

Cyprus swimming pool safety fences

POOL SAFETY FENCES ARE THE UNIVERSALLY FAVOURED SAFETY BARRIER for the prevention of drowning accidents to children in the 1-6 years 'high risk' age group. 86% of our customers opt for a pool safety fence. Here's why:

- A pool safety fence provides a safe, secure barrier 100% of the time, whereas the protection afforded by a safety cover or safety net is lost once it is removed from the pool for swimming.
- The time and effort required to remove a safety cover or safety net can be a disincentive to taking a quick dip in the pool on a hot summer's day.
- A pool safety fence is usually the least expensive type of safety barrier.
- A pool safety fence is nearly as effective as a safety cover at keeping leaves and debris out of the pool.

WHAT'S SO SPECIAL ABOUT OUR 'ELITE' POOL SAFETY FENCE? Our business is all about pool safety; it's our passion and our area of expertise. So when the time came to manufacture our own pool safety fence, we went the extra mile to ensure it was the very best in terms of innovative design, excellence of engineering and quality of

components. We call our pool safety fence 'Elite' – a name synonymous with both quality and excellence.

FEATURES AND BENEFITS Here are some of the features which make our 'Elite' pool safety fence so unique:

1. The 'Elite' pool safety fence is completely removable. If not required in place, the fence can be taken down in minutes, rolled up into convenient, easy-to-carry bundles, and then stored. When next required, the fence can be re-installed in minutes.

2. The mesh panels on our 'Elite' pool safety fence are see-through. This enables you to what's going on in the pool at all times, and is more pleasing to the eye than wooden, steel, or concrete structures, which can detract from the ambience of the swimming pool area. Unlike conventional fencing, the mesh panels on our 'Elite' pool safety fence have no hand or footholds for children; consequently kids cannot climb over the fence, nor can they crawl under.

3. Appearance matters: customers tell us that they love the appearance of our 'Elite' pool safety fence - particularly the tan (beige) colour which blends so perfectly with the Cyprus landscape. The fence comes in two other colours: dark green and black. We can make your pool safety fence whatever shape you like, and as large or as small as is practical and safe.

The fenceposts feature a baked-on powder-coated finish to inhibit corrosion and maintain the nice appearance of the fence over many years. The stainless steel we use is one of the highest grades available and all materials are both mildew and UV-resistant.

4. The specification for our 'Elite' pool safety fence meets or exceeds the criteria laid down by those countries which have pool safety regulations. For example:

- Our 'Elite' pool safety fence is 1.2m high – universally considered to be the *minimum* height for a pool safety fence.
- Most pool safety fence manufacturers space their fenceposts 100cms apart. Ours are just 80cms from one fencepost to the next; this makes for a stronger, more robust, and *much* safer fence.
- Sections of fence are joined together with child-proof **safety connectors**.
- Our 'Elite' **pool safety gate** utilises spring-loaded hinges, which make the gate self-closing. You can *never* accidentally leave the gate open.
- The gate is self-locking and locks automatically each time you pass through. You can *never* accidentally leave the gate unlocked.

- The gate is also key-lockable, enabling you to deny access to older children or unauthorized persons.
- The release latch on the safety gate is 1.5m (4'11") high and requires two hands to open the gate, making it impossible for children in the high-risk age group to accomplish this task.

5. Our 'Elite' pool safety fence comes with a conditional 5-year warranty.
