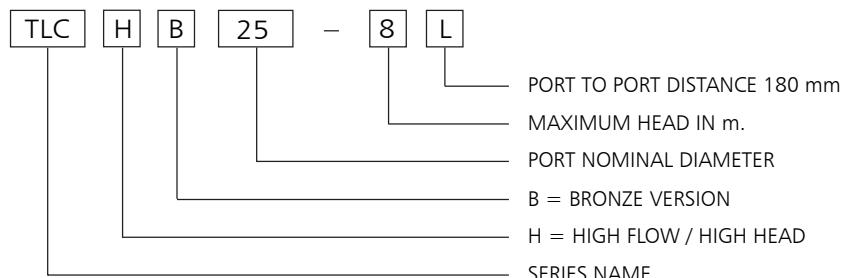

INSTALLATION

- Suitable for installation in horizontal or vertical piping, in any position provided that motor axis is horizontal.

a xylem brand

TLCHB SERIES IDENTIFICATION CODE

EXAMPLE : TLCHB 25-8L

TLC series circulator, high flow/head H version, bronze B version, port nominal diameter = 25, max head= 8 m, with port to port distance of 180 mm.

TABLE OF MATERIALS

PART	MATERIAL
Pump body	Bronze
Impeller	Composite material
Shaft	Ceramics
Inner jacket	Stainless steel
Wear ring	Ceramics
Bearings	Ceramics
Gaskets	EPDM

TECHNICAL APPENDIX

FLOW RESISTANCE

TABLE OF FLOW RESISTANCE IN BENDS, VALVES AND GATES

The flow resistance is calculated using the equivalent pipeline length method according to the table below:

ACCESSORY TYPE	DN											
	25	32	40	50	65	80	100	125	150	200	250	300
	Equivalent pipeline length (m)											
45° bend	0,2	0,2	0,4	0,4	0,6	0,6	0,9	1,1	1,5	1,9	2,4	2,8
90° bend	0,4	0,6	0,9	1,1	1,3	1,5	2,1	2,6	3,0	3,9	4,7	5,8
90° smooth bend	0,4	0,4	0,4	0,6	0,9	1,1	1,3	1,7	1,9	2,8	3,4	3,9
Union tee or cross	1,1	1,3	1,7	2,1	2,6	3,2	4,3	5,3	6,4	7,5	10,7	12,8
Gate	-	-	-	0,2	0,2	0,2	0,4	0,4	0,6	0,9	1,1	1,3
Non return valve	1,1	1,5	1,9	2,4	3,0	3,4	4,7	5,9	7,4	9,6	11,8	13,9

G-a-pcv-en_a_th

The table is valid for the Hazen Williams coefficient C=100 (cast iron pipework);

for steel pipework, multiply the values by 1,41;

for stainless steel, copper and coated cast iron pipework, multiply the values by 1,85;

When the **equivalent pipeline length** has been determined, the flow resistance is obtained from the table of flow resistance.

The values given are guideline values which are bound to vary slightly according to the model, especially for gate valves and non-return valves, for which it is a good idea to check the values supplied by manufacturers.

FURTHER PRODUCT SELECTION AND DOCUMENTATION**Xylect™**

Xylect™ is pump solution selection software with an extensive online database of product information across the entire Lowara, and Vogel range of pumps and related products, with multiple search options and helpful project management facilities. The system holds up-to-date product information on thousands of products and accessories.

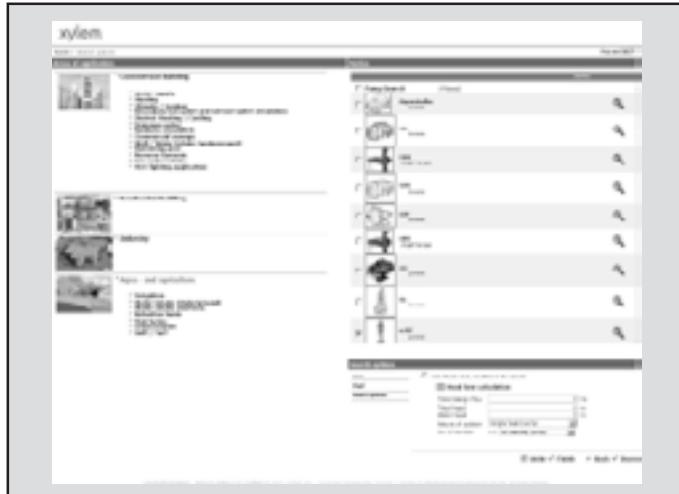

The possibility to search by applications and the detailed information output given makes it easy to make the optimal selection without having detailed knowledge about the Lowara and Vogel products.

The search can be made by:

- Application
- Product type
- Duty point

Xylect™ gives a detailed output:

- List with search results
- Performance curves (flow, head, power, efficiency, NPSH)
- Motor data
- Dimensional drawings
- Options
- Data sheet printouts
- Document downloads incl dxf files

The search by application guides users not familiar with the product range to the right choice.

FURTHER PRODUCT SELECTION AND DOCUMENTATION

Xylect™

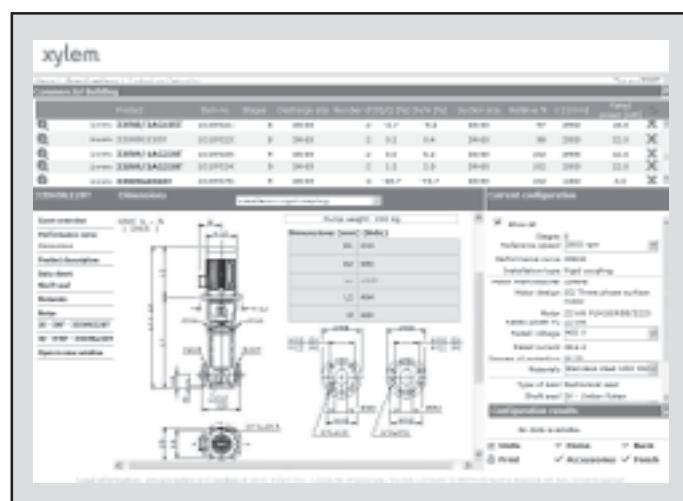

The detailed output makes it easy to select the optimal pump from the given alternatives.

The best way to work with Xylect™ is to create a personal account. This makes it possible to:

- Set own standard units
- Create and save projects
- Share projects with other Xylect™ users

Every user have a My Xylect space, where all projects are saved.

For more information about Xylect™ please contact our sales network or visit www.xylect.com.

Dimensional drawings appear on the screen and can be downloaded in dxf format.

Xylem |'ziləm|

- 1) The tissue in plants that brings water upward from the roots;
- 2) a leading global water technology company.

We're approximately 12,700 people unified in a common purpose: creating innovative solutions to meet our world's water needs. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. We move, treat, analyze, and return water to the environment, and we help people use water efficiently, in their homes, buildings, factories and farms. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise, backed by a legacy of innovation.

For more information on how Xylem can help you, go to xyleminc.com.
