

CHANGE Features

Chafing Dishes »CHANGE«

The lid is fully rolltop and is offset to the burner holder or hotplate when swivelled. This means that when the lid is fully opened, the food is easily accessible while still ensuring adequate ventilation for the flame. The round chafing dish lid can be opened to three different positions and the GN 1/1 model lid is infinitely adjustable.

The round chafing dish now includes a flex clip, allowing the lid to be opened freely when using electric heating.

The handles are insulated to allow the lids to be opened for serving without using a cloth or other holder.

The condensation return built into the edge of the lid prevents drips and unsightly puddles on the tabletop.

All the models (except Manhattan) are stackable to save space.

CHANGE your mind

CHAFING DISHES

Confident styling in any setting

When it comes to treating discerning diners to a superior buffet, it's important to ensure the chafing dishes chosen are in keeping with the style and status of the establishment. Whether down-to-earth, modern, classical, smart, tasteful or cool, you're sure to find exactly the right chafing dish among the wide range of »CHANGE« models to fit in perfectly with your personal style.

Keeping one hand free

Both the GN 1/1 size and the round chafing dishes in the Change line have one thing in common: a rolltop lid which runs almost silently and is easy to open with just one hand. That will be appreciated by anyone who has ever tried to keep the lid open with one hand while holding a plate in the other... and then wondered how to reach the food! The full rolltop lid is practical both during and after use. When fully open, it allows the chafing dishes (except for the Manhattan model) to be stacked up, to save space.

Material and finish

Professionals will realise immediately on opening the chafing dish that there has been no scrimping on either finish or material. All models are made from high-quality stainless 18/10, with gold-plated fittings on request. After all, wouldn't it be a pity to present your creations to diners in a rickety "cheap" chafing dish? Choice of sterno or electric heating.

Change Chafing Dishes, round
