**Brooder Cosy "KUNSTSTGLUCKE"**

Complete with an electric heater for poultry drinkers ( 30 cm) with thermostat, as well as a plastic dome, specially designed for chick breeding, to be put over the the heater. The chicks search for the warmth underneath the dome feeling safe and sound. A healthy growing is guaranteed

**Brooder Cage**

Our brooder cages are made from white plastic coated wooden boards. The infinitely adjustable thermostat allows regulating various temperature settings, therefore suitable for all poultry breeds. The boxes are equipped with easy removable drop pans made from lightweight aluminium covered with wire allowing droppings to pass through. An integrated hotplate regulated by a thermostat assures a constant temperature in the interior of the box, insured to outside temperature fluctuations. An acrylic glass pane and a frame furnished with a fine wire mesh are fitted to the front panel of our brooding cages. For fresh air just simply slide open the glass door. The wire mesh frame ensures that no chicks can escape. For easy access to the interior of the brooder the wire frame can be slid open as well. The whole front panel can be opened and removed from the brooding box. This ensures hygienically and easy cleaning.

Dimensions: width: 80 cm, depth: 60 cm, height: 50 cm
