On the Road again

The comprehensive accessory range for trucks and vans

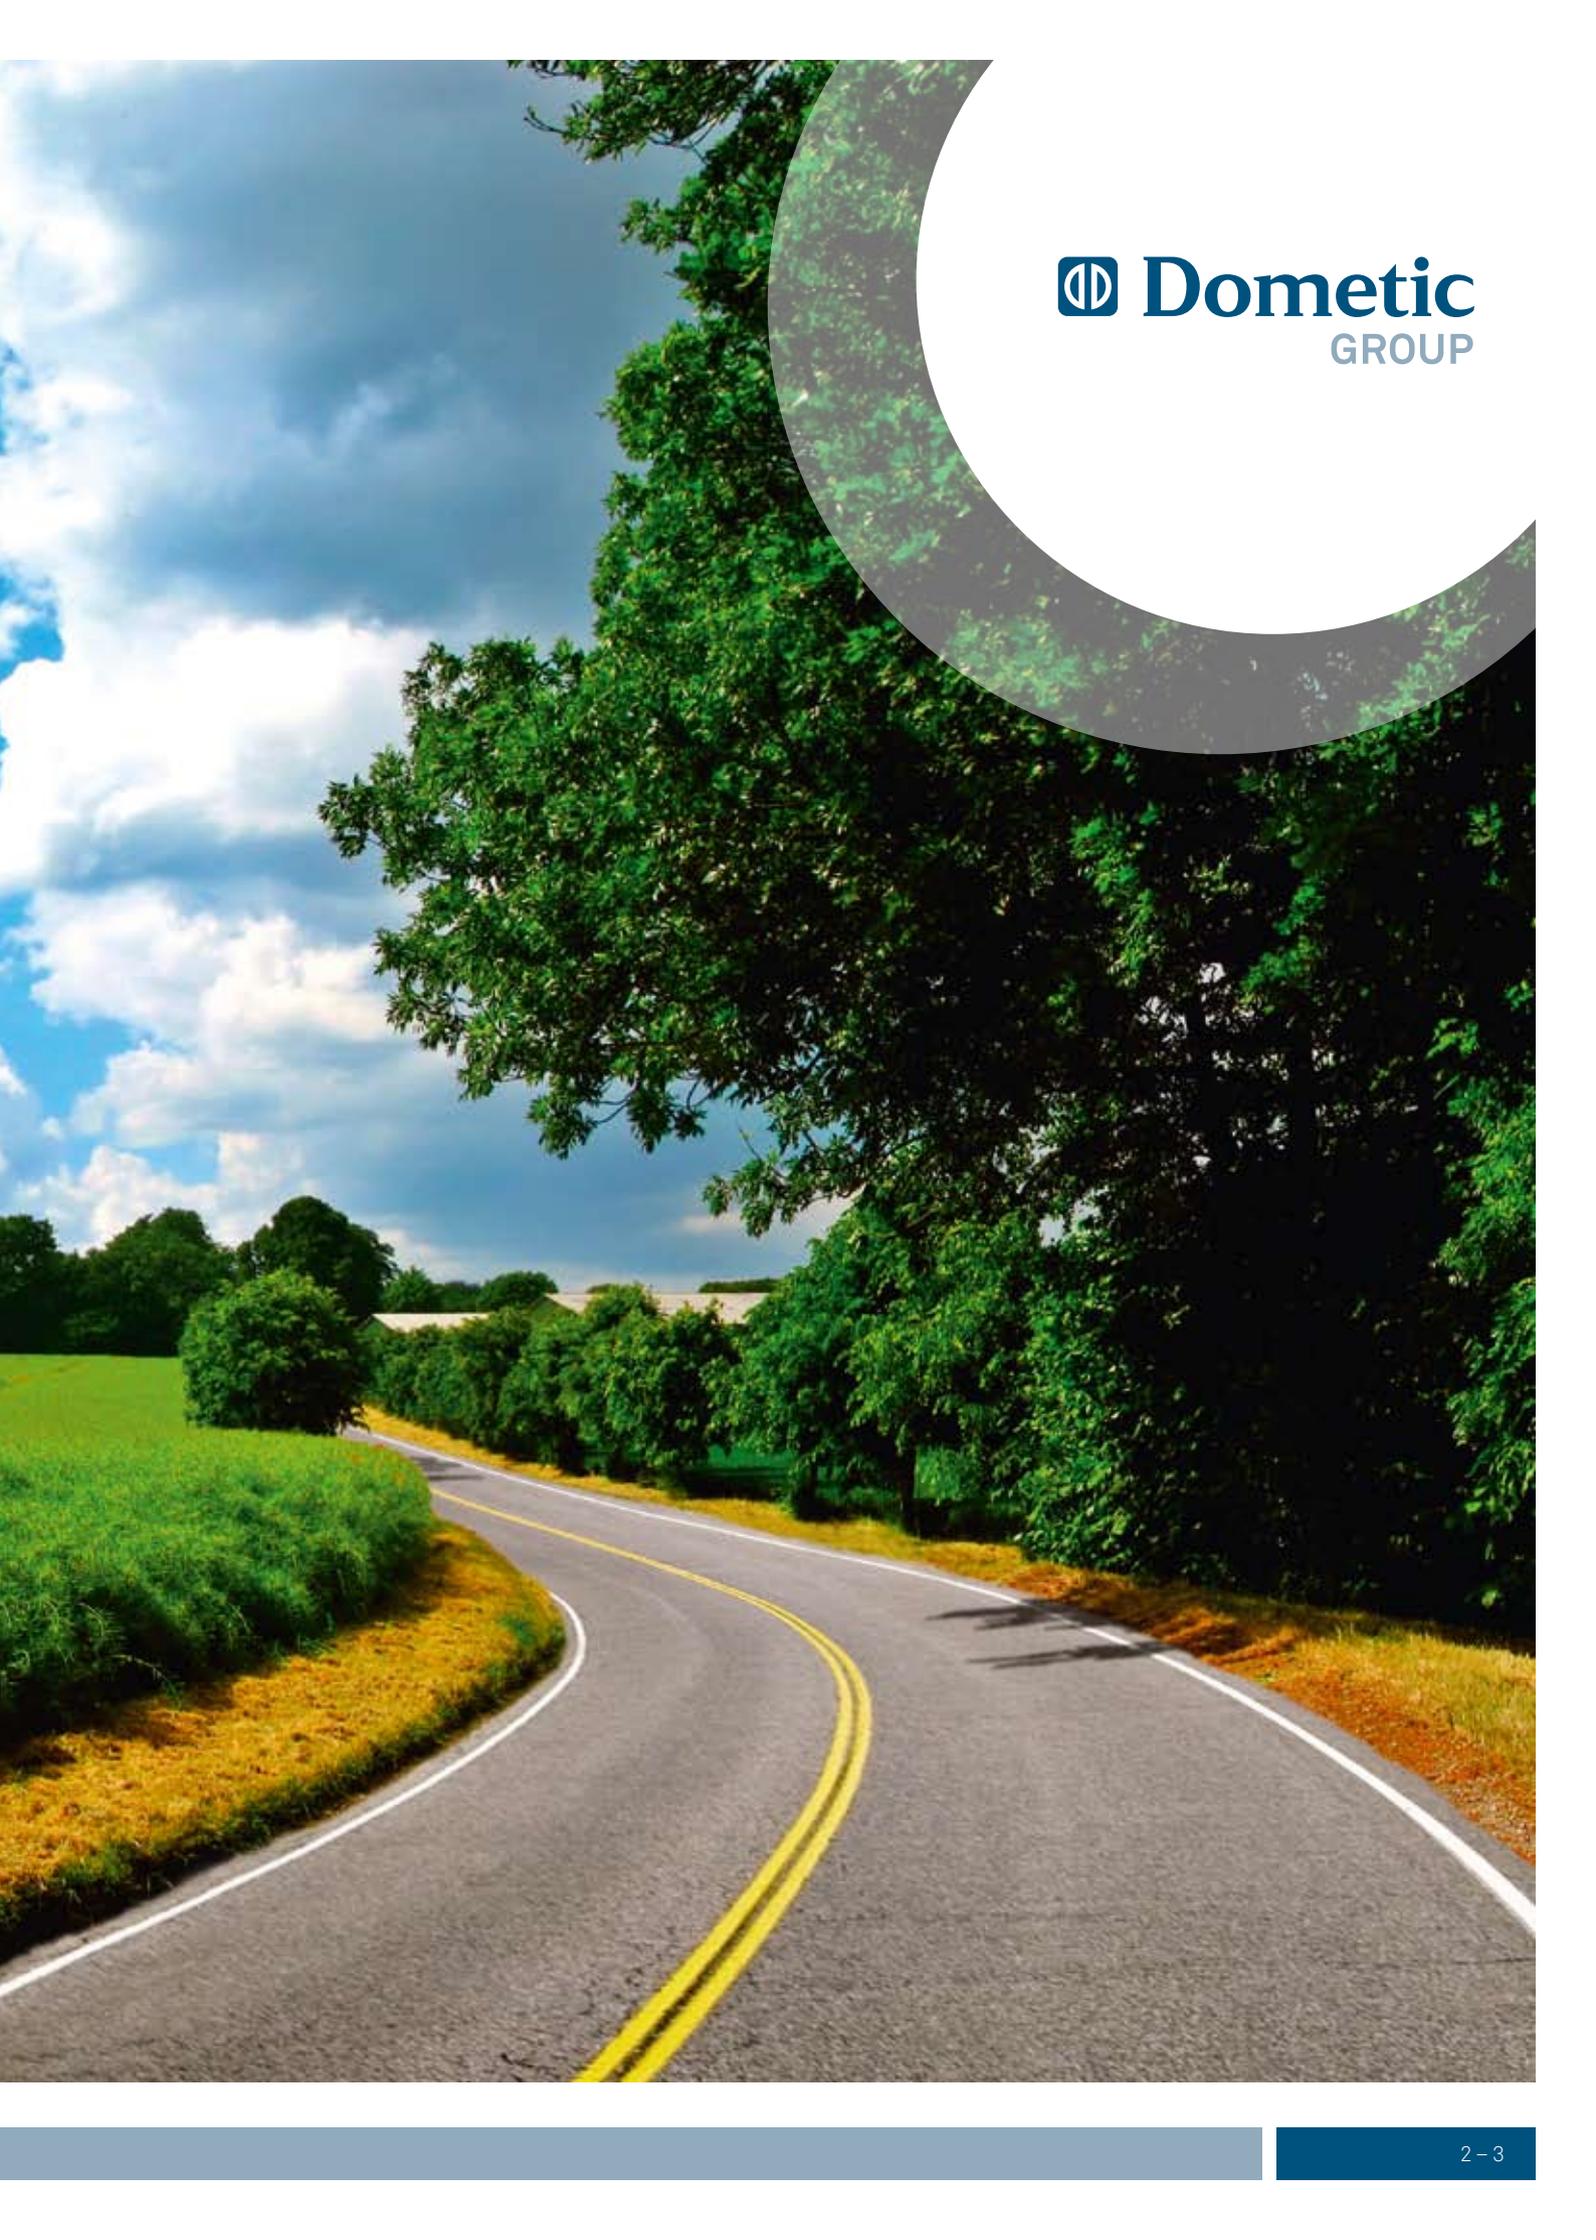

| 2010

Freedom ...

| 2010

... is a big word. It is not always an appropriate word to describe the life of a trucker constantly under pressure to meet deadlines and conform with regulations. Nevertheless there are the odd moments of joy to be had on the open road in a way that no office job in the world could possibly match. The feeling of sitting behind the wheel and being one's own boss, in charge of a truckload of high-tech gadgets. The feeling of being responsible for valuable freight. The joy of seeing new horizons unfold. The elation that comes from a sunny day and an open road free of traffic.

We would like to share these moments "on the road" with you and make your life on the go that little bit more enjoyable. The mobile technology from the tried and tested brands WAECO and Dometic has been specially tailored to the needs of truckers. Choose from a massive range – you have certainly deserved it!

Dometic WAECO – OEM partner

Our expertise serves the commercial vehicle sector

It is not just end users who value the name Dometic WAECO. The brand also carries weight among the leading vehicle manufacturers. They appreciate our outstanding competence in the areas of mobile refrigeration and electronics and know that we can meet the high standards expected of original equipment. Many of our innovative products are now firm fixtures on the original equipment lists of manufacturers. From storage compartment fridges to integrated inverters – make Dometic WAECO your preferred supplier straight from the factory!

Freshness factory direct

A customised cooler for MAN TGS / TGX

Our expertise in mobile refrigeration is sought after all over the world. It is also appreciated by MAN, a well known vehicle manufacturer we have been successfully working with for many years. The result is a high-performance compressor cooler tailor-made for the storage compartment under the driver's bed. This integrated solution is exclusively available from MAN; it can be ordered by the customers as factory direct option.

MAN TGS/TGX generation trucks come with many technical innovations and enhancements. Our contribution: the 35-litre compressor cooler under the driver's bed – offered by MAN as a “cool” alternative to a practical storage box – was optimised by means of a foamed evaporator design which improves the cooling performance and makes cleaning easier. Moreover, the cooler's patented double lid is now even more convenient to open, it flexibly adjusts for easy access to cool snacks and drinks while driving.

Original accessory:
WAECO 35-litre compressor cooler

Extra comfort for Volvo drivers

WAECO products as optional equipment

Two cool compressor solutions by WAECO for the FH Globetrotter XL: the usual Bunk Box under the driver's bed can be replaced by a 22-litre drawer fridge to be ordered factory direct or as original accessory. Alternatively, the storage compartment at the rear wall of the driver's cabin (Rearshelf) can be turned into a convenient 25-litre on-board fridge. On top of that, there's a WAECO heavy-duty colour camera for convenient manoeuvring.

Take your choice

Mobile technology for truckers

Safety and comfort on the move

It is not an easy job: the pressure of deadlines, intense competition and heavy traffic all serve to increase stress levels. Despite this it is still possible to concentrate on driving and relax with intelligent technology

from WAECO and Dometic, tailored specifically to the needs of professional truck drivers. You will find everything that our special range has to offer on this double page.

1 Mobile climate solutions

Superior compressor technology: roof and split air conditioners for stationary use in trucks. Easy installation and perfect finish with vehicle-specific installation kits.

WAECO CoolAir CA 800 / CA 850S

Truck roof air conditioner for stationary use
24 V DC

Our experience – your gain

Vehicle-specific integrated solutions

Retrofit safety and comfort

Trucks are mobile workplaces and frequently living, eating and sleeping place to boot. The provisions for these activities are often makeshift and inadequate. After all, a truck cab is hardly the place for luxurious accessories ...

Or perhaps it is, you just have to know how to accommodate them. This is the challenge we have been successfully addressing for many years in the areas of mobile refrigeration and electronics with the help of our close partnership with the commercial vehicle sector. The result of this cooperation is a comprehensive range of accessories with tailor-made products for all common truck and van models. The advantage of vehicle-specific solutions for retrofitting: they are perfectly adapted to the space in the cab, often utilise forgotten corners or storage compartments, and are easy to fit. Of course they also offer the same level of quality as our OEM solutions for the automotive industry.

On the following pages you will find detailed information about our vehicle-specific coolers.
We are very happy to answer any further questions.

Custom-made to fit your DAF

The WAECO range for vehicle types XF / CF 95 and 105

WAECO CoolMatic CD-30

One-hand access

30-litre drawer fridge with compressor. Fits perfectly under the driver's bed. Convenient one-hand access. Flawless finish with stainless steel installation frame (optional).

Continuous temperature regulation from 12°C to -2°C.

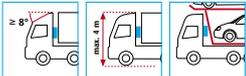

Details on page 52.

WAECO CoolAir SP 900

Stationary climate in two components

Your cabin is too tall or too steep for a roof air conditioner? Or it's already fitted with a roof superstructure? Then the WAECO split air conditioner is the perfect choice. Mounted to the inside and outside rear wall of the driver's cabin. Fastening frames for DAF XF105 Super Space Cab and DAF Space Cab. Details on pages 44 – 47.

DAF fastening frame DAF1 SP900

WAECO CoolAir CA 800

Perfect climate "on the spot"

Rest and recuperation regardless of temperatures outside: this roof air conditioner was specifically designed for stationary use in trucks – the ideal complement to your vehicle's A/C! Easy installation and a neat finish with a vehicle-specific installation kit. For DAF Super Space Cab XF95/XF105 and DAF Space Cab XF105. Details on pages 40 – 43.

DAF installation kits CA-EK-DAF1, CA-EK-DAF2, CA-EK-DAF3

WAECO PerfectView CAM 40

Far better than any mirror!

Compact ball camera + flat LCD monitor = perfect front view. Approved to 2003/97/EC (mirror directive). Details on pages 108 – 111.

A piece of WAECO in the Iveco ...

... or two or three – tailor-made for the Iveco Stralis!

WAECO CoolFreeze FT-30

Squared to fit

30 litres cooling capacity for snacks, beverages or even frozen food would fit your needs? It's a perfect fit, because the square CoolFreeze FT-30 has almost the same dimensions as your storage compartment. Details on page 56.

WAECO ColdMachine CS-IV

Budget-price perfection!

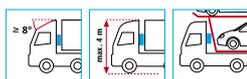

Iveco Stralis drivers don't need to look far for a suitable cooler – it's just between their seats. Just roll your sleeves up and install the high-performance CS-IV cooling unit in the storage drawer. Details on page 56.

WAECO CoolAir SP 900

Hot outside, lovely cool inside

A hot cabin is definitely not a good place to sleep. Why go without adequate rest and recovery when you can have a perfectly fitting A/C for your Iveco? The two components of the CoolAir SP900 split air conditioner are simply mounted to the inside and outside of the rear wall. Details on pages 44 – 47.

Iveco fastening frames
IVEC1 SP900
IVEC2 SP900

WAECO CoolAir CA 850S

Compact and powerful

Cools and dehumidifies the air – and creates a pleasant climate in the cabin. Operation with all windows closed – good for keeping burglars away. Specially designed for IVECO Stralis AS, AS³, AT (high-roof cab). Fast installation and a perfect finish with the vehicle-specific cover frame. Details on pages 36 – 39.

Iveco cover frame

Good for MAN ...

Refrigeration and more for TGX, TGS, TGA, TGM, TGL

WAECO TropiCool TC-21FL

XXL-size cooling

A low-cost cooling solution for MAN TGX XLX und XXL: this thermoelectric cooler easily slots into the storage compartment under the driver's bed. 21 litres capacity for food and snacks. Cooling performance up to 30°C below ambient, heating up to +65°C. Details on page 76.

WAECO CoolAir SP 900

Rest and relaxation ...

... are the built-in benefits of this split air conditioner. A high-performance, easy-to-install alternative for vehicles where a roof air conditioner cannot be used because, for example, there's already something fitted on the roof, or a roof-mounted unit would mean exceeding the maximum permissible height. Details on pages 44 – 47.

MAN
fastening frames
MAN1 SP900

The climate to suit you and your truck ...

... and so easy to fit with the vehicle-specific installation kit. This compressor powered stationary air conditioner ensures you will really enjoy your well deserved breaks. It creates a pleasant climate in your cab, with cool and dehumidified air. Details on pages 40 – 43.

MAN installation kit
CA-EK-MAN1

WAECO PerfectView CAM 40

Camera replaces mirror

Compact ball camera + flat LCD monitor = perfect front view. Approved to 2003/97/EC (mirror directive). Details on pages 108 – 111.

Designed under a good star

Specials for Mercedes-Benz Actros

WAECO CoolMatic CS-MP2

Concealed cooling

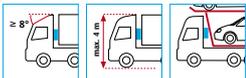

This tailor-made compressor cooler for the Actros 2 and 3 works quietly in the background. Its place is in the drawer under the driver's bed. The interior light reveals an inviting, roomy interior with a capacity of 25 litres. Top cooling performance, minimal power consumption. Details on page 54.

WAECO CoolAir SP 900

Perfect climate while stationary

Purpose-designed for stationary use and easy to fit to the rear wall of the cabin with the vehicle-specific fastening frame. The split air conditioner is ideal for vehicles where a roof system cannot be fitted because it would make the vehicle too tall, or because the cabin already has a roof-mounted structure. Details on pages 44 – 47.

Mercedes-Benz
fastening frame
MB1 SP900

WAECO CoolAir CA 800

Like a blessing from above ...

... in this case from the jets of your compressor roof air conditioner. The refreshing air jet creates a pleasant climate in your cabin and gives you a restful break. Specially designed for stationary use and fitted in no time at all. Thanks to the vehicle-specific installation kit the CoolAir CA800 integrates harmoniously in the roof lining. Details on pages 40 – 43.

Mercedes-Benz
installation kits
CA-EK-MB1, CA-EK-MB2

WAECO PerfectView CAM 40

Premium perspective

The combination of front camera and LCD monitor is better than a front mirror. Approved according to 2003/97/EC. Read up on pages 108 – 111 why investing in that much safety is so important.

German-French teamwork

WAECO technology for Magnum and Premium

WAECO CoolMatic CD-30

Cooling capacity disguised ...

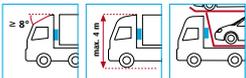

... very elegantly below the driver's bed. The CD-30 compressor drawer fridge neatly fits the storage space underneath. Convenient one-hand access from the driver or passenger seats. Continuous temperature regulation from +12°C to -2°C. Perfect finish with stainless steel installation frame (optional). Details on page 52.

WAECO CoolAir SP 900

Climate control at the rear wall

Your cabin is too tall or too steep for a roof air conditioner? Or it's already fitted with a roof superstructure? That makes the WAECO split air conditioner the perfect solution. Conceived for stationary use it makes for a restful break. Easy installation with vehicle-specific fastening frames. Details on pages 44 – 47.

Renault fastening frames
REN1 SP900
REN2 SP900

WAECO CoolAir CA 800

Rest in a Renault

This roof-mounted compressor air conditioner makes your rest perfectly comfortable when you stop by the road. Driver and passenger enjoy pleasant temperatures and dehumidified air. Installation is quick and easy with the vehicle-specific kit. For Renault Magnum and Premium Route (Long Cab). Details on pages 40 – 43.

Renault installation kits
CA-EK-REN1, CA-EK-REN2

WAECO PerfectView CAM 40

A watchful eye

Better than a front mirror: the ball camera fitted on the windscreen, combined with the LCD monitor in the cockpit gives you a perfect overview at the front. Approved to 2003/97/EC (mirror directive). Details on pages 108 – 111.

The cool Scania collection

New and good old solutions for Swedish power guys

WAECO CoolMatic CS-SC

Cooler / freezer combo for Scania R

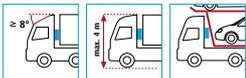

Home-like cooling comfort: 26 litres for refrigeration, 11 litres for deep-freezing up to -12°C . All this in two separate drawer sections, easily accessible from either seat. Most likely, this offer will make Scania R drivers glad to part with their under-bed storage drawer. Especially nice to have at night: the LED interior light. Details on page 55.

WAECO CoolAir SP 900

Split to fit

Why go without the comforts of climate control just because the cabin is too tall or too steep for a roof-mounted air conditioner, or because it already has a roof superstructure? This stationary air conditioner consists of two split components which are fitted to the inside and outside rear wall. Details on pages 44 – 47.

Scania
fastening frame
SCAN1 SP900

WAECO CoolAir CA 800

Roof air conditioner replaces window

The engine is off, the windows are closed, you are having a break. The CA800 takes over from the vehicle air conditioning, keeps the temperature at a pleasant level, dehumidifies the air. Easy and elegant installation in your Scania with the vehicle-specific installation kit.

Details on pages 40 – 43.

Scania
installation kit
CA-EK-SCAN1

WAECO PerfectView CAM 40

Far better than any mirror!

Compact ball camera + flat LCD monitor = perfect front view. Approved to 2003/97/EC (mirror directive). Details on pages 108 – 111.

Volvo convenience

WAECO improves comfort on board

WAECO PerfectView CAM 40

Camera replaces mirror

The best answer to the 2003/97/EC mirror directive: PerfectView front camera + LCD monitor. The camera's ball shape enlarges your field of vision, and a high-grade sensor delivers brilliant pictures even when light conditions are bad. Details on pages 108 – 111.

WAECO CoolMatic RHD-50

Heavy-duty champion

This 50-litre fridge really can take a lot. High-quality materials and workmanship make the RHD-50 fit for the rigours of mobile use. Its place is in the exterior storage compartment of your Volvo FH (from year 2002). Safe and easy to fit with a custom-built mounting plate. Details on page 53.

WAECO CoolAir CA 800

Feeling well in all weathers

This stationary roof air conditioner creates a pleasant climate in the cabin. The ideal complement to your vehicle's A/C! Easy to install and a neat finish with the specific installation kit for the FH L2H3 (Globetrotter XL).

Details on pages 40 – 43.

Volvo installation kit
CA-EK-VOLV2

WAECO CoolAir CA 850S

Custom fit for FH L2H2 (Globetrotter)

Cools and dehumidifies the air – and creates a pleasant climate in the cabin. Operation with all windows closed – good for keeping burglars away. Fast installation and a neat finish thanks to the vehicle-specific concept.

Details on pages 36 – 39.

Volvo
installation kit

WAECO CoolAir SP 900

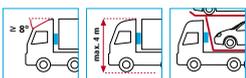

Perfect climate in two components

The two components of the WAECO split air conditioner are simply fitted to the inside and outside rear wall of the cabin. Optimal temperature conditions while stationary – also in vehicles fitted with e.g. a roof superstructure.

Details on pages 44 – 47.

Volvo fastening frame
VOLV1 SP900

Adding the finishing touch to your van

Comfort and safety accessories for delivery vehicles

WAECO PerfectView RVS 550

Camera replaces mirror

More comfort and safety while reversing! The RVS 550 reversing video system offers great value for little money: a heated colour camera with a SONY picture sensor and a 120° range of vision, a microphone plus infrared LED for enhanced night-time vision. The 5" colour monitor delights with a cool design and a brilliant LCD flat screen. Details on pages 96 – 97.

WAECO MagicSpeed MS 900

Choose your own speed

Retrofitted in under one hour: cruise control for vans with comfort CAN bus system and electronic accelerator. Vehicle-specific cable sets make for easy installation. No soldering, no crimping, just plug and play!

Details on pages 132 – 133.

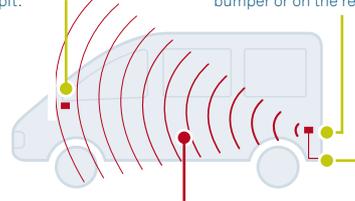

WAECO MagicWatch MW 2500

Wireless parking aid with mounting profiles

Safe parking with just two hours installation time required: the sensors of this parking aid are integrated in mounting profiles which can also be attached to the twin rear doors of a van. No need to lay cables across the length of the vehicle – the signals are transmitted by a radio link! Details on page 129.

The receiver is firmly installed in the vehicle's cockpit.

Easy installation of the two mounting profiles on the rear bumper or on the rear door(s).

Wireless signal transmission from the base unit to the receiver.

WAECO MagicWatch MWE 900

Parking aid for tricky installation conditions

The smallest sensors available make this system so great. With their help it will easily fit in tight spaces. More advantages: variable stop line, PPS Parameter Programming System, certification according to ISO 17386. Details on pages 126 – 127.

WAECO TropiCool TC-21FL

Thermoelectrics for professionals

Cooling performance up to 30°C below ambient temperature, additional heating function, 12/24 and 230 volts as standard. The super-compact 21-litre cooler fits even in tight cabins and can be permanently installed by means of a fixing kit. Details on page 76.

Universal fixing kit for TropiCool series

Mobile climate solutions

Truck roof air conditioners for stationary use

36 – 43

Truck split air conditioner for stationary use

44 – 47

Perfect climate “on the spot”

Rest in comfort – arrive in safety

Sitting in a cool cabin while driving is standard nowadays. During the resting periods, though, many drivers still have to choose between two evils: swelter in an overheated cab, or illegally run the engine. Fortunately, there’s a better alternative: **WAECO CoolAir stationary air conditioners** create perfect conditions for drivers to **have a restful break** and **continue the journey safely and with full concentration**.

The roof air conditioners CoolAir CA800 and CA850S as well as the CoolAir SP900 split system have been specifically designed for stationary operation in trucks – not as a substitute but as a complement to the factory-fitted air conditioner. Taking over where the vehicle A/C has left off, they maintain a pleasant temperature inside the cabin and, what’s more, dehumidify the air. They prevent excessive heat-up during the day, and create an optimal sleeping temperature at night time.

The benefits at a glance

- › **Restful breaks:**
comfortable temperatures, dehumidified air
- › **Less accidents:**
Relaxed drivers are concentrated drivers; effective resting periods prevent nodding off at the wheel.
- › **Reduced fuel consumption:**
engine is not running during the resting periods
- › **Vehicle-specific installation accessories:**
fast and easy installation,
100% clean removal

Which CoolAir air conditioner fits which type of vehicle? It's not merely a matter of taste but depends on the design of the truck you have. The model comparison below makes the decision easy.

WAECO CoolAir CA 800

Truck **roof air conditioner** for stationary operation

WAECO CoolAir CA 850S

Truck **roof air conditioner** for stationary operation

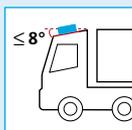

WAECO CoolAir SP 900

Truck **split air conditioner** for stationary operation

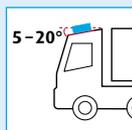

Cools and dehumidifies the air when the engine is turned off | Powered by the vehicle battery
 Hermetically sealed system, maintenance-free | High-performance compressor technology
 Vehicle-specific installation kits and fastening frames for many types of trucks

Suitable for trucks with or without roof window
 ADR-approved (certificate upon request).
 No refitting needed!
 Please note maximum height including CA 800
 Maximum roof pitch: 8°
 Hassle-free removal when vehicle-specific installation kits are used

Cooling capacity 800 watts
 (rated to ISO 5151)

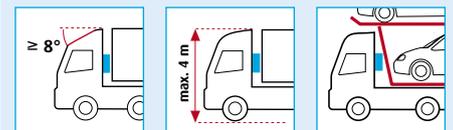

Fitted on the roof
 (in place of a roof window)

For cabins with a front roof pitch of 5 - 20° (Iveco Stralis AS, AS³, AT (high-roof cab))
 For cabins with small roof window (Volvo L2H2 (Globetrotter))
 ADR-approved (certificate upon request).
 No refitting needed!
 Hassle-free removal when vehicle-specific installation kits are used

Cooling capacity 850 watts
 (rated to ISO 5151)

Fitted on the roof
 (in place of a roof window)

Ideal for trucks where a roof-mounted unit would mean exceeding the maximum permissible height
 For trucks with a roof pitch of over 8°
 For trucks with roof-mounted structures (e.g. car transporters)

Cooling capacity 900 watts
 (rated to ISO 5151)

Fitted to the rear wall of the driver's cabin

Customised climate control for every truck

Roof and split air conditioners for all mounting conditions

A compact air conditioner on the roof or a split system on the rear of the cabin – WAECO offers custom-fit stationary climate control solutions for just about every mounting situation, all complete with vehicle-specific installation accessories. **Now, there is even a solution to “special cases”** such as cabins with larger roof pitches or small roof windows: **the new, super-flat roof air conditioner WAECO CoolAir CA 850S.**

All WAECO CoolAir stationary air conditioners feature high-performance, low-maintenance **compressor technology**. They run on power from the 24-volt vehicle battery without straining it. The automatic low-voltage protection ensures hassle-free starting of the engine at all times. CoolAir air conditioners are recirculating air systems and **work with the windows closed**. That keeps the fresh air in – and burglars out.

Superior compressor technology

CoolAir CA 800, CA 850S and SP 900 truck air conditioners owe their performance to the perfect interaction between their compressor and state-of-the-art control electronics. A key advantage over evaporation systems is that compressor powered air conditioners give full performance even at higher air humidity. Yet another difference: they require minimal maintenance. With WAECO compressor air conditioners, there's no need to clean water tanks, and no need to fill up with water either.

Take your pick

Which CoolAir fits which truck?

WAECO CoolAir stationary air conditioners are available in many vehicle-specific versions, for all common types of trucks. The table below tells you which system and which installation accessories will fit your driver's cab.

| Vehicle model | | | CA 800 | CA 850S | SP 900 | Vehicle model | | | CA 800 | CA 850S | SP 900 | |

High performance, minimal maintenance:
Compressor power for a comfortable climate

Works with all windows closed:
no cooling loss, minimal risk of theft

Ease of use –
low strain on the vehicle battery

Tailor-made for Iveco Stralis and Volvo

CoolAir CA 850S for roof mounting

Here's one that works where others won't: the new WAECO CoolAir CA850S takes many a hurdle that had formerly made installation of a roof air conditioner impossible. On Iveco Stralis AS, AS³, AT high-roof cabins it "bridges" the roof pitch with its inclined fitted compressor. The tight roof window in the Volvo L2H2 (Globetrotter) is no problem either for the newcomer to the WAECO CoolAir team. Installation is quick and easy with the vehicle-specific cover frame supplied with each unit.

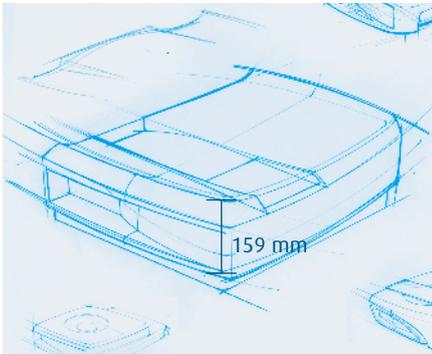

New Design – well proven technology

- › Tailor-made roof air conditioners for Iveco Stralis and Volvo
- › Elegant design – flat and aerodynamic
- › Well proven technology – based on the CoolAir CA800 concept
- › Fast installation, perfect finish with vehicle-specific cover frames

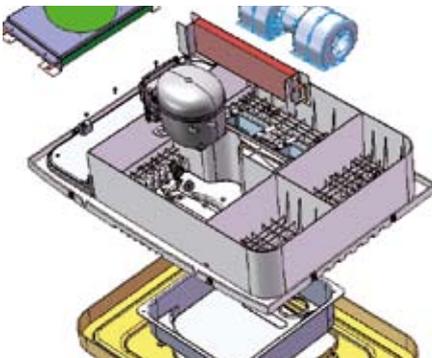

Thought out in every detail

The product advantages of the CoolAir CA 850S

Elegant design

Perfectly done – as if cast from one mould: the flat, streamlined contours of the CoolAir CA 850S blend harmoniously with the aerodynamic design of modern-day truck cabins. Complex components, such as the base support of the compact unit, are injection moulded for stability and an elegant finish. The UV-resistant upper shell can be spray-painted in the vehicle colour. High-grade materials and noble surface textures lend the cabin a contemporary look of unique quality and value.

Well proven WAECO technology

The compressor powered refrigeration system of the CoolAir CA 850S creates a pleasant temperature and simultaneously dehumidifies the air in the cabin. Compared to evaporation systems it offers two key advantages. First, the compressor gives full performance even at higher air humidity. Second, the hermetic system is virtually maintenance-free. The automatic low-voltage protection keeps the battery ready to start the engine.

Fast installation – air conditioner replaces roof window

Insert and connect the unit, fit the cover frame, that's all! Tight roof windows or front roof pitches of 5 – 20° are no problem whatsoever. Many design based arguments against fitting a roof air conditioner are now resolved. The CoolAir CA 850S offers a tailor-made solution – including a vehicle-specific cover frame. During installation the vehicle's existing fastening points are used, there's no need to drill new holes – a typical CoolAir advantage that cuts installation times and allows spotless removal.

Perfect looks – ease of use

Bespoke work: the custom-fit cover frame of the CoolAir CA 850S flows seamlessly into the roof lining, very much like a factory-fitted original. The four air nozzles are easy to adjust – by touching a button on the self-explanatory operating panel, or conveniently from the driver's bed using the remote control supplied as standard with each WAECO CoolAir stationary air conditioner.

WAECO CoolAir CA

New: roof A/C specials

- › For cabins with a front roof pitch of 5 – 20° or a smaller roof window
- › Outstanding cooling performance
- › **ADR-approved (certificate upon request). No refitting needed!**
- › Operation with the windows closed – no cooling loss, minimised risk of theft
- › Hygienic, hermetically sealed system – no need to fill up with water or refrigerant
- › Vehicle-specific cover frame as standard

Custom-fit roof air conditioners

CoolAir CA 850S for Iveco Stralis and Volvo

Sloped cabin roof? Tight roof window? – No hurdles whatsoever with the CoolAir CA 850S! WAECO's new roof air conditioner is available in various versions to fit specific vehicles: Iveco Stralis AS, AS³, AT (high-roof cab) as well as Volvo L2H2 (Globetrotter).

Top in technology and design

CoolAir CA 800 for roof mounting

A great success right from the start. More and more truckers opt for this smart compressor roof air conditioner to enjoy perfect climate conditions in the cabin while stationary. The ADR-compliant unit is available in white and silver finish. Installation is quick and easy with the vehicle-specific installation kits.

Plus factor: fast and hassle-free installation

Preparation:
removal of the existing roof window

Fits like a custom-made unit:
the CA 800 replaces the roof window

Use existing mounting holes
when fitting the new roof air conditioner

Ease of use: touch-button climate control

A touch of a button on the self-explanatory operating panel is enough to set the temperature and fan stage.

A comfortable climate by remote control –
at perfect ease from the driver's bed!

Gentle or powerful – the air flow from
four individually adjustable nozzles

Perfect installation results

Vehicle-specific and universal installation kits

A neat finish, inside and out. Fitting this compact, self-contained roof air conditioner requires little time and effort thanks to the vehicle-specific installation kits we offer for many common types of trucks. Everything has been designed to fit the vehicle, existing mounting holes are used, the cover plate blends harmoniously with the roof lining.

Just so that nobody has to go without the CA800, the range also includes three **universal installation kits** – for vehicles with and without roof opening, for bracket or screw mounting.

Universal installation kits for trucks with or without roof window

Naturally, other utility vehicles (e.g. older trucks) can be equipped with the CA 800 as well. Three universal installation kits are available to this end.

For trucks with a roof window, use the CA-EK-UNI1 (bracket mounting) or the CA-EK-UNI3 (screw mounting). Handy detail: the compensation plate of the CA-EK-UNI3 installation kit has the same hole pattern as that used for fastening of most commonly used roof windows.

If an opening must be cut to accommodate the air conditioner, the CA-EK-UNI2 installation kit is the right choice. All installation kits come with ample material to allow for perfect adaptation to the roof lining.

CA-EK-UNI1 for
vehicles with roof window

CA-EK-UNI2 for
vehicles without factory-fitted roof window

CA-EK-UNI3 for
trucks of the following makes: MB, MAN, Renault, Volvo (not L2H2)

Do you have any questions as to the technology of the CoolAir CA 800 or the installation options available? Our team of technical experts are always there for you, ready to find answers to your problems and provide extensive product information.

Split air conditioner for rear wall mounting

- › Outstanding cooling performance
- › Pleasant temperature and dehumidified air
- › Operation with the windows closed – no cooling loss, minimised risk of theft
- › Hygienic, hermetically sealed system – no need to fill up with water or refrigerant

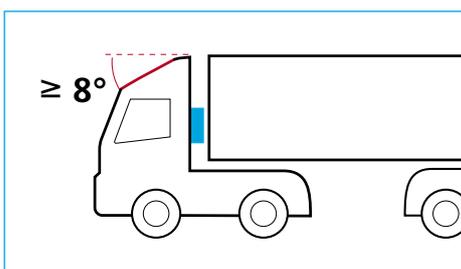

A pleasant climate to suit all needs

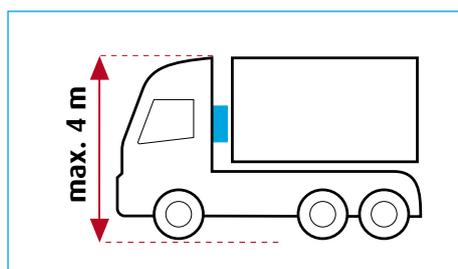

Split components – fitted in a trice

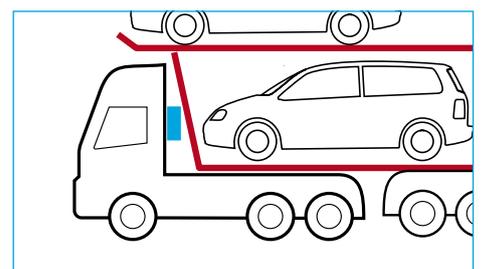

The CoolAir SP 900 consists of two separate components to be fitted to the rear wall of the cab – the condenser outside, the evaporator inside. To speed up installation the system comes with a factory-precharged refrigerant circuit as well as with optional fastening frames for the condenser unit.

The SP 900 split system is ideal for trucks with a roof pitch of over 8° ...

... for trucks where a roof-mounted unit would mean exceeding the maximum permissible height ...

... for trucks with roof-mounted structures (e.g. car transporters)

WAECO CoolAir SP 900

Split air conditioner for rear wall mounting on trucks, 24-volt stationary air conditioning (mobile use possible)

Fast and easy installation of the condenser unit with vehicle-specific fastening frame

WAECO offers vehicle-specific fastening frames for most common types of trucks. For the complete range please visit www.dometic-waeco.com

Installation in record time

Vehicle-specific fastening frames for WAECO CoolAir SP900

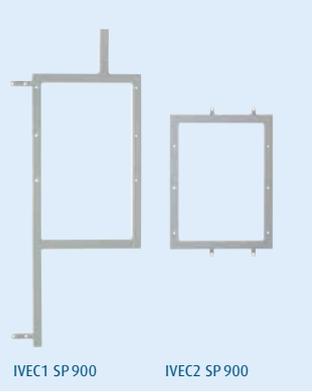

A typical WAECO CoolAir benefit: when fitting the SP900 split system existing fastening points are used. In our case the mounting holes and bolts on the outside rear of the cabin. The fastening frame for the condenser unit perfectly matches the fastening pattern of the respective vehicle. The obvious advantages are: speedy installation, perfect finish, hassle-free dismantling and less drill holes. Naturally, the condenser can also be fitted without a fastening frame.

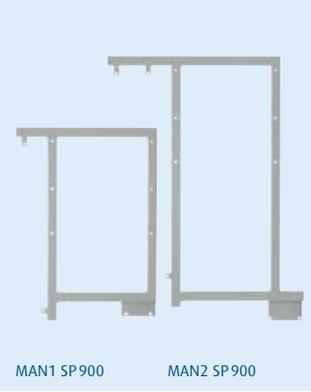

Extra bonus: unlike common practice with split air conditioners, the CoolAir SP900 is supplied with a factory-precharged refrigerant circuit. That means one step less to do, installation is accomplished in record time.

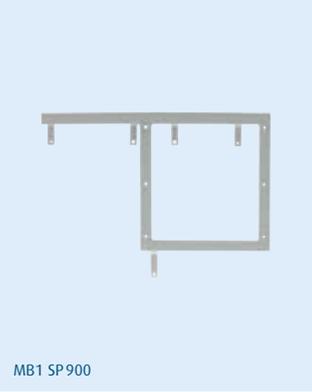

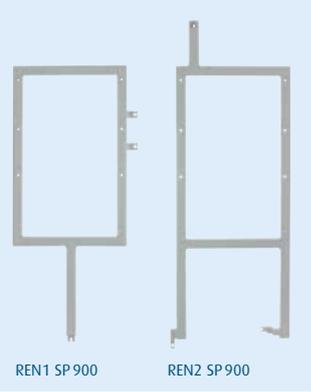

Quickly done: installation and connection of the condenser unit. The condenser fastening frame uses the vehicle's existing fastening points.

Compressor cooling

Powerful and durable

Even at extreme outside temperatures

Excellent cooling performance regardless of the ambient temperature, versatile use – these are the distinguishing features of a compressor cooler. Choose from a large and well-proven range that leaves nothing to be desired.

It extends from a drawer fridge for your storage compartment to vehicle-specific heavy-duty refrigerators, from a slim entry-level model to our high-tech coolers – all designed for mobile use and just as powerful as your fridge at home.

| **Most powerful and most durable cooling** in mobile and stationary use

| **Excellent cooling performance** even at extreme ambient temperatures

| **Suitable for deep-freezing**

| **Energy saving and superbly quiet operation**

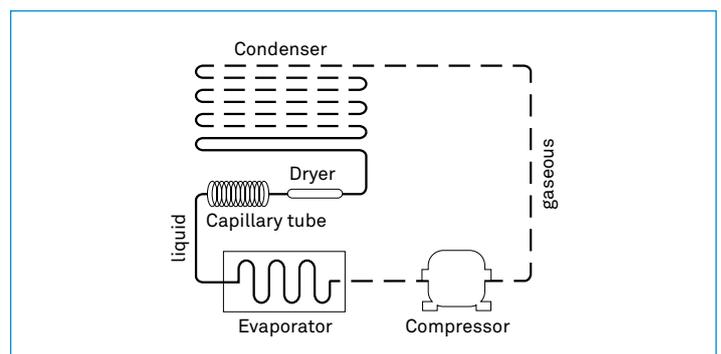

| **Impeccable operation in inclined position**

| **Suitable for operation with a solar panel**

Compressor technology

Compressor cooling appliances work with a CFC-free refrigerant that changes from liquid to gas as it flows through the evaporator. In the process the evaporator extracts heat from the refrigeration compartment – it's getting cold. The compressor draws in the gaseous refrigerant, compresses it and passes it on to the condenser. Here, the absorbed heat is released to the atmosphere. The refrigerant changes to the original liquid state and flows back to the evaporator, where the cycle starts again.

- | **Excellent cooling performance even at extreme outside temperatures**
- | **Minimal power consumption**
- | **Refrigeration and deep-freezing (CoolFreeze and CoolMatic CS-SC series)**
- | **Problem-free operation with 12/24 volts; CoolFreeze CF series also with 100 – 240 volts**
- | **Integrated battery protection (CoolFreeze series)**
- | **Ideal for solar operation (CoolFreeze series)**

... easy to retrofit!

Heavy-duty champion: this **50-litre refrigerator** really can take a lot! High-quality materials and perfect workmanship make the **CoolMatic RHD-50** fit for extreme demands.

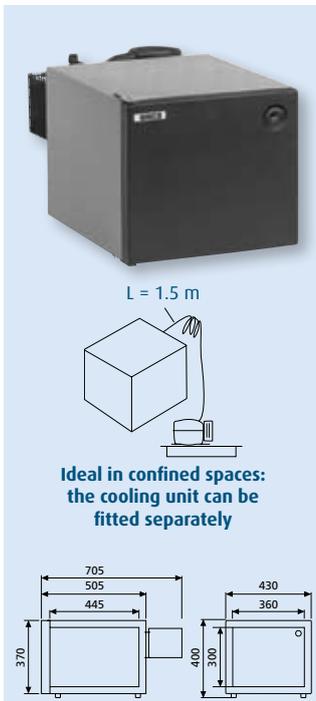

This fridge was designed for **permanent fitting**. A textbook example is the **Volvo FH**, where the RHD-50 slots seamlessly into the **exterior storage compartment**. Installation is safe and simple with the **custom-made mounting plate**.

WAECO CoolMatic RHD-50

Vehicle-specific compressor refrigerator for permanent fitting

Actros!**

Cool convenience in Actros 2 and 3

Compressor drawer fridge for Mercedes-Benz

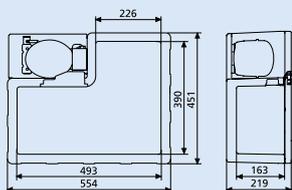

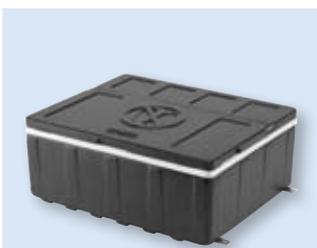

This **custom-made compressor cooler for Actros 2 and 3** works quietly and inconspicuously in the background. More specifically speaking, its place is in the drawer under the driver's bed (L cabin or Megaspaces cabin) – within convenient reach for the driver and the passenger. When you open its lid, the **integrated lighting** reveals an inviting, roomy interior with a generous **capacity of 25 litres**.

Its performance leaves nothing to be desired either. **Top cooling performance from +10°C to 0°C** regardless of the ambient temperature and **minimal power consumption** qualify the CoolMatic CS-MP2 as a typical compressor cooler which is quick and easy to install. Exclusively available from Dometic WAECO.

Home-like cooling comfort

Cooler / freezer combo for Scania R

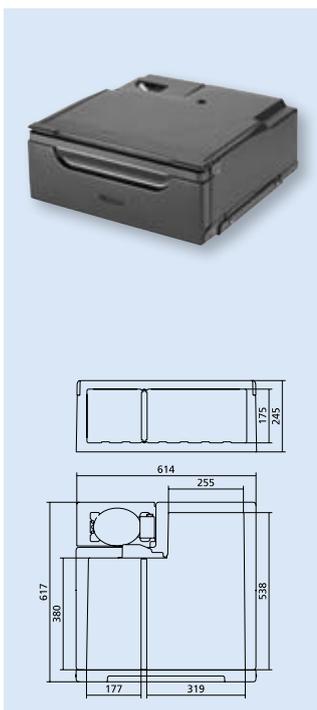

26 litres for refrigeration, 11 litres for deep-freezing up to -12°C, regardless of the ambient temperature and at minimal power consumption. All this in a drawer with two separate sections, easily accessible from either seat. Particularly welcome at night time: **the LED interior light**.

This custom-made cooler/freezer combo provides **Scania R** drivers with home-like cooling comfort. Most likely, it will make them gladly part with the storage drawer under the bed. The conversion is quick and easy: release four screws, detach the storage compartment and replace it by the CoolMatic CS-SC. Exclusively available from Dometic WAECO.

Cold storage in the Iveco Stralis

Below the bed and between the seats

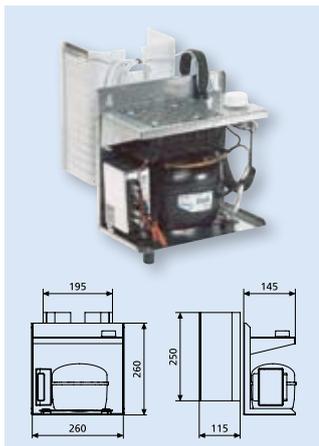

Fresh ideas for Iveco Stralis: the square **CoolFreeze FT-30** is a perfect fit for the storage compartment below the bed. It offers **30 litres capacity for refrigerated or frozen food**. The **ColdMachine CS-IV compressor cooling unit** offers a cost-efficient way of converting the storage box between the seats into a fridge. Our tip: use the FT-30 as a freezer – and the cooling compartment in the cab for a quick refreshment during the drive.

WAECO ColdMachine CS-IV

Vehicle-specific compressor cooling unit for Iveco Stralis

4.07

Well-proven square shape

Fits neatly into the storage compartment of the Iveco Stralis

Space-saving trucker boxes

“Side entrance” saves space. Most truck cabins are just large enough to accommodate a cooler. Opening the unit, though, is often a problem. This is where our **CoolFreeze FC-30 and FC-40** trucker boxes come in. Their lid folds up sideways, it can also be detached. Compact outside, they offer a **generous 30- or 37-litre capacity for chilled and frozen food**. There’s even room for tall 2-litre bottles stored upright.

Both models can be supplied with a **comprehensive range of accessories**: high-quality insulating protective covers, a wire basket to organise the contents (supplied as standard for the FC-40), fixing kits for a firm hold on the move.

Compressor technology at a refreshing price

High-performance trucker fridges

Quality and performance don't have to be expensive – WAECO CoolFreeze CDF series coolers are the best proof. Their robust housing, powerful cooling performance and ingenious functionality make them perfect companions for truck and van drivers.

In response to the tremendous demand we have increased the number of models to five. **Capacities range from 10.5 to 39 litres – so now there's a matching cooler for every demand.**

The new CoolFreeze CDF-11 weighs a mere 8.8 kilograms and is a super-quiet performer. Compact in size it fits into the smallest space with ease – even in cramped truck cabins where it can be placed between the two front

seats. It is the smallest cooler in the CDF range, but it already offers some handy details, including two practical drinks holders in front of the fold-up lid.

The CDF-18, too, is a genuine lightweight – and convenient to carry with the fold-out handle. The well proven CDF-25, in turn, excels for its extremely low energy consumption. When capacity counts, the CDF-35 or CDF-45 are the best choice, which provide 31 or 39 litres volume for food and drinks.

All CoolFreeze coolers are suitable for deep-freezing and can be firmly fitted in the vehicle by various means.

CoolFreeze CDF-11
approx. 10.5 litres

CoolFreeze CDF-18
approx. 18 litres

CoolFreeze CDF-25
approx. 23 litres

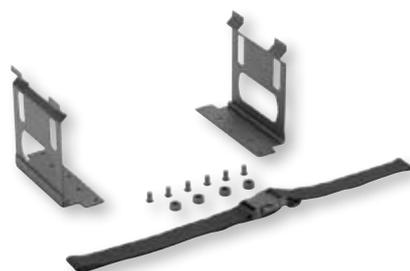

CoolFreeze CDF-45
approx. 39 litres

CoolFreeze CDF-35
approx. 31 litres

One family – many benefits

- › Top performance with low energy consumption
- › Refrigeration and deep-freezing up to -18°C (CDF-11 / -18 / -25) or up to -15°C (CDF-35 / -45)
- › 230-volt operation with low-priced mains adapter (p. 80 – 81)
- › High-performance compressor technology
- › 12 / 24-volt connection as standard
- › Suitable for solar operation
- › Superbly quiet running
- › Accessory for CDF-25 / -35 / -45: Universal fixing kit (p. 69)

Recommendable accessory for CoolFreeze CDF-series coolers

For a secure hold in the vehicle:
Universal fixing kit (p. 69)

So small, so cool!

Great technology in a compact size

23.5 cm wide, barely larger than a sheet of paper: **the deep-freeze capable WAECO CoolFreeze CDF-11 is a small technical miracle.** Fully fledged compressor technology in a space this small – it sounds incredible. WAECO made it happen. The CDF-11 fits into gaps and compartments, even in tight cabins. **10.5 litres capacity, cooling and deep-freezing up to -18°C**, also at high ambient temperatures. Lightweight at just 8.8 kg and easy to carry with the shoulder strap.

Display with digital temperature readout

Connection cable for 12/24 volts DC, battery monitor (can be switched off)

Enough space for a day's provisions, an extra compartment for bits and pieces

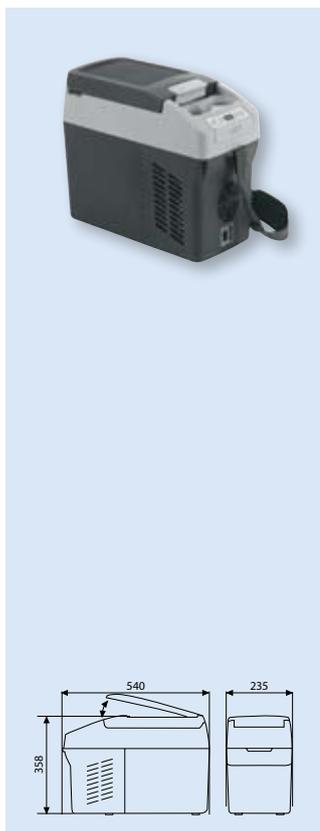

Two practical drinks holders, convenient one-hand operation

WAECO CoolFreeze CDF-11

Portable compressor cooler for refrigeration and deep-freezing

Premium boxes for all applications

High-tech unlimited

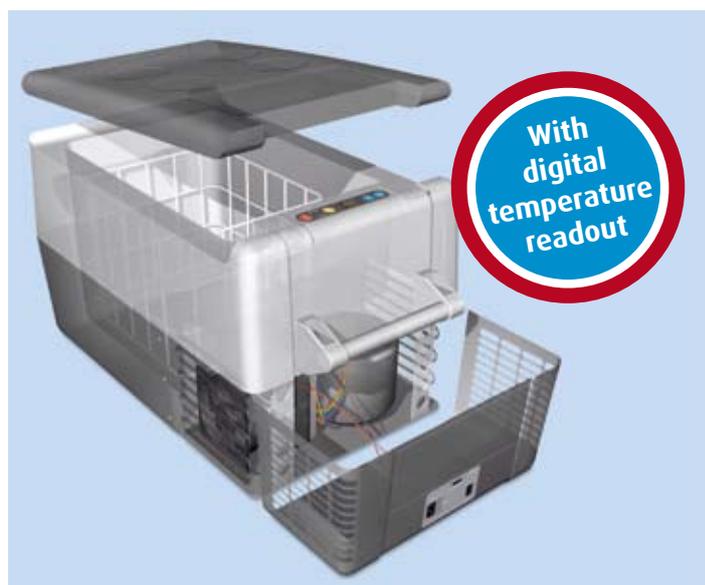

CoolFreeze CF series coolers can be operated on almost any mains network in the world. Whether 12, 24, 100 or 240 volts – the integrated power supply unit recognises each voltage and adjusts itself accordingly.

CF appliances feature optimised dimensions and are easy to transport. Their **generous capacity** makes them ideal for use in trucks and motorhomes as well as on boats or yachts.

Danfoss BDF compressors ensure **extraordinary performance** for both **normal refrigeration and deep-freezing**, minimal energy consumption, compatibility with solar units, and superbly silent running. The **CF special electronics system with soft-start feature, turbo cooler and digital temperature readout** adds a new dimension in performance and operating comfort. Turbo power with economy – available in all CoolFreeze appliances of series CF-35 to CF-50!

Perfect down to the last detail – product benefits of the CoolFreeze CF series

- › **High quality materials**
Injection-moulded cabinets and housings; all materials CFC-free
- › **Perfect workmanship**
Optimal functionality, long service life
- › **Cooling technology at its best**
Danfoss BDF compressors; integrated voltage monitor
- › **Universal power supply**
12 / 24 volts DC and 100–240 volts AC; suitable for solar operation
- › **Comfort and convenience**
Ergonomically shaped recessed grips; sturdy carrying handles, well-organised interior
- › **Extras available as standard**
Interior light
- › **Wide choice of accessories**
Universal fixing kit (p. 69)
Fridge slides (p. 69)

CF special electronics with digital temperature readout, soft start and turbo cooler

Turbo power with economy. The CF special electronics system gives the compressor a soft and power-saving start at 2500 rpm. If the preset temperature is not reached within a short period of time or a temperature below -12°C has been set, the turbo cooler switches on automatically to boost the compressor speed. As soon as a preset temperature up to -12°C is reached, the system switches back to economy mode (unless a temperature below -12°C has been set). **The result: fast yet economical cooling from $+10^{\circ}\text{C}$ to -18°C .**

- › Intelligent, automatic turbo cooler
- › 3-stage battery protection to be set on the digital display
- › 4-digit display
- › Display readout in Celsius or Fahrenheit
- › Free temperature setting on the display
- › Display of current interior temperature
- › Status and error indication by 2 separate LEDs
- › Memory function saves the last settings

CoolFreeze on board – all safe and secure

Big or small truck, van or estate car – CoolFreeze coolers will find a home in any vehicle. WAECO accessories make sure they are safe and secure, and within easy reach when you need them. In larger trucks the cooler can be housed in the outside storage compartment. It's more handy to have it right in the cab for convenient access while driving – e.g. on the floor between the two seats, safely fastened with the UFK-C universal fixing kit (p. 69).

Ease of access, double secure: front slide-out with sturdy frame construction and fastening strap

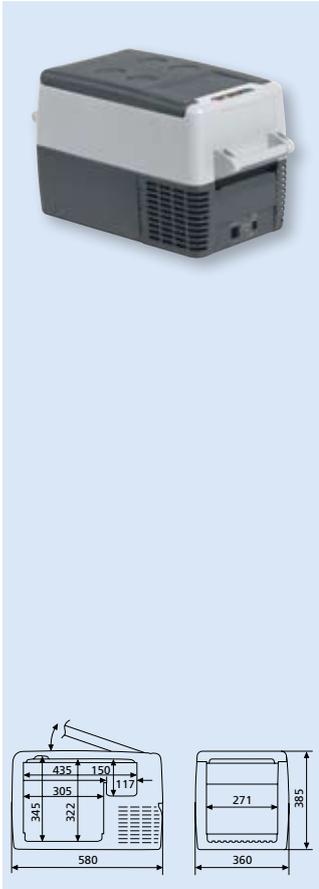

Smaller truck cabins have room for a slim CoolFreeze model behind the seats. Simply push the cooler between the seat and the rear wall, or use the fixing kit for extra safety. WAECO fridge slides (p. 69) give you the double benefit of a firm hold and convenient (front or side) slide-out access. **Ideal for vans with racks** mounted in the cargo compartment: use a fridge slide to fasten your cooler and simply pull out to open.

Super-safe and steady as a rock: cooler fastened between the seats with fixing kit

WAECO CoolFreeze CF-35

Compressor cooler for refrigeration and deep-freezing with CF special electronics

| | |
|-----------------------------|---|
| Gross capacity | approx. 31 litres (26.5 l for refrigeration / deep-freezing, 4.5 l for fresh food) |

12 / 24 volts DC and 100–240 volts AC

Fridge slides and fixing kit as accessories (p. 69)

CF special electronics with soft start and turbo cooler

Convenient slide-out access to your cooler

CoolFreeze fridge slides

There's enough space below the shelf to accommodate a cooler, but no space to open it? **Using a WAECO fridge slide you can convert this vacant niche into a handy cooling compartment.** A gentle tug is enough to make your CoolFreeze cooler slide out on smoothly balanced roller bearings. Moving it back into a tilt- and slip-proof position for safe travelling is just as simple and elegant.

- › Convenient loading and unloading of WAECO CoolFreeze coolers CF-35 / CF-40 / CF-50
- › A secure hold in the vehicle: sturdy frame construction and tie-down straps
- › Available in side or front slide-out versions

Smoothly balanced bearings for convenient handling

Sturdy frame construction (maximum load 50 kg)

Side or front slide-out access

WAECO slides are available in two different versions. Choose the side or front slide-out, depending on the type of storage compartment you wish to use. Both versions are equally safe and sturdy, of course. Even 50-kg coolers are no problem for WAECO slides!

Click before you drive!

Even sharp bends and sudden stops leave your cooler unaffected – and firmly in place. The sturdy frame construction provides a secure hold. For extra safety, the cooler is tied down with two straps that are delivered as standard.

Pick what fits your storage space

Fridge slides with front or side slide-out + universal fixing kit

Fridge slides, long and wide version

For and secure hold in the vehicle

Thermoelectrics

Lightweight, versatile, resistant to wear and tear

Low-cost coolers for private and professional use

Thanks to their low weight, thermoelectric coolers are particularly easy to carry and transport. WAECO coolers offer the extra benefit of a 12/24-volt connection, so they can be used both in your car and in your truck. Their astonishing cooling capacity up to 30°C below the ambient temperature is more than sufficient for most purposes.

Thermoelectrics offer an added bonus: most coolers equipped with this technology can be used for both **cooling and heating**. This goes for CoolFun and TropiCool appliances as well as for the MyFridge bottle cooler.

Price breakers!

Great value for little money: CoolFun coolers are compact outside and spacious inside with room to store tall beverage bottles upright. Cooling and heating function, 12/24-volt connection.

A drink within reach

Thermoelectric bottle cooler for permanent installation next to the driver's seat. Fits bottles up to 1.5 litres.

Convenient high-tech coolers

Pages 74 – 77

WAECO TropiCool coolers provide powerful cooling – up to 30°C below ambient temperature – and many features for enhanced comfort and convenience. TC special electronics with soft-touch operating panel and power-save mode. 12/24/230-volt connection as standard.

WAECO TropiCool

TropiCool TC-14FL

TropiCool TC-21FL

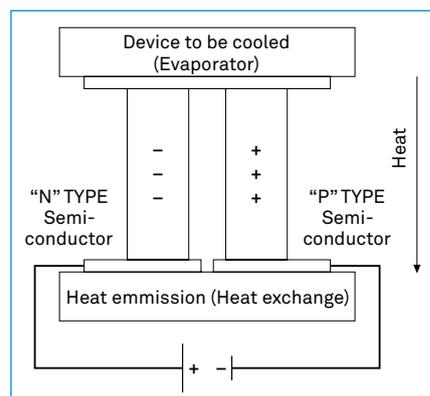

TropiCool TC-35FL

Thermoelectrics

The thermoelectric principle was discovered in 1834 by J. C. A. Peltier. Hence, the temperature generating parts of thermoelectric systems are referred to as Peltier elements. Thermoelectrics are based on the fact that cold or heat energy is generated when the connection between different types of metals is linked to a DC power source. The heating or cooling capacity is further enhanced by heat exchangers and air fans. It is perfectly sufficient for small and medium-sized coolers.

- | Ready for operation with 12/24 volts DC; TropiCool coolers also with 230 volts AC
- | Cooling performance up to 30°C below the ambient temperature (depending on the size and design of the appliance)
- | Can be used for cooling and keeping food warm
- | Impeccable operation in inclined position
- | Low weight, convenient to transport
- | Wear-resistant and maintenance-free
- | Low investment cost

CoolFun CR-18
approx. 18 litres

CoolFun CR-28
approx. 28 litres

Thermoelectrics at an entry-level price

Universal coolers for private and professional use

Cools, heats and saves money! The entry-level price boxes CoolFun CR-18 and CR-28 provide everything you'd expect from a thermoelectric cooler:

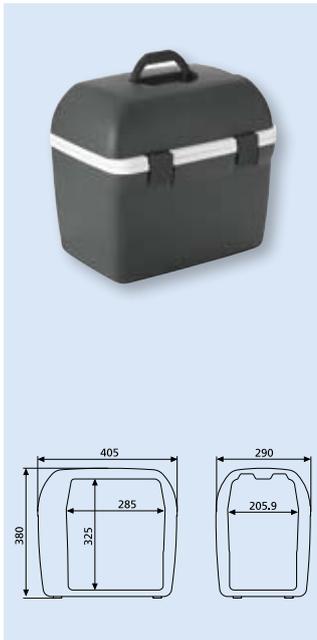

- › Reliable refrigeration up to 20°C below ambient temperature
- › Additional heating function (up to +65°C)
- › A sturdy housing
- › Wear-free technology
- › Ample space for your provisions (e. g. for 1.5-litre or even 2-litre bottles standing upright)
- › Flexible energy supply: 12/24 volts DC
- › For a secure hold in the vehicle: fixing kit available as optional extra (for CR-28)

Buy our "entry-level price boxes" and save twice. The first bonus: you can use these coolers both in your truck and in your car. And the second bonus: when you buy the CR-28, you will get two units for the price of one – a chest cooler and an upright fridge.

Top performance: thermoelectrics for professionals

12 / 24 volts DC and 230 volts AC as standard

WAECO has made history in the field of thermoelectric refrigeration – that's what the experts say about the popular TropiCool series. With an impressive cooling performance **up to 30°C below the ambient temperature**, TropiCool coolers already come up to compressor cooling standards! The compact appliances are convenient to transport and provide many high-tech features for enhanced user comfort. Just one example is the intelligent TC special electronics system with **seven-stage temperature regulation in the cooling and in the heating mode**. Operation is safe and simple with the soft-touch membrane keypad, which also protects the electronics from dust and moisture. Good for truckers: **TropiCool coolers are ready for connection to 12 / 24 volts DC and 230 volts AC**. So they can be used simply everywhere – in the truck, in the car and at home on the mains socket.

Perfect down to the last detail – product benefits of the TropiCool series

- › **Highly effective insulation**
Outstanding energy efficiency
- › **Dynamic interior ventilation**
Significantly improved cooling performance
- › **Wear-free fans**
Long service life
- › **Intelligent energy-saving circuit**
Electronics switch automatically to power-save mode once the desired interior temperature has been reached
- › **12 / 24 / 230 volts as standard**
With priority circuit for 230 volts
- › **Heat exchanger and high-performance Peltier element**
Cooling performance up to 30°C below ambient temperature!
- › **Magnetic switch**
Switches the interior fan off when you open the cooler
- › **Universal fixing kit**
for TC-14FL, TC-21FL and TC-35FL (p. 77)

TC special electronics with soft-touch operating panel

Intelligent energy management. TropiCool coolers are great energy savers. Once the desired temperature has been reached, they switch automatically to the “power-save” mode. In this mode the Peltier element uses very little power. This gives rise to an insulation bridge that prevents heat from flowing into the cooling compartment.

- › Cooling up to 30°C below ambient temperature
- › Heating up to +65°C
- › 7-stage temperature regulation for cooling and heating
- › LED temperature readout
- › Memory function saves the last settings
- › Membrane keypad protects the electronics from dust and moisture

Universal fastening kit – keep on the safe side with your TropiCool cooler

In case of an emergency stop, a cooler filled to the brim may turn into a dangerous weapon in the driver’s cabin. To be on the safe side, use the UFK-T universal fixing kit (p. 77).

This safety accessory gives tilt- and slip-proof fastening to your TropiCool cooler on the middle console between the driver and passenger seats. Two sturdy metal plates screw-connected to the base and two belts adjustable in length

provide a tight hold in any traffic situation. Of course you can also store your TropiCool cooler behind the driver’s seat or stow it in front of the passenger’s seat. If you do, make sure that tilting and slipping are prevented. We advise you to opt for safety, though. The UFK-T universal fixing kit matches the TropiCool models TC-14FL, TC-21FL and TC-35FL. Just order the safety kit along with your cooler!

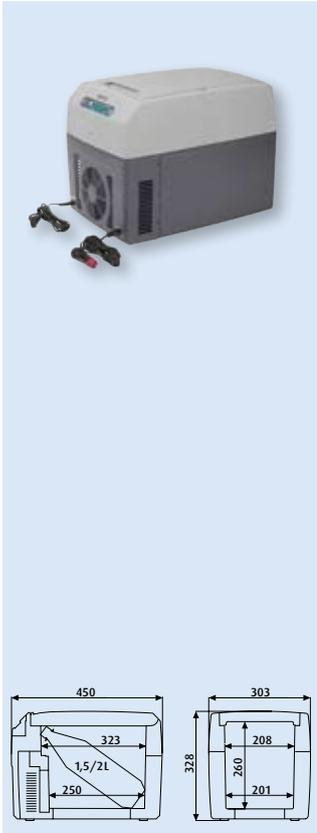

Safe and convenient handling: just get in, push the cooler into the fixing kit, and tighten it up!
Two metal plates and two safety belts keep a tight “grip” on the TropiCool cooler during the journey.

Formidable thermoelectrics

Ample capacity for long journeys

Where its many fans among truck and van drivers are concerned, it is simply "the greatest". And in the WAECO thermoelectrics range as well. At 35 litres capacity the TropiCool easily copes with the sustenance for extensive day trips or several days away. And keeps it all cool and fresh – up to 30°C below the ambient temperature, truly exceptional for a thermoelectric cooler of this calibre. But that's not the end of it: if required, the TC-35FL can even serve as a heater ...

It's WAECO's thirst-quenching concept: thanks to the MyFridge bottle cooler there's always a cool drink at hand. Whatever you fancy – water, coke, lemonade or fruit juice – the compact cooler keeps 1 to 1.5 litres of your favourite drink up to 22°C below the ambient temperature. And it will even heat if required (up to +60°C)!

Thirst-quenching convenience

WAECO MyFridge bottle cooler

Drinks holder with active cooling

On long trips it is particularly important that you stay hydrated. Entrust your drink to the **MyFridge bottle cooler** and **position it close to hand** next to the driver's seat. And **firmlly fasten it** there, for safety's sake. It's up to you whether you use the screw connection delivered with each unit, or whether you treat yourself to the product-specific fixing kit. The thermoelectric bottle cooler is connected to the on-board socket and works on either **12 or 24 volts**. The aluminium container inside conducts heat or cold very quickly. It perfectly accommodates 1.5-litre as well as smaller 1-litre bottles.

For a secure hold

Using the WAECO fixing kit you can fasten your MyFridge MF-1F bottle cooler quickly and safely. Just order it along with your cooler!

Electronic accessories for cooling appliances

Small products – great effect

The products in the **WAECO CoolPower range** may be not very spectacular to look at, but they will help you enjoy the possibilities of mobile cooling to the full. And that is exactly our intention. **Regardless of whether you've got a thermoelectric or compressor powered cooler, you will be able to use it anytime and anywhere, on different on-board systems and with mains systems around the globe.** With CoolPower accessories you can, for example, operate your 12 / 24-volt compressor cooler at home or in the hotel. You will also find a low-priced battery monitor for your thermoelectric cooler.

Mains adapter for thermoelectric coolers

How do you run a 12-volt thermoelectric cooler from the 230-volt mains? The answer is simple: with a **WAECO CoolPower EPS 817** mains adapter.

Mains adapter for compressor coolers

Your compressor has no mains connection, but you'd like to run the appliance in the hotel, in your weekend cottage or at the campsite? No problem whatsoever. All you have to do is add the **WAECO CoolPower EPS 100** mains adapter, it will work a treat!

Voltage monitor for thermoelectric coolers

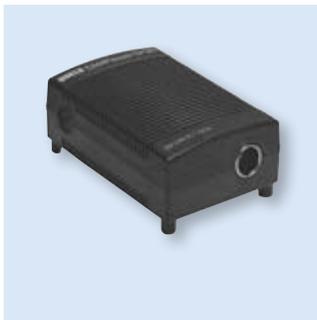

What happens if you forget to disconnect the cooler when you park? Don't worry, the **WAECO CoolPower M50U** voltage monitor protects the vehicle battery from excessive discharging. When the battery voltage drops, it switches the cooler off – and back on again when the voltage returns to normal.

WAECO CoolPower EPS 817

Mains adapter for connection of thermoelectric 12-volt coolers to the 230-volt mains. Ideal for use at home, in hotels, at campsites, in holiday homes, etc.

360°
vision for
pros

Mobile safety solutions for trucks and vans

As a professional driver you generally have no problems manœuvring your vehicle in tight spaces. Nevertheless there are certain situations when an extra pair of eyes would be invaluable. For example when reversing towards an unfamiliar loading ramp or when pedestrians and cyclists “disappear” into the blind spot when you are turning right.

A WAECO PerfectView reversing video system takes the stress out of manœuvring. As soon as you put the vehicle into reverse the camera starts relaying live pictures of what is happening behind you to the dashboard monitor. If you want it can even transmit sound from outside into the cab.

What is more, the PerfectView range does not just offer solutions that let you see what is happening behind you. It also gives you the option of 360° vision. Cameras to the front and back and on both sides or even inside, CRT or LCD monitors with varying features and functions, complete systems and individual components, standard and heavy duty ... WAECO PerfectView offers a professional solution to every situation. It's an investment you won't regret: it pays for itself with the first collision it helps you avoid.

CRT reversing video systems

Robust, reliable, tried and tested a hundred thousand of times – for over ten years now: PerfectView CRT reversing video systems give you big performance at a small price!

LCD reversing video systems

Advanced technology, safety in line with current standards. Take your pick from a wide range of products extending from inexpensive entry-level systems to high-end models for ultimate demands.

WAECO PerfectView CRT Pages 86 – 95

PerfectView CRT580

WAECO PerfectView RVS Pages 96 – 107

PerfectView RVS 550

Cameras for navigation systems

The easiest way to turn your navigation device into a fully-fledged reversing video system: complete camera sets, installation fittings included. For all common permanently fitted navigation systems.

LCD front camera system

Better than a front mirror, approved according to the 2003/97/EC mirror directive of the European Union. Easy to upgrade into a reversing video system – simply add a second camera.

PerfectView FVS 740X

Heavy-duty reversing video system components

Vibration, impact, moisture, dust – these and other tough conditions call for our PerfectView heavy-duty components. Put together your own customised system!

WAECO PerfectView Pages 112 – 117

PerfectView M59L

Professional “perfect view” solutions

Ready-to-install systems for every demand

You’d like to equip a vehicle without trailer with a reversing video system? Then you should opt for one of our complete systems. Camera, monitor, cabling – all components are perfectly coordinated, all you need is included.

WAECO PerfectView reversing video systems can be activated either manually or automatically by reverse gear. They work reliably even at temperatures well below zero. All monitors feature the practical mirror function. This means the camera picture can be mirrored upon pressing a button to give you the familiar rear view mirror view.

CRT tube monitor or LCD flat screen? Entry-level or professional system? **The table on the right gives you an overview of six complete PerfectView systems. Each system is explained in detail on the following pages.** Pick the one to suit your needs – and add what you like, e.g. a camera with motor-operated shutter, LED or other useful features.

Our highlights this year: four new LCD complete systems, which offer three goodies for your convenience:

- › 5" or 7" colour monitor
- › Robust, compact LED colour camera, also with shutter
- › An extra output with separate control for connection of a second camera (e.g. a front camera)

For trailers and tractor-trailers we offer matching cable kits that speed up installation (p. 94 / 95).

Bound to impress you: the features of the new PerfectView monitor generation

Easylink monitor mount:
Docking station for theft prevention

Illuminated keys

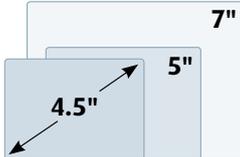

USB port for charging MP3 players and the like

Lockable plug-in connectors

WAECO PerfectView CRT

Safe manœuvring at an entry-level price

Proven basic system – with compact ball camera

The WAECO **PerfectView CRT 245** reversing video system offers all the essential basic functions as well as an outstanding **cost/benefit ratio**. Safe and convenient manœuvring at a price that won't hurt your budget – an ideal combination.

The tried and tested basic system combines the **sturdy b/w CRT monitor M 45R** with the **super-compact ball**

camera PerfectView CAM 10. Featuring LED technology this camera delivers crystal-clear pictures, even in complete darkness. Its cabinet complies with IP 68 standards – which means it is dust- and water-tight and thus fit for use in tough work environments.

Ready for connection to **12 / 24 volts**.

CRT 245 is suitable for:

WAECO PerfectView CRT 245

Reversing video system with 4.5" CRT monitor and b/w ball camera
Basic system with all standard functions

Compact ball camera with LED

Safety for truckers' everyday routine

Tried and tested system with motor-operated camera shutter

Unbeatable in the category of CRT reversing video systems, the CRT580 offers a variety of safety features that soon pay off in heavy-duty service: the **motor-operated camera shutter** protects the lens from dirt and damage during the drive – and gives you a clear view of the rear at any time.

The new, compact b/w camera convinces with an **extra-large picture angle of 145°** and a 1/3" SONY CCD picture sensor. The infrared LEDs for enhanced night-time vision are fitted in a separate window, which avoids reflection.

The temperature controlled heater prevents condensation build-up inside the camera and ensures fast image display on the screen when temperatures are low.

PerfectView CRT 580 is ready for connection to **12 / 24 volts**.

PerfectView Accessories – cable kits

The right solution for each type of truck: WAECO offers ready-to-install cable kits for the two most common towing systems, truck/trailer or tractor/trailer. **A fast way to improve safety!** See pages 94 and 95 for details.

CRT 580 is suitable for:

WAECO PerfectView CRT 580

Reversing video system with 5" CRT monitor and b/w shutter camera

Successor of the tried and tested CRT 100 system. Camera with motor-operated shutter and heated electronics

■ **5" b/w CRT monitor M50R1**

The LCD class – at affordable entry-level prices

5" colour system with LED night-vision support

Calling this product an LCD entry-level system is pure understatement from a technical point of view. As one would expect from a WAECO system, it combines **outstanding features and functions with excellent quality and state-of-the-art technology**. All of this at an incredibly favourable price.

The new and compact PerfectView CAM50C **colour camera** comes **with a high-quality SONY picture sensor** and features **120° wide angle vision, infrared LEDs, a temperature controlled heater, a microphone and concealed cable routing**. The integrated microphone

can be used to give instructions to the driver from the outside – audible to the driver via the monitor's loudspeaker.

The **5" LCD colour monitor**, PerfectView M5L, impresses with its **cool design and smart technology: brilliant, high-resolution LCD picture quality, control elements on the upper face of the cabinet, USB charger port as well as two video inputs** (e.g. for a DVD player or an additional camera). Featuring the new Easylink monitor mount, the monitor can be detached with a single movement of your hand (read more on this on p. 98).

RVS 550 is suitable for:

WAECO PerfectView RVS 550

Reversing video system with 5" LCD monitor and colour camera
Colour system with LED support

■ **5" LCD colour monitor M5L**

- › For 12 volt and 24 volt operating voltage
- › Switches on automatically
- › Automatic day / night adjustment
- › Real-view or mirrored picture function
- › 235,000 pixels
- › 2 camera inputs with separate controls
- › Image settings can be saved for either camera
- › Loudspeaker
- › USB port for recharging of MP3 players, etc.
- › LED background illumination

PerfectView Accessories – cable kits

The right solution for each type of truck: WAECO offers ready-to-install cable kits for the two most common towing systems, truck / trailer or tractor / trailer. **A fast way to improve safety!** See pages 94 and 95 for details.

Matching accessories for LCD reversing video systems – e.g. for connection of an additional camera – can be found on pages 104 – 107.

Colour
shutter camera
with infrared
LED

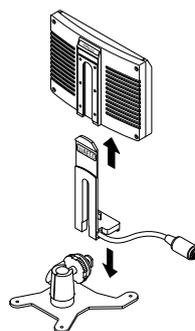

Great technology, compact size

High-grade 5" colour system with shutter camera

This WAECO reversing video system takes you up to professional level. The robust, sophisticated shutter camera CAM80C withstands all weathers, the high-performance wide-angle lens (145° field of vision!) is protected from dirt and damage by a motor-operated shutter.

The **colour camera** features a high-performance 1/3" **SONY CCD picture sensor**, **infrared LEDs** for enhanced vision in dark surroundings, a **temperature controlled heater** as well as a **microphone**. Just like with the RVS550 reversing video system, the **5" LCD colour**

monitor PerfectView M5L provides **brilliant picture quality, ergonomic operation and technical options (second camera, DVD player)**. The monitor **can be detached with a click** to keep burglars out of mischief.

Easylink monitor mount

Easylink – the fast and secure mounting system for your monitor.

The base is firmly anchored in the cockpit, the monitor can be attached and detached with a click. Ideal when a monitor is used in various vehicles of a fleet, or for anti-theft protection.

RVS 580 is suitable for:

Distance marks on the monitor

This feature is unique to the new 7" monitor M7LX: adjustable, coloured distance marks showing the vehicle width, the warning line and the stop line. The driver can always see which obstacles are in the danger zone and which are definitely not. Manœuvring is safe and convenient, even with a 40-tonne truck.

- A: Stop line at 0.5 m distance
- B: Warning line at 3 m distance
- C: Reference line for vehicle width
- D: Vehicle rear

Premium technology for professional truckers

7" LCD colour monitor plus LED shutter camera

The best camera available, the best monitor around: welcome to the premium class! The PerfectView RVS 780X reversing video system combines the benefits of a 7" LCD colour monitor with those of an LED shutter camera.

Using a high-performance 1/3" **SONY CCD picture sensor**, the PerfectView CAM80C colour camera takes **very detailed pictures**, its lens yields a picture angle of 145°. **Infrared LEDs** improve vision in dark surroundings, the **temperature controlled heater** ensures reliable operation on cold days. The built-in **microphone** can be used to give manoeuvring instructions from the outside.

The **motor-operated shutter** protects the camera from dirt and damage.

The high-resolution image signals captured by the camera are adequately reproduced on the screen of the 7" LCD colour monitor: excellent resolution, **brilliant colours** – the picture you receive is **high in contrast** and clearly visible **in all light conditions**. **Innovative design** and **ergonomic operation** are other hallmarks of this high-end system, which also features a **USB charger port** and **three video inputs**. **Thanks to the Easylink mount the monitor can be detached** (see p. 98 for more details).

PerfectView Accessories – cable kits

The right solution for each type of truck: WAECO offers ready-to-install cable kits for the two most common towing systems, truck/trailer or tractor/trailer. **A fast way to improve safety!**

Compact camera with motor-operated shutter

Signal recognition for a second camera fitted on a trailer

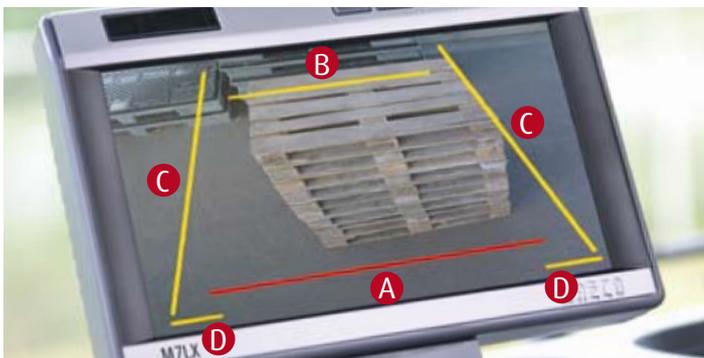

LCD monitor with LED background illumination

Easy-to-detach monitor (s. p. 98)

Monitor with sequence switching for up to 3 cameras

Adjustable distance marks (see picture below)

E-approved

Distance marks on the monitor

- A: Stop line at 0.5 m distance
- B: Warning line at 3 m distance
- C: Reference line for vehicle width
- D: Vehicle rear

The adjustable distance marks clearly show which obstacles are in the danger zone. This makes reverse parking safe and simple, even with a 40-tonne truck.

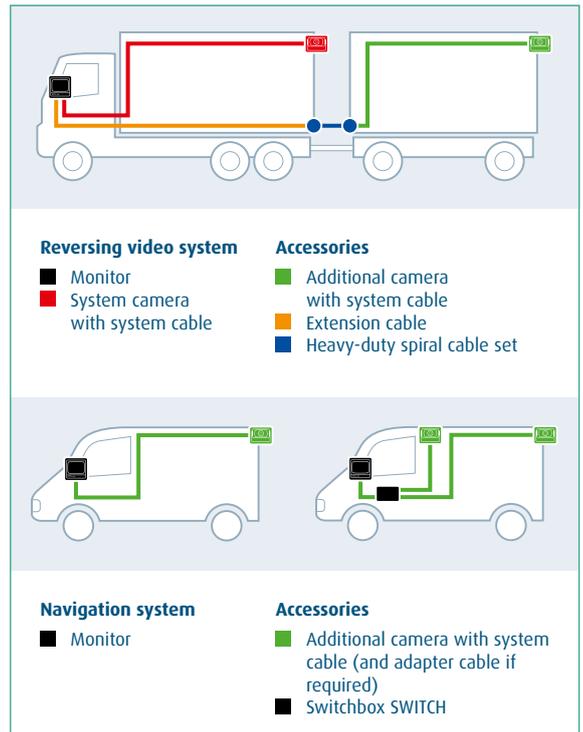

Matching accessories for LCD reversing video systems – e.g. for connection of an additional camera – can be found on pages 104 – 107.

Cameras for LCD reversing video systems and navigation systems

Do you want to add one or more camera(s) to your LCD reversing video system? Front, side or trailer camera – Dometic WAECO has the right camera for every demand and budget. Installation is hassle-free, all fittings are included in the delivery kit.

Do you have a navigation system with monitor fitted in your vehicle? Then it's easy and cost-efficient for you to get a fully-fledged reversing video system. All you have to do is connect a WAECO PerfectView rear-view camera to the monitor of your navigation system.

Matching adapter cables are available as optional accessories. All camera kits are supplied complete with adapter cables.

Preconditions for connecting a rear-view camera

Navigation systems PREPARED for video applications ...

... generally have a cinch/RCA socket as video input (A/V or AUX). WAECO PerfectView cameras – fitted with a connection box or adapter – can be directly connected to these systems.

Navigation systems NOT PREPARED for video applications ...

... can only be upgraded with a rear-view camera if the manufacturer of the navigation system offers a matching video converter.

Things to consider before buying a camera:

- › Is the monitor of your navigation system able to produce a mirrored view of the picture?
Important note: Only a mirrored monitor picture will be useful for reversing, because it gives you the familiar rear-view-mirror view.
WAECO PerfectView cameras come with factory-preset mirrored picture function.
- › Does the monitor recognise NTSC and PAL video formats?
- › WAECO PerfectView cameras are suitable e.g. for navigation systems from Kenwood, Panasonic and Pioneer.

Note: Any questions? We are here to help. Detailed information on all products can be found at www.dometic-waeco.com. Also feel free to contact the Dometic WAECO representation in your country.

Cable adapters

Features & functions

The two cable systems used by WAECO up to 2009 (black or grey) are replaced as of 2010 by a new, uniform cable system.

- › Adapters for adapting installed cables when existing components are replaced by new ones; eliminate the need to re-lay cables
- › Easy allocation to cable systems with colour-coded plug connectors
- › Clear identification of suitable connections on the adapters

Better vision,
less
accidents

More vision – more safety

The PerfectView FVS 740X front camera system

David against Goliath: to this day bad accidents happen at crossroads, T-junctions and roundabouts, because truck drivers overlook pedestrians or cyclists next to their vehicle. Every year 400 people in Europe die from the consequences of such accidents.

The **PerfectView FVS 740X front camera system** gives you a perfect overview of what's happening in front and beside your vehicle.

Alternatively, you can fit your vehicle with a combined front camera/reversing video system. The modular PerfectView range gives you various options. For example, you can simply upgrade the PerfectView FVS 740X front camera system **by adding a rear-view camera** (p. 110 – 111). Or you buy the **CAM 40 front camera** and combine it with one of our **7" LCD reversing video systems (RVS 750X or RVS 780X)**. Both work with the M 7LX LCD colour monitor, which – in combination with the CAM 40 – is certified as a front camera system according to the 2003/97/EC mirror directive.

FVS 740X is suitable for:

The mirror produces a reversed and distorted image. The driver's line of vision is outside the wiper area.

The extremely wide angle entails the risk of dazzle.

The front mirror protrudes over the sun visor: risk of damage in the wash bay, by tree branches, or when manoeuvring.

The camera delivers a true-sided image. The picture on the monitor is crystal-clear, bright and high in contrast.

Safety bonus at night-time: the ball camera provides high-contrast pictures even in unlighted parking areas.

The compact ball camera does not protrude beyond the bodywork: optimal protection from damage in the wash bay, by tree branches or when manoeuvring.

WAECO PerfectView FVS 740X

Front camera system with 7" LCD monitor and colour camera

Favourably priced system for vehicles of 7.5 tonnes and above (24 V)

Large monitor with detailed picture reproduction and many programmable functions, e.g. camera activation

Automatic enabling / disabling with PerfectView GPS30 (see page 111)

Cameras and accessories to complement front camera systems

You have fitted a front camera system? Here is an interesting upgrade option: simply connect a reversing camera to the second monitor input – and you'll be able to monitor the "blind spot" as well as the area behind your vehicle.

Good to know: the two systems don't interfere with one another. The front camera is activated by the indicator, the rear-view camera by reverse gear. If you add the new GPS 30 signal transmitter (page 111), the front camera will turn on only at relevant speeds of under 30 km/h. Using the SWITCH switchbox (page 117) gives you the option to connect two additional cameras, e.g. for the trailer or for monitoring a working area.

Extra-convenient: speed-dependent enabling / disabling by GPS

PerfectView front camera systems turn on automatically as you start the ignition and stay on during the drive. According to the EU mirror directive, it is recommendable to disable the systems at speeds over 30 km/h when the danger of damaging people in blind spot accidents is no longer present and the monitor image may disturb or distract the driver.

Naturally, you don't need to bother with switching the front camera system on and off in good time. The PerfectView GPS 30 signal transmitter will do that for you – safely and reliably. It uses a GPS speed signal to turn the front camera system off when the speed exceeds 40 km/h – and on again at a speed below 30 km/h.

WAECO PerfectView GPS 30

3.06

Signal transmitter for speed-dependent enabling / disabling

All you need: heavy-duty components for professional use

Simply set up the system to suit your needs!

Trailers, semi-trailers, construction machinery, night-time operation: WAECO offers a comprehensive modular system of single components that can be flexibly combined to create custom-made solutions for specific vehicles and applications.

Vibration, impact, moisture, dust: in addition to robust standard products, the range includes a wide choice of heavy-duty components designed for tough daily use on building sites and under extreme weather conditions.

Equipped for extremes

Heavy-duty design, high quality components and perfect workmanship guarantee impeccable operation under extreme conditions. The PerfectView CAM60 camera, for instance, will even withstand a high-pressure cleaner jet. It is now also available in an ADR-compliant version, CAM60ADR (e.g. for dangerous goods transport).

HD components are suitable for:

PerfectView SWITCH connects what you want connected

Using the switchbox you can connect up to three cameras to one monitor and control them individually! PerfectView SWITCH is compatible with almost any WAECO camera. The cameras can be activated either automatically or manually (e.g. the reversing camera via reverse gear, the side-mounted cameras via the indicator).

Monitor with 2 cameras
The heavy-duty monitor has two camera sockets. You can connect, for example, a reversing camera and a side camera.

Turning 2 into 4 with PerfectView SWITCH
The same monitor, thanks to the switchbox, now with up to four cameras: for example, a reversing camera, two side cameras (one each left and right), and an additional camera to monitor the working area

WAECO PerfectView SWITCH

3.19

Switchbox for additional reversing video applications

For running up to three independently controlled cameras from one monitor camera input

Features & functions

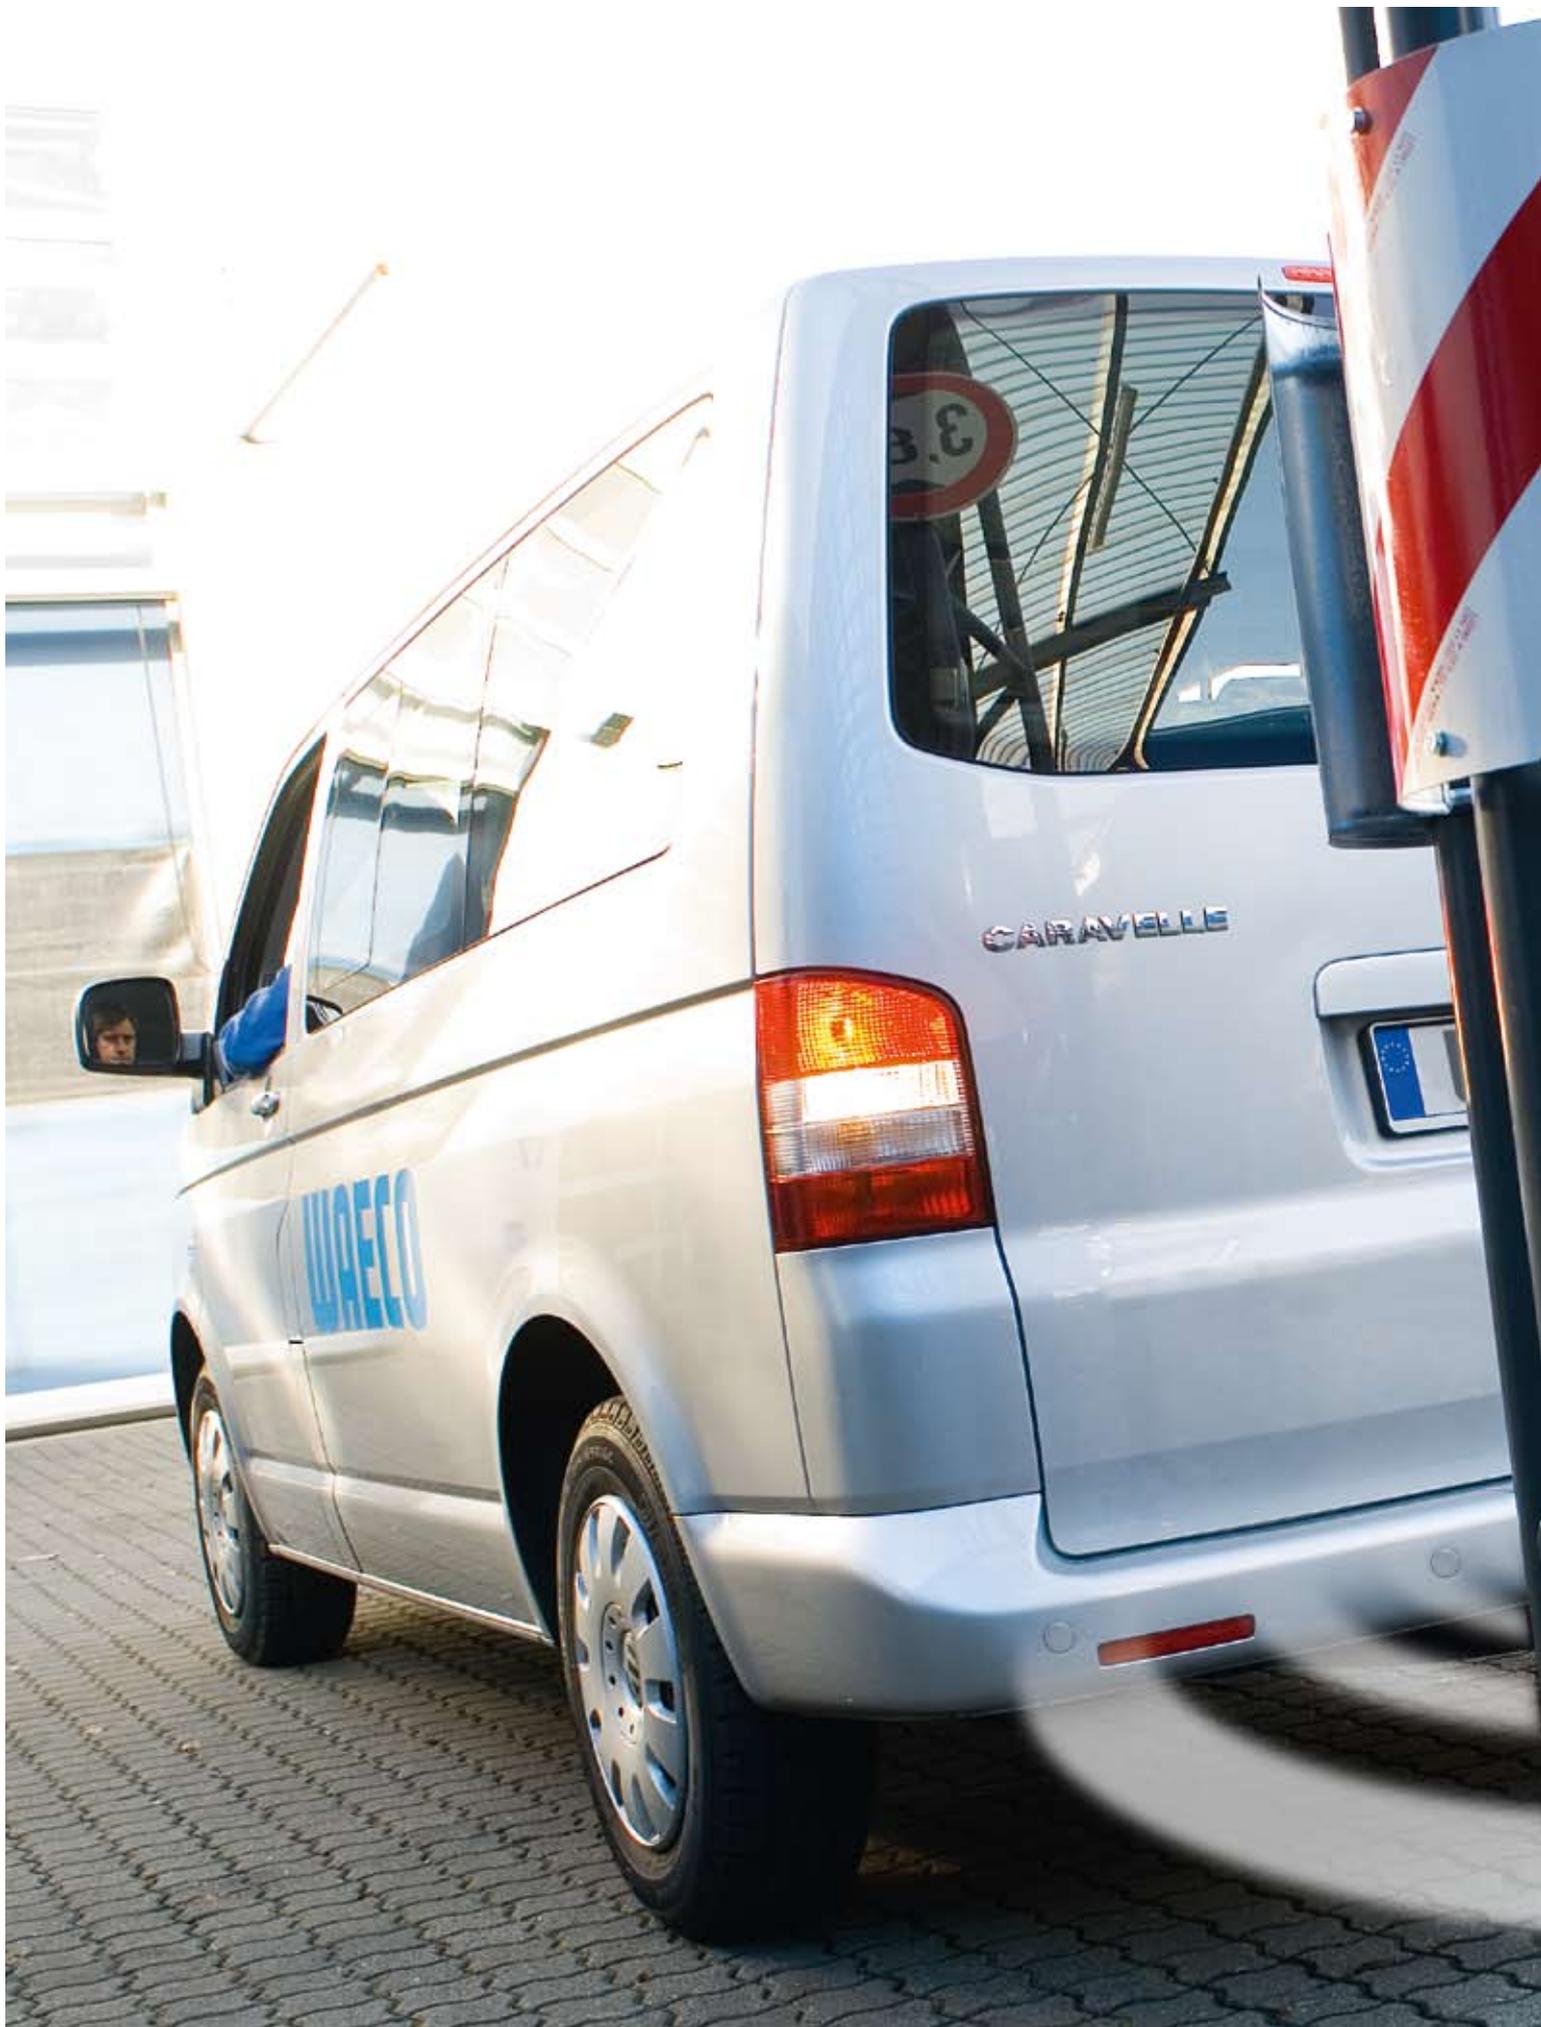

- › Cameras can be activated either automatically or manually (e.g. reversing cameras via reverse gear, side-mounted cameras via indicators)
- › Power consumption: 0.84 watts max. (without cameras)
- › Suitable for 12- and 24-volt vehicle electrics

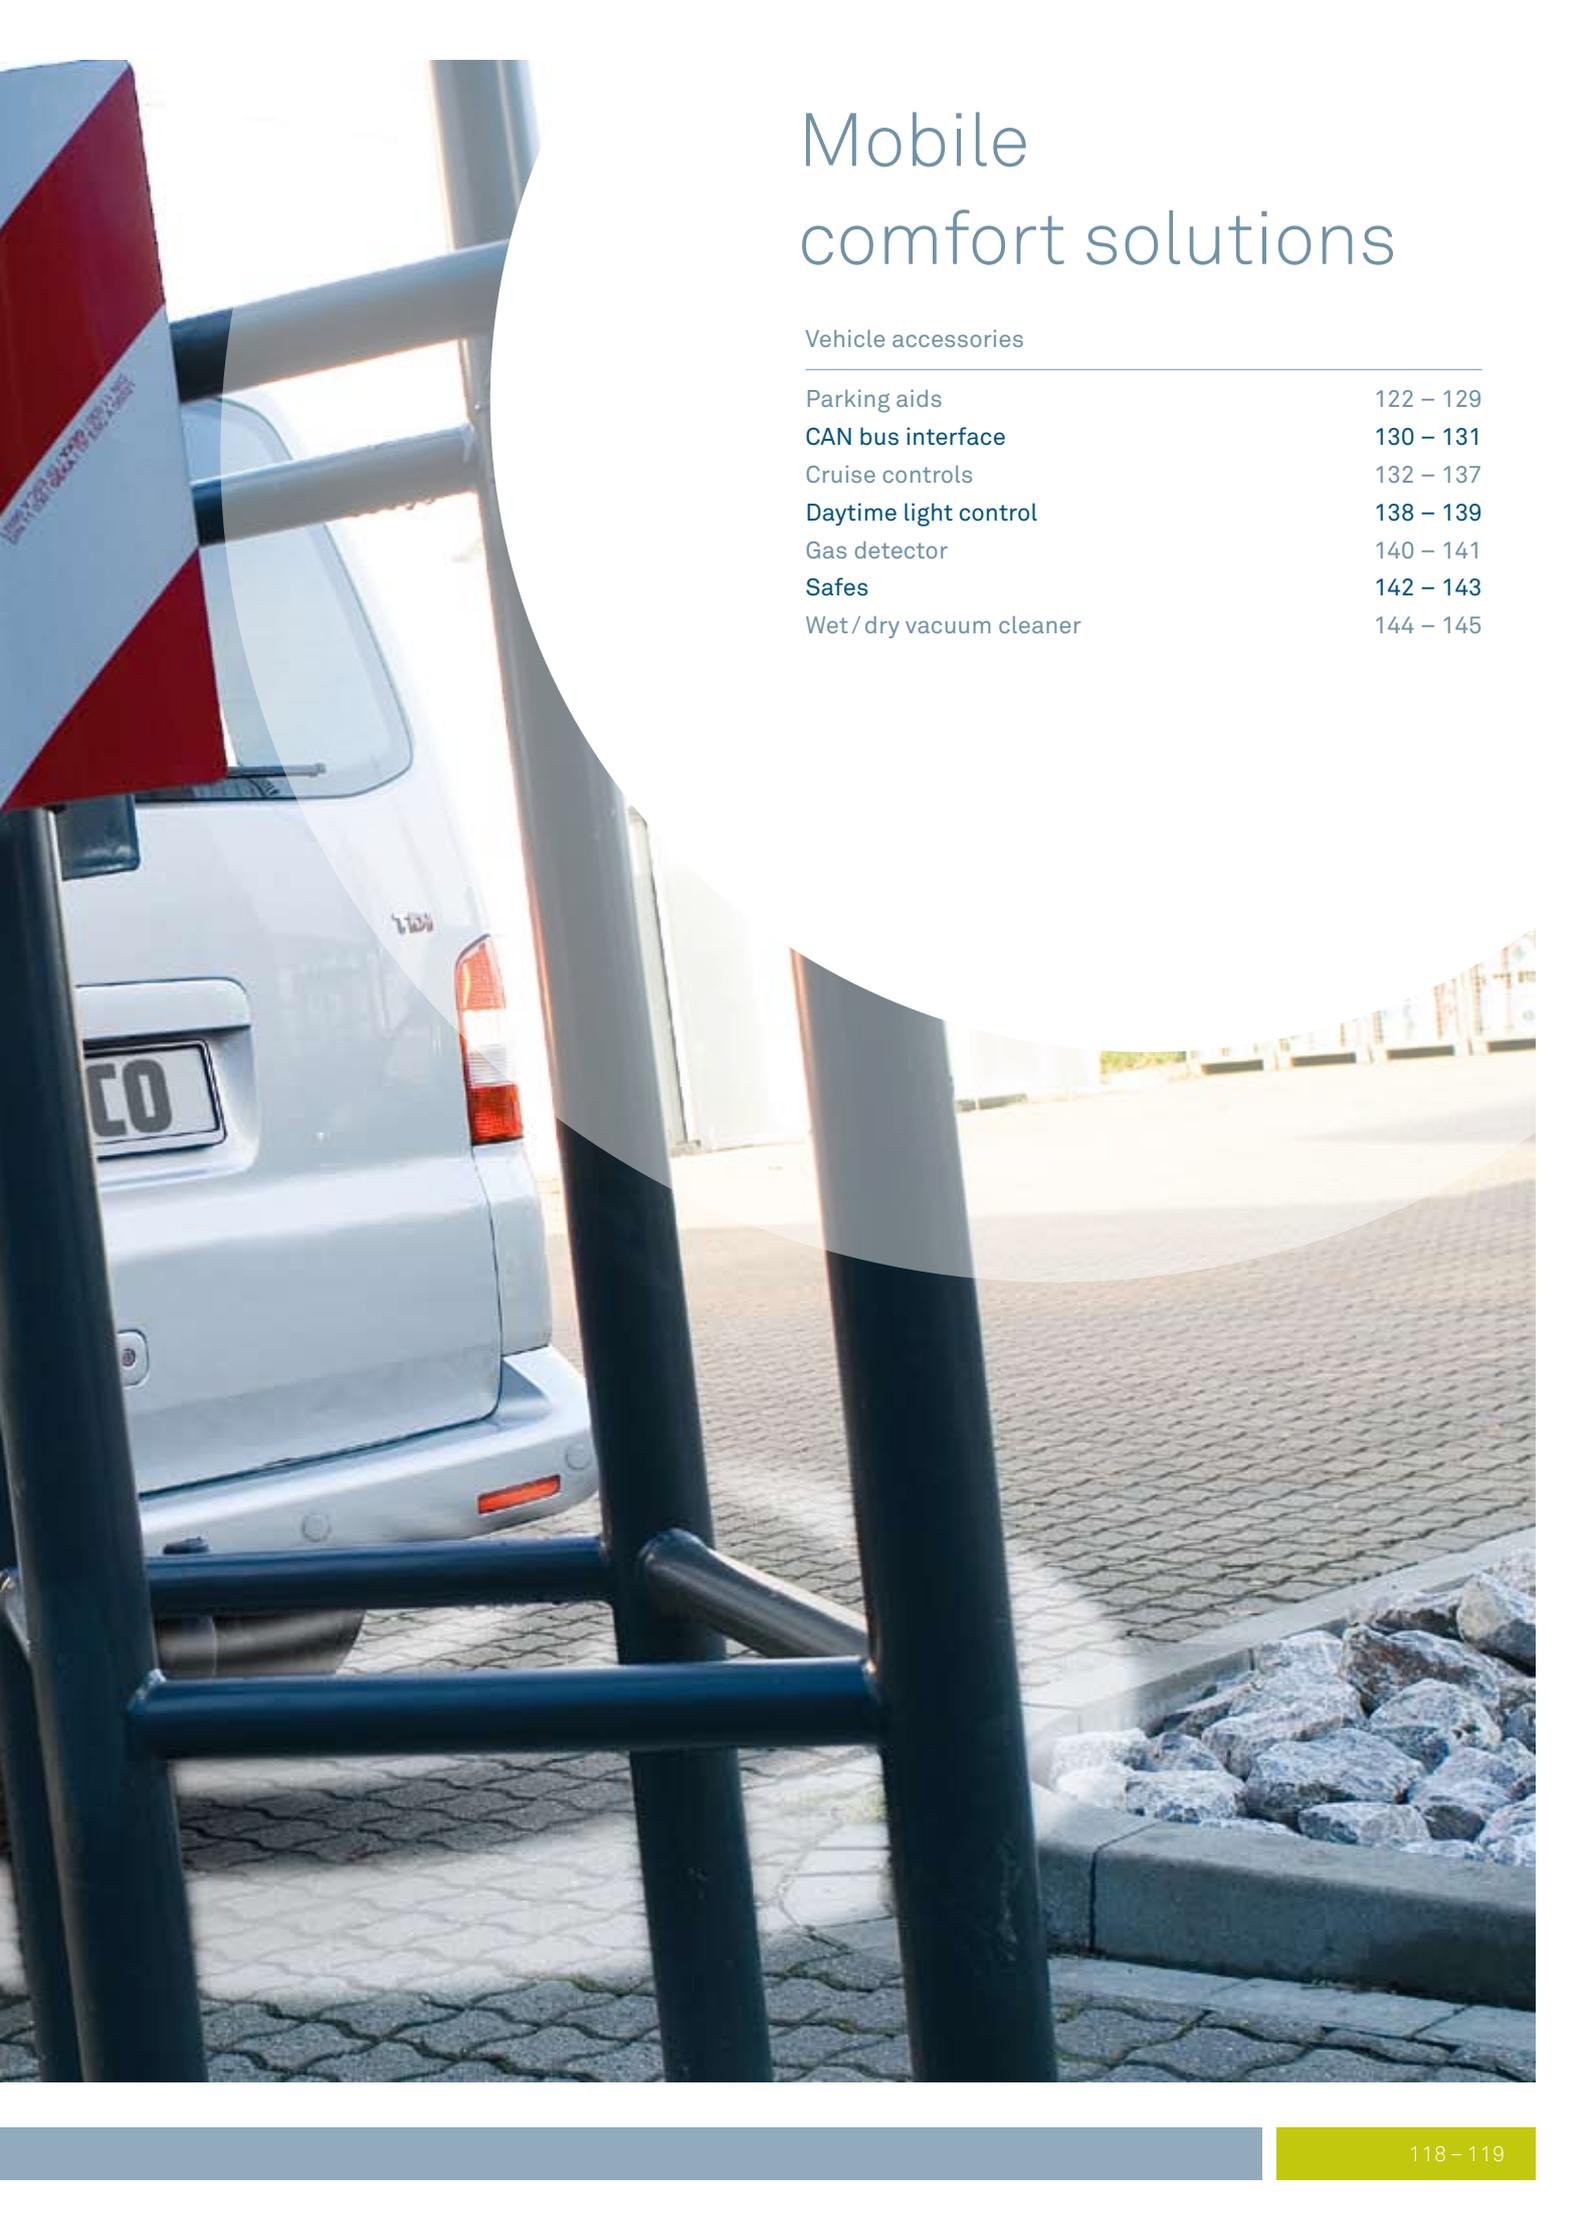

Scope of delivery: switchbox, cable for connection to vehicle electrics, switch for manual activation of the cameras, switch box connection cable, fitting materials, installation and operating instruction

Put an end to stress Make your vehicle perfect!

A lapse in concentration is all it takes ... You hit the ramp while reversing, you're caught speeding by a radar trap or without the mandatory lighting while abroad. And let's not even think about break-ins and thefts. It's probably best if you simply avoid the problem and invest instead in **mobile solutions from Dometic WAECO**. All of the products can be easily and quickly installed in your vehicle while the battery vac can be stowed in the storage compartment.

Treat yourself to a **little luxury in your hardworking life** – comfort accessories by Dometic WAECO will help you arrive at your destination in a more relaxed state.

Parking aids

Six complete, ready-to-fit systems to suit all cases. Hard-wired or with wireless signal transmission, for the rear as well as for the front bumper. Neat solutions even for tricky installation conditions.

WAECO MagicWatch

Pages 122 – 129

MagicWatch MW650

Cruise controls

A constant speed – automatically, conveniently, safely! The comfort cruise control and speed limiter for all vehicles with electronic accelerator, with or without CAN bus. Designed for specific vehicles, fast and easy installation.

WAECO MagicSpeed

Sharpen your perception!

Complete, ready-to-fit systems for truck and vans

Six systems to choose from

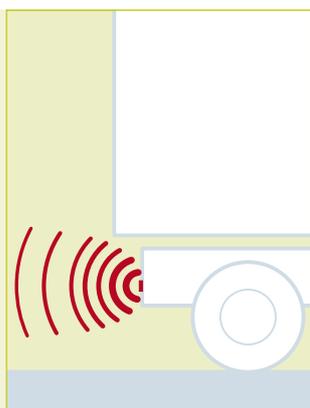

Is there enough space, or not? When reversing in awkward places, this is always the question. MagicWatch parking aids will tell you precisely how close you are. They take the stress out of driving and reduce the risk of bumps and scrapes. Six parking aid models are available, including two systems with wireless signal transmission. Pick the one that best suits your vehicle and needs. The overview on page 123 gives you all you need to know at a glance.

How does MagicWatch work?

The parking aid is activated as soon as reverse gear is engaged. It measures the distance to an obstacle with the help of four ultrasonic sensors mounted on the rear of your vehicle. Signal transmission to the signal generator is wireless or hard-wired. MagicWatch warns you if your vehicle comes too close to an obstacle. Depending on the system, this is done by an acoustic signal (MWE900, MWE910, MWE2000, MW2500) or by an acoustic and visual signal (MW 650, MWE650).

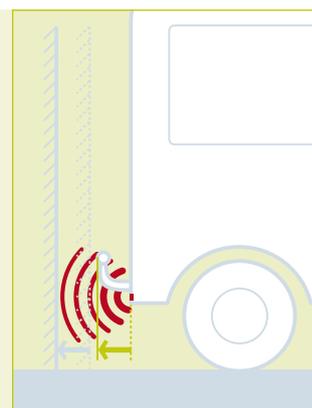

A thinking system

MagicWatch models MW650 and MWE650 feature Digital Signal Memory (DSM). These parking aids are able to “memorise” smaller objects fitted to the vehicle (e.g. tow-bars or bodywork extensions) and take them into account when checking the area behind the vehicle. **Your advantage: no “false alarms” while reversing.**

The parking aid models MWE900, MWE910, MWE2000 and MW2500 give you the option to shift the stop line up to 40 cm towards the rear.

Your advantage: rear-mounted objects protruding over the sensors (steps, tow-bars, spare tyres, etc.) are considered in the distance calculation.

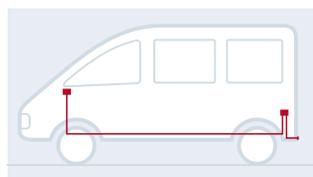

Decision aid: features and functions of MagicWatch parking aids

| System | Transmission of the sensor signals | Display of distance data | Number / Fastening of the sensors | Range rear / front | Ideal for | Page |
|-----------------|------------------------------------|--------------------------|------------------------------------|--------------------------|---|------------|
| MW 650 | Hard-wired | Acoustic and visual | 4 sub-mounted sensors | 30 – 250 cm | Trucks, buses, agricultural machinery | 124 |
| MWE 650 | Hard-wired | Acoustic and visual | 4 built-in sensors | 30 – 250 cm | Trucks, buses, agricultural machinery | 124 |
| MWE 900 | Hard-wired | Acoustic | 4 built-in sensors | 30 – 180 cm | Vans, mini buses | 126 |
| MWE 910 | Hard-wired | Acoustic | 8 built-in sensors | 30 – 180 cm / 25 – 95 cm | Vans, mini buses | 126 |
| MWE 2000 | Wireless | Acoustic | 4 built-in sensors | 30 – 180 cm | Trailers used with changing towing vehicles | 128 |
| MW 2500 | Wireless | Acoustic | 2 mounting profiles with 4 sensors | 30 – 180 cm | Vans and light trucks | 129 |

Transmission of the sensor signals

Hard-wired transmission

Sensors are mounted on the vehicle's rear and wired with the control unit. The latter transmits the signal via a hard cable connection to the signal generator in the cockpit.

- › Easy to fit with plug-in components
- › Splash-proof control unit
- › Extendable sensor cables (up to 10 m)
- › Average installation time: approx. 3 to 4 h

Wireless transmission

Sensors are mounted on the vehicle's rear and wired with the control unit. The latter transmits the signal via a wireless link to the signal generator in the cockpit.

- › Especially easy to fit: no need to lay cables from the transmitter to the receiver!
- › Average installation time: approx. 2 to 3 h (depending on the system)

Display of distance data

Acoustic and visual signal

Display with integrated piezo speaker. Distance displayed in 1-cm intervals by 4-colour LED. The closer you get to an object, the faster the beep from the loudspeaker.

Acoustic signal

Loudspeaker (plug-in version for cigarette lighter socket or permanently installed in the cockpit or rear). Acoustic signal with changing pitch and intervals. The closer you get to an object, the faster the beeps.

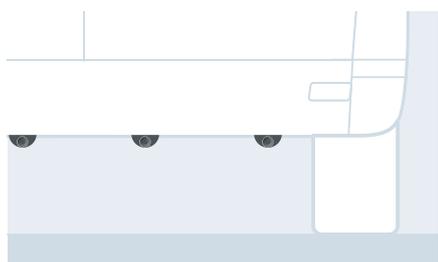

Fastening of the sensors

Sub-mounted sensors

Easy-to-fit sensors for flexible installation. The rugged housing can easily be fitted beneath the rear bumper or other body parts. Ideal for larger vehicles, such as trucks, buses or agricultural machinery.

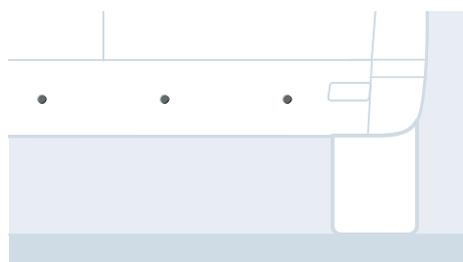

Dimensions (W x H x D): 70 x 40 x 25 mm

Built-in sensors

Perfect finish: the sensors are integrated in the rear bumper! They are pushed into the drilled holes where they fit tightly. Barely visible. Ideal for buses and larger vehicles with metal bumpers.

Dimensions: Ø 18 – 24 mm; depth 18 – 25 mm

Mounting profiles

Quick and easy installation: the sensors are factory-fitted on two mounting profiles. The profiles can be fastened to the bumper or, optionally, to the twin rear doors (van).

Dimensions of one profile (L x W): 547 mm x 56 mm

All systems for 12 and 24 volts

Totally accurate at the ramp

Parking aids for trucks, buses, agricultural machinery

Trucks up to 7.5 t are mainly used for local distribution of goods. The stress of constant manoeuvring in narrow courtyards leaves its mark not only on the driver's nerves. To protect your fleet and save on repair costs you should make a timely investment in a WAECO MagicWatch parking aid.

For all larger vehicles we recommend using the MagicWatch MW650 or MWE650 model. MagicWatch MW650 comes with sub-mounted sensors for quick and easy installation to the underside of the rear bumper. MagicWatch MWE650 has built-in sensors to be integrated into the rear bumper for an aesthetically perfect result.

The parking aids are automatically activated as soon as you change into reverse. When you approach the next obstacle you receive an acoustic and visual warning.

A convenient extra: the digital distance indicator (4-colour-LED) shows the distance in a range between 30 and 250 cm down to the last centimetre. That means when you are approaching a loading ramp, you can keep the very distance that's ideal for lowering the tail lift. Which makes for quicker and easier loading – and time is money, after all.

MagicWatch MW650 and MWE650: safe manoeuvring for trucks, buses and agricultural machinery

- › Extra-large range up to three metres
- › Acoustic and visual warning function
- › Digital Signal Memory (DSM)
- › Splash-proof components
- › Extendable sensor cables up to 10 metres
- › System self-diagnosis
- › Specially designed for metal bumpers (MWE650)

Ideal for light trucks up to 7.5 t

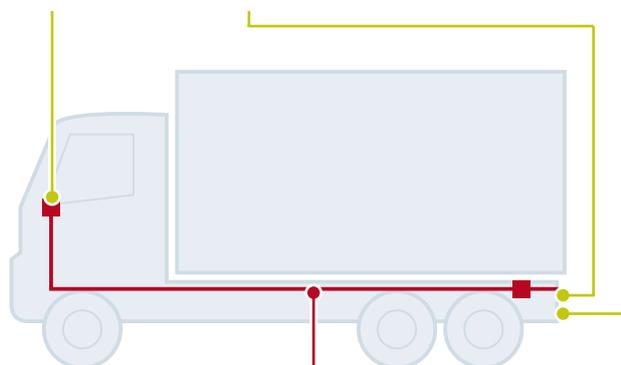

The display unit is firmly installed in the truck cabin

MWE 650

Easy installation with four sensors integrated in the rear bumper

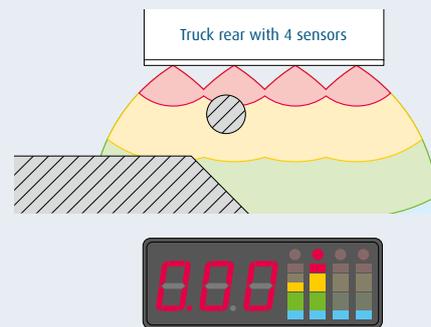

MW 650

Easy installation with four sensors mounted to underside of the rear bumper

Hard-wired signal transmission from the base unit to the receiver

Visual warning function on the MW 650 and MWE 650

Left: digital display shows distance at centimetre accuracy

Right: 4-colour LED displays distance for each sensor

A single glance is enough to know which of the four sensors is closest to an obstacle.

WAECO MagicWatch MW 650

Rear parking aid for trucks, DSM, 4 sub-mounted sensors

3.07

Features & functions

- › Distance measurement with 4 ultrasonic sensors
- › Activation of the system via reverse gear
- › Free voltage supply from 10 volts to 32 volts
- › System self-diagnosis with error indication
- › Acoustic and visual warning function with 4-colour LED
- › DSM (Digital Signal Memory)
- › Distance to the obstacle indicated by LEDs in 1 cm intervals
- › Position of the obstacle indicated on the display
- › Range: approx. 30 cm to 250 cm
- › Flexible installation with sub-mounted sensors

Test mark

E-approved to automotive directive

Scope of delivery: 4 ultrasonic sensors (2.5 m cable), 1 splash-proof control unit, 1 visual/acoustic display unit with 15 m supply cable, fixing materials, installation and operating instructions

12 / 24 volts

Built to fit

Parking aids for every (mounting) situation

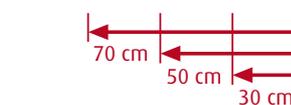

Manœuvring a van is often difficult just because obstacles of medium height are barely visible or cannot be seen by the driver at all. It doesn't take much to get a bad dent. No need to suffer that kind of stress: your MagicWatch parking aid warns you when you are getting too close to an obstacle while reversing.

With **MagicWatch MWE900 and MWE910** WAECO offers two highly reliable systems that have proven their worth for use in vans. They come with **ultra-small sensors (only 18 mm in diameter)** and a comprehensive range of fitting accessories for **hassle-free installation even in difficult or confined spaces**. The variable stop line (see diagram on the right) is yet another bonus that sets these MagicWatch models apart from other parking aid systems.

Variable stop line

The parking aid sensors are located at the rear bumper, but there's a tow-bar or step protruding beyond the bumper. No problem, MagicWatch will take account of such "extras". Simply shift back the stop line (by up to 40 cm) and use your parking aid as you normally would.

Distance of stop line from step shifted by 20 cm using the DSM function

Distance of stop line from sensors

For perfectionists Parking aids with the smallest sensors available

Seeing is believing, although it's not all that easy ... The sensors of the MagicWatch MWE900 and MWE910 parking aids are only 18 mm in diameter and feature a mere 18 mm installation depth. A genuine record in the market, as competitors' sensors are far larger and therefore less elegant than WAECO products. The sensors are painted in the vehicle colour and then integrated into the rear bumper (MWE900) or into the front and rear (MWE910). Whichever model you opt for, you are bound to get a perfect installation result in terms of technology and appearance.

* Scaled-down view, 50% of the original size

One for all: Plug-in system for flexible use

Our tip for fleet operators: if you have trailers used with alternating towing vehicles, the radio-based parking aid MagicWatch MWE2000 can give you many benefits. Based on wireless signal transmission, it saves you the bother of having to lay cables from the rear of the trailer to the cockpit. The compact loudspeaker will easily move from one vehicle to another. It simply plugs into the cigarette lighter and is instantly ready to receive signals.

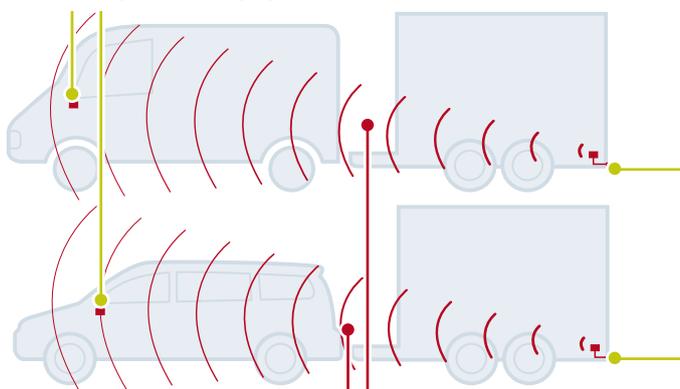

Boundless freedom and ease

MWE 2000 – wireless parking aid for trailers

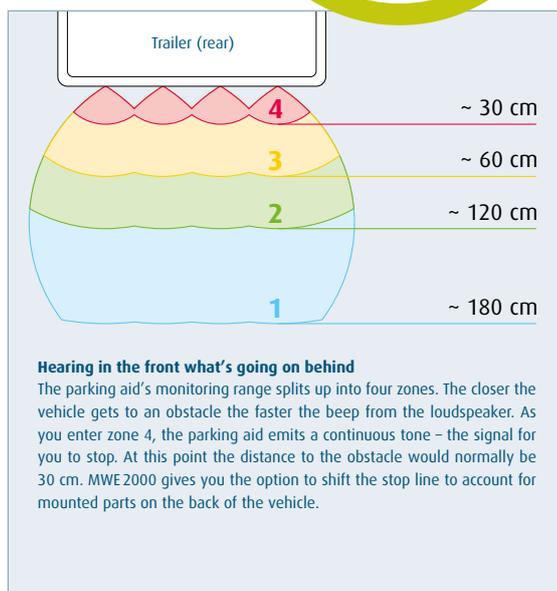

Ideal for trailers towed by changing vehicles

The loudspeaker of MagicWatch MWE2000 simply plugs into the cigarette lighter socket, regardless of which towing vehicle you are going to use.

Easy installation of the four sensors in the trailer's rear bumper

Wireless signal transmission from the base unit to the receiver

Wireless
radio-based
operation

Well thought-out from front to rear

The wireless parking aid MagicWatch MW 2500 was designed for hassle-free reversing. Installation, too, is simplicity itself.

In the rear: super-compact sensors, integrated in easy-to-fit mounting profiles which can also be attached to the twin rear doors of a van.

In the front: an adhesive acoustic display unit that is simply fixed where you want it and firmly wired with 12 volts DC.

Ease of use guaranteed: No need to lay cables across the length of the vehicle!

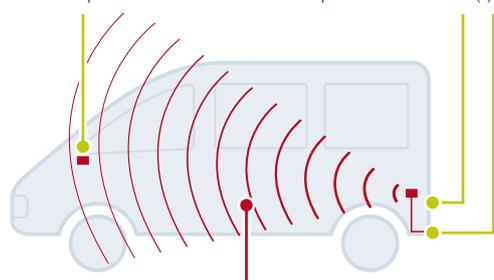

Quick and easy to install

MW 2500 – wireless parking aid with mounting profiles

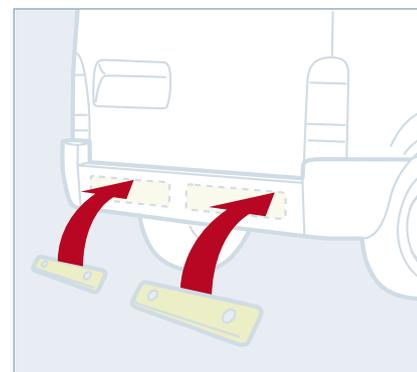

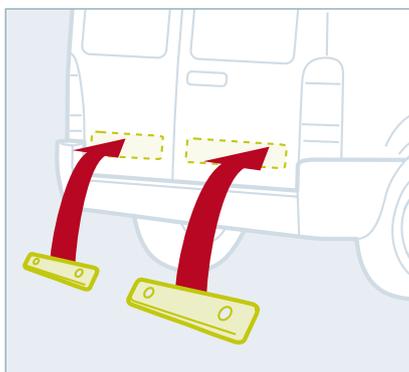

Ideal for vans and light trucks

The receiver is firmly installed in the vehicle's cockpit.

Easy installation of the two mounting profiles on the rear bumper or on the rear door(s)

Wireless signal transmission from the base unit to the receiver

Steps in the bumper? No hurdle for MagicWatch MW 2500! Its mounting profiles, incorporating the sensors, can just as well be attached to the rear doors.

WAECO MagicWatch MW 2500

Rear parking aid with wireless transmission, with 4 sensors integrated in two mounting profiles, for light trucks

The digital-analogue translator

For running analogue retrofit products in CAN bus vehicles

You want to retrofit an analogue accessory, but your vehicle has a digital CAN bus system? Go ahead, it's no problem at all with the CAN bus interface from WAECO! The module ensures a smooth data flow between the analogue and digital technologies.

More and more vehicles are equipped with the CAN bus technology. This also means that all of their comfort functions are controlled by digital signals from the CAN bus system. The problem is many retrofit products require analogue signals. This is easily solved by fitting the WAECO CAN bus interface. The module "translates" the digital CAN bus signals into analogue impulses and transmits them to the retrofitted accessory.

The CAN bus interface is suitable for use with **many WAECO comfort and safety accessories** (see the picture series on the top right-hand page). **It can also be used for similar products of other makes**, as most of them will require an analogue speed or rev signal.

The WAECO interface also paves the way for built-in navigations systems.

The WAECO CAN bus interface also makes vans fit for analogue aftermarket products. It is compatible with most commonly used models built by Citroën, Fiat, Ford, Iveco, Mercedes-Benz, Nissan, Peugeot, Renault and Volkswagen.

WAECO MagicSpeed MS

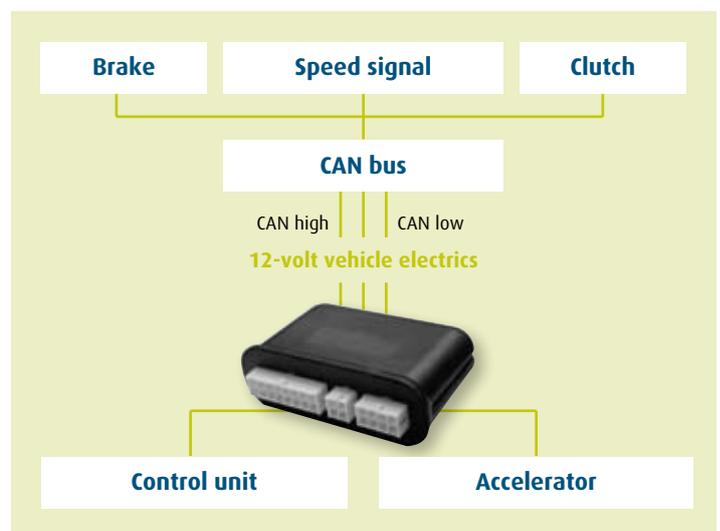

Choose your own speed!

Cruise control for vans with CAN bus and electronic accelerator

It makes absolute sense to use a cruise control in a delivery van. Even more so when it is so quick and easy to install as the MagicSpeed MS900. Just under an hour is sufficient, there is hardly any standstill time for the vehicle.

The MS900 owes this major installation advantage to its CAN bus compatibility, which ensures smooth operation within the vehicle's electronic system. MagicSpeed MS900 works with a control unit that is directly linked to the electronic accelerator control by means of a vehicle-specific adapter cable. No soldering, no crimping, just plug and play!

Ease of installation shown on the example of Fiat Ducato

The interface where the MS900 taps the signal is the on-board computer

Signal tapped with just three vehicle-specific plug-in connectors

Connection to the accelerator via T-plug

Connection of the control element to the dashboard or steering column

WAECO MagicSpeed MS 900

Cruise control for vehicles with comfort CAN bus and electronic accelerator

3.06

**Features & functions**

- › Set speed and reset previous speed
- › Fine speed adjustment (tap up, tap down)
- › After code entry system adjusts itself automatically to the vehicle parameters (speed signal and sensitivity)
- › ON/OFF
- › All signals required are controlled via CAN bus system
- › Easy to fit with cable sets for specific vehicles, no soldering or crimping – just plug and play
- › Choice of two control elements
- › **Preconditions for installation:**
12 V vehicle electrics, electronic accelerator, comfort CAN bus

Test marke-approved to automotive directive,

Automatic cruise control and speed limiter

For vehicles with electronic accelerator

The **MagicSpeed cruise control** relieves the driver on long journeys by **automatically keeping a set speed** – a comfortable and safe way to avoid exceeding speed limits. It is still possible to accelerate the vehicle for overtaking. Alternatively, you can change to the **speed limiter** function. In this mode **a set speed limit will not be exceeded**, even at full throttle. MagicSpeed MS880 is

suitable for all vehicles with electronic accelerator, for analogue as well as for CAN bus systems. Three control elements are available to suit different vehicle models.

Please note that the vehicle-specific cable set for installation of the MS880 is an optional extra, so it has to be ordered separately.

WAECO MagicSpeed MS 880

Comfort cruise control with speed limiter function

WAECO MagicSpeed HUD

Keep an eye on your speed

Drive safely and with full concentration thanks to WAECO MagicSpeed HUD

Keeping an eye on the speedometer and the road at the same time: it's possible with the WAECO head-up display. MagicSpeed HUD displays the current speed on a projection film attached to the windscreen at the driver's eye level. The system comes with an acoustic alarm function that can be activated to warn you when preset speed limits are exceeded. No need to check the speedometer all the time, no panic braking at the mere sight of a speed camera! MagicSpeed HUD helps you drive safely and with full concentration.

A convenience and safety feature that used to be reserved to the luxury class. Now available for retrofitting in WAECO quality!

- › **Universal use** – for all vehicles with 12-volt electrics and speed signal
- › **Easily readable**, even when it's sunny or dark
- › **Acoustic warning function** (can be switched off)
- › **Ease of use** with four programming buttons
- › **Fast installation** (about 0.5 to 1 hour)

MagicSpeed HUD is connected to ignition, earth and speedometer signal. If you are not sure where to find the speedometer signal cable in your vehicle, contact the Dometic WAECO representation in your country.

Luxury-class comfort at the touch of a button – programmed in 5 steps

| | | | | |
|---|---|---|---|---|
|   |   |   |   |   |
| <p>Stand-by mode The display is ready for service as soon as you turn on the ignition. All indicator lamps flash for about two seconds.</p> | <p>Coarse adjustment Adjust the speed readout of the display to that of the speedometer. To be done in four steps (10, 20, 40, 80 km/h).</p> | <p>Fine adjustment Adjust the speed readout of the display to exactly that of the speedometer. To be done in a range from 50 to 250 km/h.</p> | <p>Set warning speed Set at what speed limit the display is to emit an audible warning signal (eight stages, from 30 to 130 km/h).</p> | <p>Warning tone Naturally, you can also disable the warning function.</p> |

With speed warning function

Light sensor automatically adjusts LED illumination

Daytime running lights improve safety

MagicTouch – the automatic daytime light control

Driving with lights on at daytime is mandatory in many European countries and considered a matter of course in the interest of traffic safety. For trucks, buses and other utility vehicles without factory-fitted daytime running lights (DRL), Dometic WAECO offers the MagicTouch daytime light control for retrofitting.

When you start the ignition **MagicTouch TFL 100** automatically activates the complete vehicle lighting (dipped headlights, parking lights, sidelights, number plate lights). Only during the actual engine start the daytime light is shortly switched off. There is no need to operate the original light switch, but its function is completely retained. When the light is switched on manually, the daytime light control is deactivated.

Extra convenience is provided by the **coming home function**: when the ignition has been turned off, the dipped headlights stay on for a selectable period (0 to 120 sec.)

Is driving with DRL safer? Obviously!

Large vehicles in bright daylight – how can they be overlooked? They obviously can. Studies have revealed that, even on a clear day, vehicles driving with dimmed headlights on during daylight hours are perceived faster than unlighted vehicles, and the risk of being overlooked is lower. Our example illustrates the effect under “normal” daylight conditions.

More and more drivers switch their lights on

The mandatory use of daytime running lights throughout Europe would avoid many accidents, as a study of the ACE (Auto Club Europe) shows backed by alarming figures. Even so, driving with lights on during daylight hours has not yet become common practice in all European countries, but is expressly recommended in some countries. Every driver is free to switch the dipped headlights on during daylight hours to protect themselves and other road users. The ideal way is to use an automatic light control system.

Beware of burglars – protect yourself from gas attacks

MagicSafe gas detector – for your safety's sake

Robberies involving knock-out gas are dramatically on the increase. The anonymousness of remote parking areas is welcomed by a growing number of unscrupulous burglars, who use narcotic gas to put their victims into a deep sleep to gain easy access to their cash, credit cards, ID-cards, laptops and mobiles. Don't just trust your own senses when you're having that hard-earned sleep. After all, you don't want to wake up to a disaster. Be on the safe side – with the **MagicSafe MSG 150 gas detector**.

The gas detector recognises all common narcotic gases based on ether, chloroform, butane, ethane, or trichloro-ethane. It triggers the alarm as soon as it detects any hazardous substances in the ambient air. The noise of its

integrated buzzer just can't be ignored. A red LED lights up for extra warning. Once it has been activated, the gas detector starts its self-testing mode and automatically adjusts itself to the ambient air. Any system malfunctions are immediately indicated. Moreover, you can check the sensor function manually whenever you want by pressing the test button. The test button can also be used to silence the alarm.

By the way: If you have fitted your vehicle with the MS650 alarm system, the MagicSafe gas detector works as a complementary module, which means you can use the alarm system's remote control for the gas detector, too. Alternatively, the gas detector can be complemented with an external siren.

WAECO MagicSafe MSG 150

Gas detector 12 and 24 volts

3.08

**Features & functions**

- › Responds to all common narcotic gases
- › Audible and visual alarm
- › Integrated 10-A switching relay
- › Adjusts automatically to the room atmosphere

Battery powered wet / dry vacuum cleaner

Lightweight, efficient, cordless

Forget about those flimsy toy cleaners, here's power for you: WAECO PowerVac – a blessing in your truck!

With its 90 watt / 400 mm water column performance, the battery powered vacuum cleaner copes with all the dirt you want to get rid of in your cabin or storage compartments. **Wet or dry – the PowerVac knows no difference.** Fitted with special attachments, it cleans the tiniest gaps and removes every spec of dust from the seat covers. Even the nastiest spills stand no chance of escaping its power. And all that without cables getting in your way. The PowerVac provides full manoeuvrability even in small cabins. Your compact little helper requires very little space. You could even put it in one of the storage compartments – after all, they're clean now.

WAECO PowerVac PV 100

Wet / dry vacuum cleaner with 12-volt rechargeable battery

3.31

**Features & functions**

- › Handy, battery-powered vacuum cleaner for mobile use
- › Maximum mobility with rechargeable 12-volt battery
- › Can be recharged from 12 volts and 230 volts
- › Easy-to-clean dust container and fabric filter
- › Cleaning power: 400 mm water column

| | |
|-------------------------------|--|
| Motor | 12 volts DC, 28,000 rpm |
| Battery | 12 volts DC, 2.6 Ah |
| Operating time | approx. 18 min ±10% |
| Charging time | 10 to 14 h (automatic cut-off) |
| Capacity | 3.8 litres |
| Power consumption | approx. 90 watts |
| Cleaning power | approx. 400 mm water column (±10%) |
| Operating temperature | 0°C to +40°C |
| Material | Handle: ABS Filter: polyester Dust container: PP |
| Dimensions (W x H x D) | 270 x 320 x 198 mm |
| Weight | 2150 g |

Scope of delivery: vacuum cleaner, hose, attachments for upholstery, rugs and narrow gaps, carrying strap, mains adapter, 12-volt charging cable, operating instructions

| Product | Ref. No. |
|-----------------|----------|
| PowerVac PV 100 | PV-100 |

Ideal for trucks**Universal cleaner for vehicle and home use****Full manoeuvrability thanks to cordless operation****Perfect cleaning performance**

The WAECO PowerVac battery gives you up to 18 minutes of uninterrupted operation. Then it's time to connect it to the mains for recharging. Using the connection that is part of the set, recharging takes between 10 and 14 hours. The process is electronically controlled and completed to prevent overcharging. The vacuum cleaner comes with a 3.8 litre dust container and reusable fabric filter, both of which are simply taken off for emptying and cleaning.

Plenty of power

The wattage isn't everything, of course. The vacuum measured in "mm water column" is far more important for your cleaner's performance. You could say it is the "maximum torque" of a vacuum cleaner. And this is where your PowerVac excels: While high-tech vacuum cleaners require 1200 watts to obtain 1500 mm water column, the little, battery operated cleaner boasts an impressive 400 mm water column at only 90 watts!

Suitable for both wet and dry vacuum cleaning

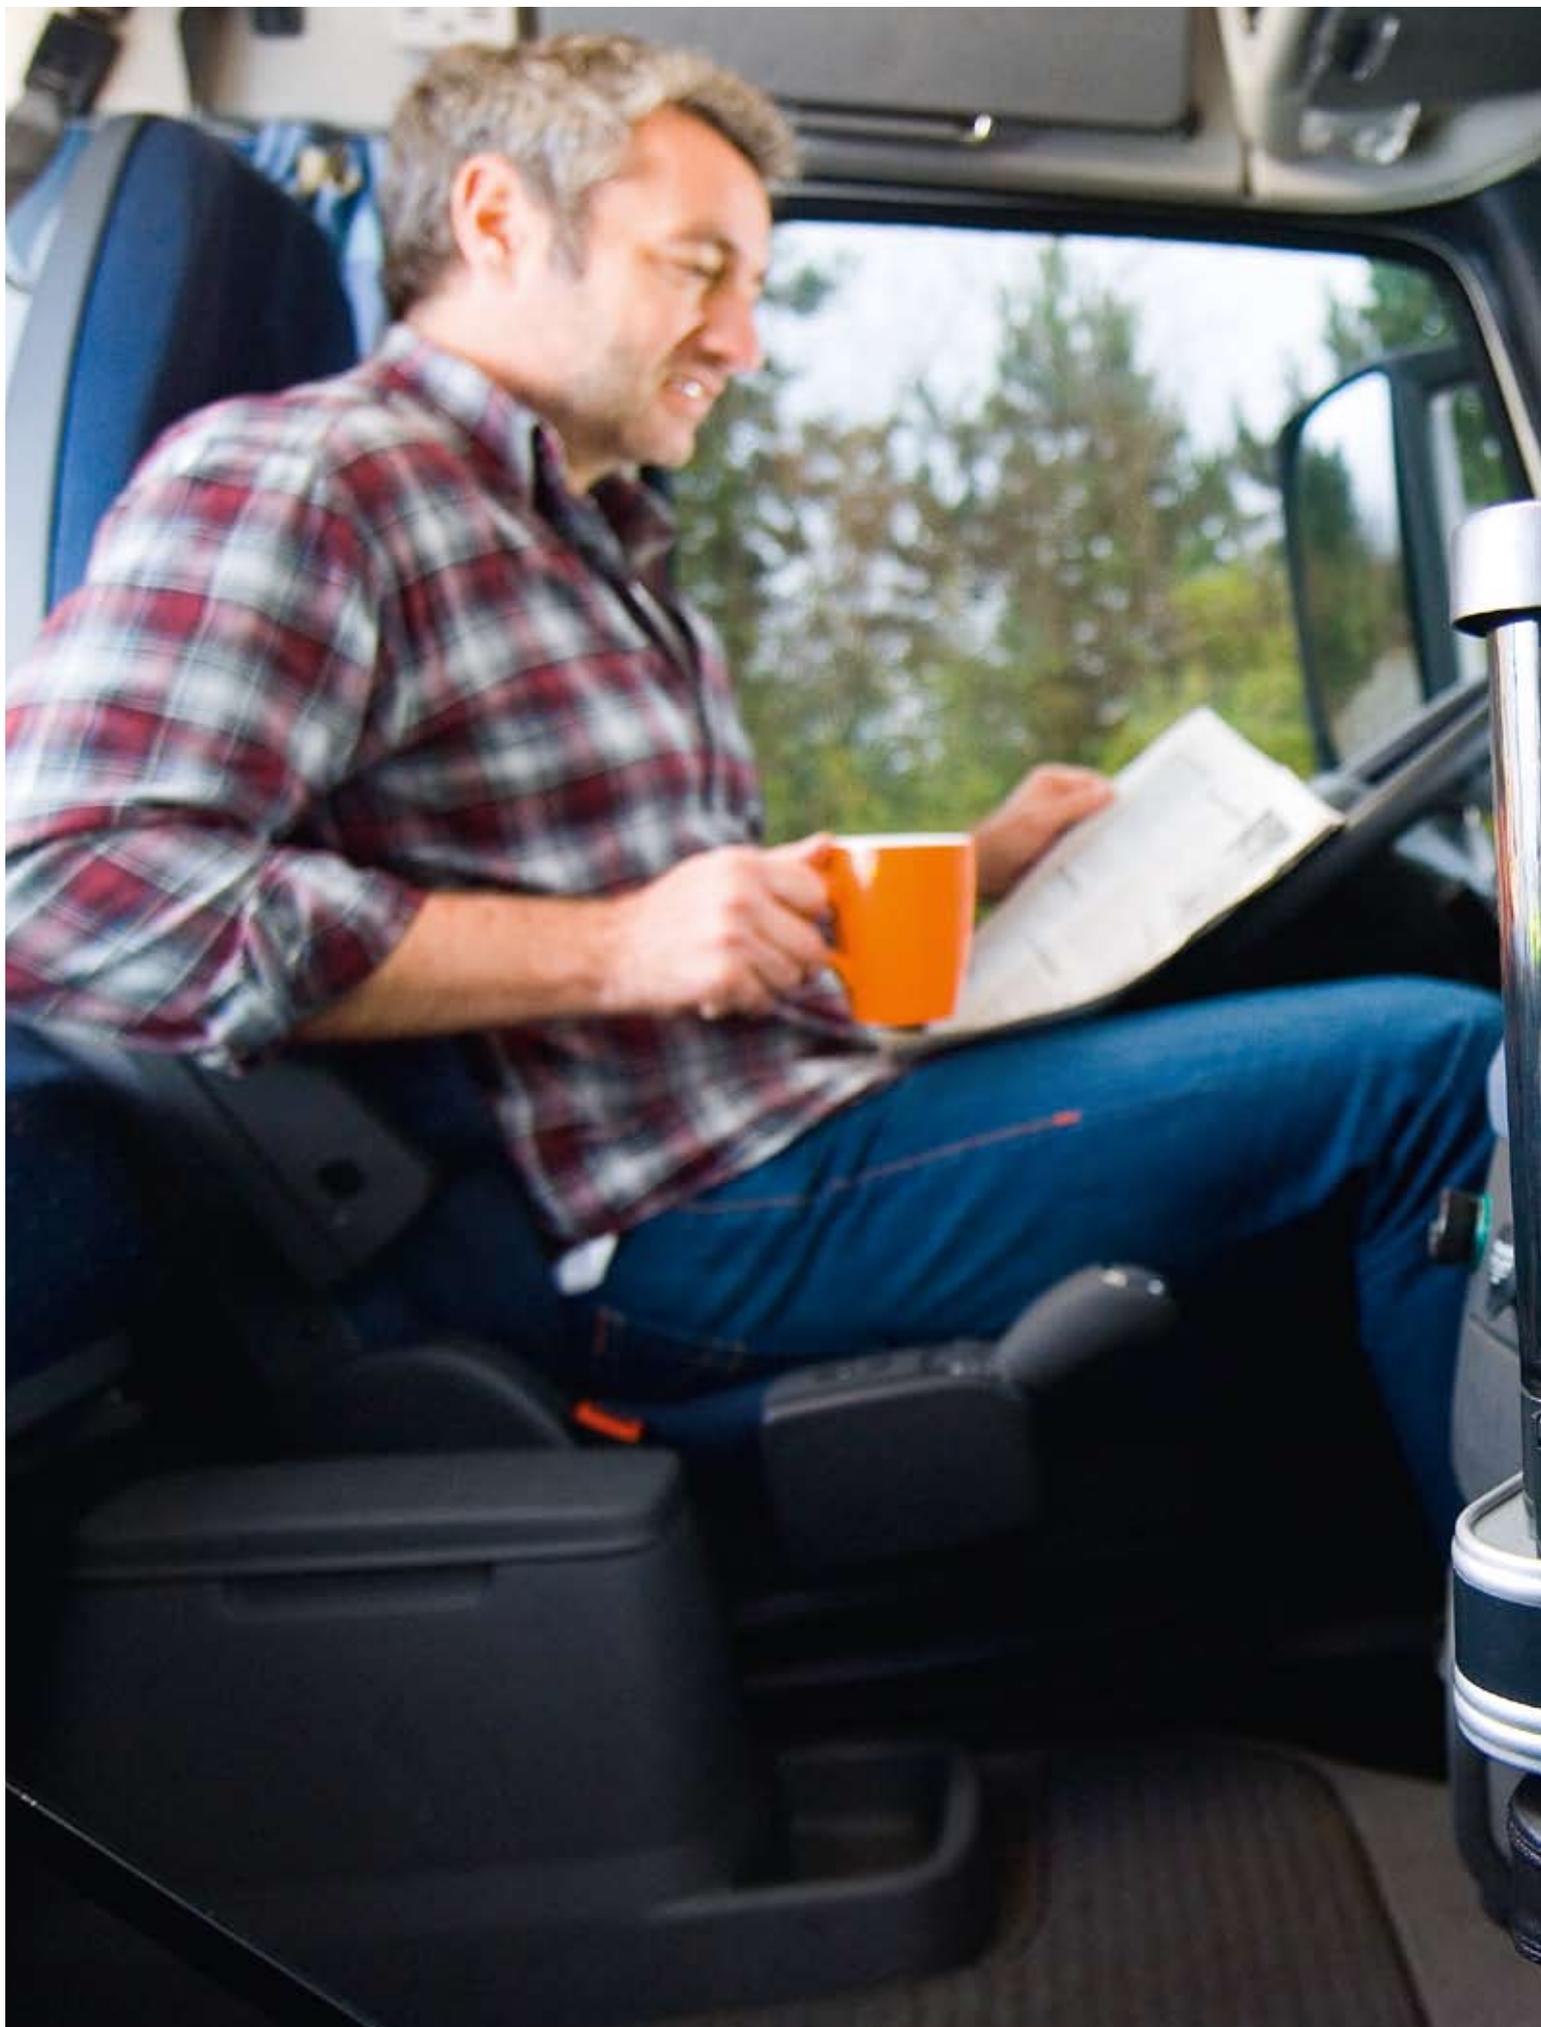

Brush attachment for doormats, rugs and upholstery

Easy cleaning thanks to detachable dust container and fabric filter

Extendible crevice nozzle for narrow gaps

Mobile kitchen solutions

Coffee-Makers
Car-Kettle

| PerfectCoffee MC06 | MC-06-24 |

Delicious coffee served in style:
beautiful thermal flask in stainless
steel with tight closing lid

Handy and safe:
removable water tank with fixture

Clean handling:
removable filter with drip-stop valve

Freshly brewed coffee – anytime, anywhere

WAECO PerfectCoffee for 12 or 24 volts

The WAECO PerfectCoffee range includes Coffee-Makers for any demand and budget. Regardless of whether you opt for the 8-cup luxury model, the 5-cup compact size or the inexpensive 1-cup brewer, you will enjoy great coffee when you need it most.

- › Available as a **12-volt** or **24-volt** model
- › Designed **for mobile use**
- › With **fixing kit** for a firm hold in the vehicle
- › **Automatic cut-off after brewing** or **overheat protection**
- › **E-approved** and **food-safe** according to the German Foodstuff and Consumer Goods Act (LMBG)

WAECO PerfectCoffee MC08

Coffee-Maker de Luxe, 8 cups, 12 volts or 24 volts

3.13

| | |
|----------------------------------|---|
| Capacity | approx. 8 cups (750 ml) |
| Voltage | 12 or 24 volts DC |
| Average power consumption | 12 volts: 200 watts, 24 volts: 360 watts |
| Colour | Black / silver |
| Dimensions (W x H x D) | 285 x 320 x 100 mm |
| Weight | 1.8 kg |
| Quality features | Slim, space-saving design, removable water tank, water level indicator, robust relay technology, LED indicator, cut-off after brewing |
| Test marks | E-approved (Automotive EMC Directive), food-safe according to the German Foodstuff and Consumer Goods Act (LMBG) |

Scope of delivery: Coffee-Maker with connection cable and plug, thermal flask, fixing kit for wall or desk mounting

| Product | Ref. No. |

| PerfectCoffee MC08, 12 volts | MC-8-12LX/N |
| PerfectCoffee MC08, 24 volts | MC-8-24LX/N |

Slim, space-saving design

Automatic cut-off after brewing

Convenient operation

With robust relay technology

WAECO PerfectCoffee MC05

Coffee-Maker 5 cups, 12 volts or 24 volts

3.13

| | |
|----------------------------------|---|
| Capacity | approx. 5 cups (680 ml) |
| Voltage | 12 or 24 volts DC |
| Average power consumption | 12 volts: 200 watts, 24 volts: 380 watts |
| Colour | Black / silver |
| Dimensions (W x H x D) | 210 x 260 x 140 mm (incl. fixing kit) |
| Supply cable | 1.0 m |
| Weight | 1.34 kg |
| Quality features | Designed for use with standard paper filters (size 2), transparent water tank with cup scale, integrated transport securing device for glass pot, hotplate with thermostat, robust relay technology, overheat protection, LED indicator |
| Test marks | E-approved (Automotive EMC Directive), food-safe according to the German Foodstuff and Consumer Goods Act (LMBG) |

Scope of delivery: Coffee-Maker with connection cable and plug, glass pot, fixing kit for wall or desk mounting

| Product | Ref. No. |

With fixing kit for desk mounting

Fresh coffee after 5 minutes brewing time

For cars, trucks, motorhomes, boats

Price hit!

Something hot is what you need

Water kettle for mobile use

Why waste time and money in motorway service areas when you've got hot water on board? A pot of tea, a cup of cappuccino or instant cocoa, a dish of broth or soup – any of these is prepared in a few minutes with the WAECO PerfectKitchen MCK 750 Car-Kettle.

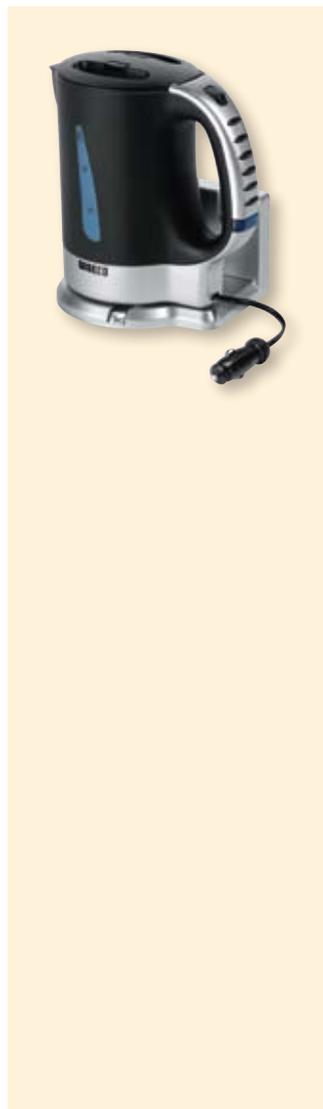

The elegant 0.75-litre water kettle is handy and safe in operation. It is available as a 24-volt model for trucks and a 12-volt version for vans and cars.

- › Designed **for mobile use**
- › Available as **12-volt or 24-volt version**
- › For a firm hold in the vehicle:
fixing kit for wall or desktop mounting

WAECO PerfectKitchen MCK 750

Home-like comfort away from home

With professional electronic accessories

From voltage converters to mobile power supply

When on the road, enjoy the same convenience you have at home – with mobile electronics by Dometic WAECO.

The range includes all you need for a perfect on-board system: voltage converters to turn 12 volts into 24 volts and vice versa, charging converters to stabilise the on-board voltage supply, and, a special highlight this year, the so far most comprehensive range of sine

wave inverters. The complete generation of premium quality inverters delivers 230 volts for many different applications. A multi-functional battery jump starter and a battery charger belong in every vehicle and in every garage. In remote locations, far away from any mains supply, power is provided by high-performance generators, which add the finishing touch to the electronics range.

Voltage converters 12V > 24V / 24V > 12V Charging converters

They combine what was never intended to be combined: 12-volt appliances and 24-volt board batteries – and vice versa. The converters can also be used for battery charging.

WAECO PerfectCharge IU charging converters give supply batteries a full charge during the drive.

WAECO PerfectPower / PerfectCharge

Inexpensive converters, such as those in the PerfectPower series (DCDC06 to DCDC24), are absolutely fine for running a 12-volt appliance on a 24-volt battery.

Things are different when you have a computer, monitor or measuring instrument. Such sensitive appliances require a constant and stable voltage that compensates drops and peaks – the kind that is generated by **voltage converters and charging converters with electrically isolated input and output voltage (PerfectPower DCDC10 to DCDC40 or PerfectCharge DC08 to DC40).**

These high-quality DC/DC converters can also be used for quick and gentle charging of supply batteries during the drive. PerfectCharge charging converters, given their enhanced output voltage of 14.2 volts, are the best choice for this purpose.

Always the perfect voltage

DC/DC converters for all applications

WAECO PerfectPower DCDC 06 / 12 / 24

Voltage converters

Inexpensive, super-compact voltage converters in switch-mode design for operation of 12-volt appliances in 24-volt circuits.

- › High energy efficiency (up to 90%)
- › Low heat output
- › Compact design, low weight
- › Easy to fit with clip-on system
- › **Now in new design**
- › e-certified (Automotive EMC Directive)

Page 159

A stable voltage for computers & the like

Converters with electronically controlled output voltage

Sensitive electronic appliances, such as computers or measuring instruments, require a voltage converter with electrically isolated input and output voltage. It's the only way to ensure they will get a stable voltage, even if the on-board power supply drops or peaks. The PerfectPower series gives you a choice of five units to

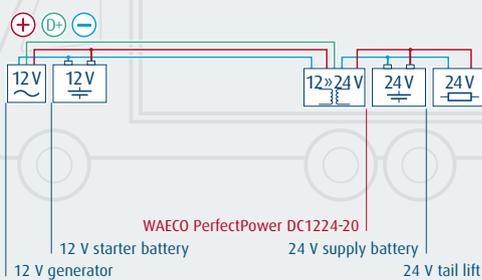

cover various uses. You can run 12-volt appliances on a 24-volt battery, or 24-volt appliances on a 12-volt battery. Simultaneously, you can have your supply batteries recharged. Should your converter come up against its limits, simply switch a second one in parallel.

12 volts > 24 volts 10 A / 20 A

PerfectPower DC1224-20 in a small truck with 12-volt electrics:

charges the 24-volt supply battery for the tail lift

- › Fast and gentle charging of the 24-volt supply battery while driving
- › Low-cost, simple and safe way to create a dual-voltage circuit
- › Enable input can be connected to D+ to switch the converter on or off automatically via the generator

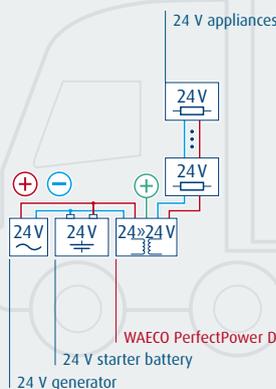

24 volts > 24 volts 10 A

PerfectPower DC2424-10 in a truck with 24-volt electrics:

stabilises the voltage supply for sensitive 24-volt appliances

- › Generates a stable, electronically controlled output voltage (± 0.1 V) for sensitive 24-volt appliances
- › Compensates for voltage drops and peaks
- › Enable input for connection of a manual ON / OFF switch to battery +

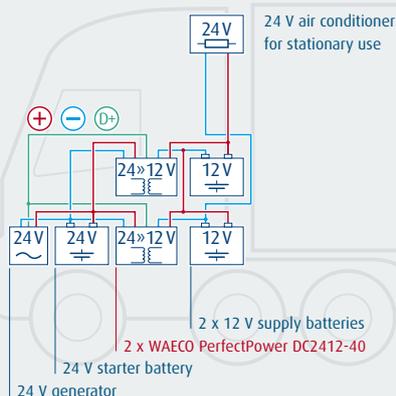

24 volts > 12 volts 40 A

Two PerfectPower DC2412-40 units in a truck with 24-volt electrics:

charge two 12-volt supply batteries for the stationary air conditioner

- › Fast and gentle charging of the two 12-volt supply batteries during the drive
- › Enable input for connection to D+ to switch the converter on or off automatically via the generator

WAECO PerfectPower DCDC 10 / DCDC 20 / DCDC 40

Voltage converters with electrically isolated input and output voltage

Optimised
for sensitive
electronic
appliances

Features & functions

- › Stable, electronically controlled output voltage (± 0.1 V)
- › High energy efficiency (87%)
- › Several converters can be used in parallel
- › Additional enable input: connection of a switch to battery + for manual activation / deactivation of the converter; or, when used for charging, connection to D+ to switch the unit on or off automatically via the generator
- › EMC optimised for the automotive industry
- › Available in five models:
 - 12 volts › 24 volts (10 amps)
 - 12 volts › 24 volts (20 amps)
 - 24 volts › 24 volts (10 amps)
 - 24 volts › 12 volts (20 amps)
 - 24 volts › 12 volts (40 amps)

A perfect charge for 12-volt vehicle batteries

Charging converters with electronically controlled output voltage

Their electronically controlled output voltage of 14.2 volts qualifies PerfectCharge charging converters for their main job as charge amplifiers for 12-volt batteries.

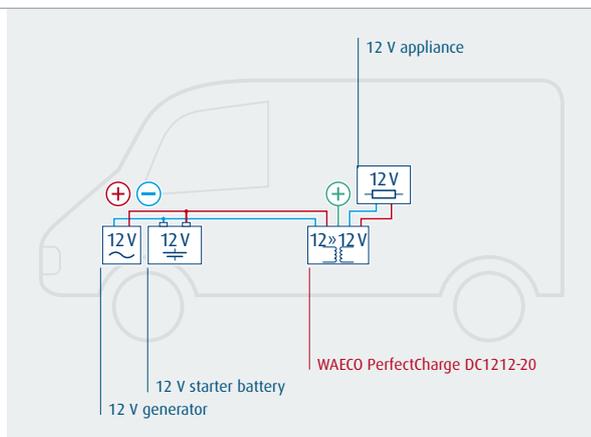

In addition, they stabilise the voltage supply for sensitive high-tech appliances – something they can do just as well as PerfectPower voltage converters. Like the latter, they have an electrically isolated input and output voltage, and thus the ability to compensate for voltage drops and peaks. For circuits requiring more than 40 amps, several converters can be switched in parallel.

12 volts > 12 volts 20 A

PerfectCharge DC1212-20 in an OB van with 12-volt vehicle electrics: stabilises the voltage supply to protect the video and sound equipment

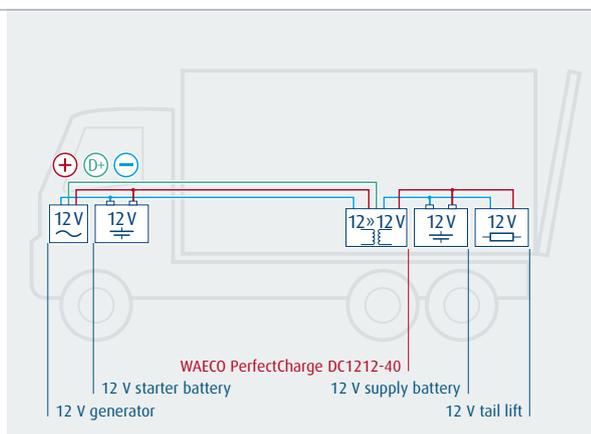

- › Generates a stable, electronically controlled output voltage (± 0.1 V) for sensitive 12-volt appliances
- › Compensates for voltage drops and peaks
- › Enable input for connection of a manual ON / OFF switch to battery +

12 volts > 12 volts 40 A

PerfectCharge DC1212-40 in a small truck with 12-volt electrics: charges the 12-volt supply battery for the tail lift or hydraulic platform

- › Optimal charging of the supply battery at 14.2 volts while driving
- › IU charging curve – recommended for all types of batteries
- › Enable input can be connected to D+ to switch the converter on or off automatically via the generator

WAECO PerfectCharge DC08 / DC20 / DC40

Charging converters with electrically isolated input and output voltage

**Features & functions**

- › Stable, electronically controlled output voltage (± 0.1 V)
- › High energy efficiency (87%)
- › Fast and gentle charging (IU charging curve)
- › Additional enable input: connection of a switch to battery + for manual activation/deactivation of the converter; or, when used for charging, connection to D+ to switch the unit on or off automatically via the generator
- › EMC optimised for the automotive industry
- › Available in three models:

Inverters from XS to XXL

Mobile power sockets

It makes absolute sense to have a 230-volt socket on board your truck or van. After all, enjoying your journey means being able to use the electrical gadgets you are used to. Also, many tools just won't work without a 230-volt socket.

Your on-board batteries generate 12 or 24 volts direct current, and their capacity is limited. The matching **WAECO inverter turns it into the required 230 volts alternating current.**

The comprehensive range has been designed with user comfort in mind and consistently geared to specific applications. It accounts for all your needs – regardless of whether you “just” want a low-priced, compact unit to run your laptop, a power source for your razor, or a high-performance inverter for your microwave oven or espresso machine. All units feature outstanding quality and a contemporary, user-friendly design.

Inverter or sine wave inverter?

Which inverter is the right one depends on the type and power rating of the appliance to be connected.

The low-priced **WAECO PerfectPower** inverters generate a modified output voltage – sufficient for all electrical appliances with a wide input voltage range, such as hair-dryers and power drills.

Sensitive high-tech appliances with special start-up characteristics, e.g. audio/video devices, require a perfectly stable voltage supply. Fluctuations may cause failure or even damage them. **WAECO SinePower** sine wave inverters make sure that won't happen. They deliver a pure 230-volt input voltage, just like from a domestic mains supply.

Modified or pure sine wave voltage supply is also provided by the small **PocketPower** smart inverters, designed for mobile operation of notebooks and the like.

Basically, the most demanding electrical appliance determines the choice of the inverter. A single device on board requiring a pure sine wave voltage is reason enough for you to opt for a sine wave inverter. You should also consider the starting current of the devices. Compressor refrigerators, for instance, can consume up to ten times more than their nominal power consumption.

Minimal power requirements for some electrical appliances

| Device | Power rating | Quality of the output voltage |
|----------------------------|-------------------|-------------------------------|
| Coffee maker (filter) | 800 – 1500 watts | modified sine wave voltage * |
| Coffee maker (pads) | 1200 – 1600 watts | pure sine wave voltage |
| Espresso machine | 1200 – 1600 watts | pure sine wave voltage |
| Microwave oven | 1000 – 1600 watts | modified sine wave voltage * |
| Toaster | 1000 – 1500 watts | modified sine wave voltage * |
| Water kettle | 1000 – 1500 watts | modified sine wave voltage * |
| Reading lamp | 50 – 100 watts | modified sine wave voltage * |
| Energy-saving bulb | 10 – 20 watts | pure sine wave voltage |
| Fluorescent tube | 50 – 100 watts | pure sine wave voltage |
| Audio / video device | 100 – 200 watts | pure sine wave voltage |
| Notebook computer | 100 – 200 watts | modified sine wave voltage ** |
| Power drill / circular saw | 500 – 1500 watts | modified sine wave voltage * |
| Vacuum cleaner | 1000 – 1600 watts | modified sine wave voltage * |
| Electrical toothbrush | 50 watts | pure sine wave voltage |

* May not be suitable for all sensitive appliances ** Pure sine wave voltage may be recommendable for some units

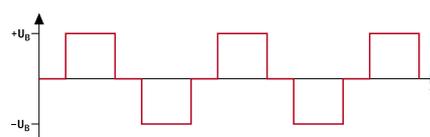

Most frequent applications include: charging of mobile phone batteries, cameras, torch lights, power tools, satellite aerials, DVD players, TV sets ...

Pure or modified sine wave voltage?

Modified sine wave voltage

The voltage produces a stepped curve simulating a sine wave.
The result: an output voltage of stable amplitude and frequency
› **WAECO PerfectPower inverters (p. 168 – 171)**

Pure sine wave voltage

The voltage is accurately controlled by a microprocessor.
The result: a clean sine wave voltage, like that from a home power socket
› **WAECO SinePower sine wave inverters (p. 172 – 177)**

Pure sine wave voltage for your laptop

Inverters in pocket-size format

Mobile power for notebooks and more

Sales representatives, craftsmen, technical service crews – more and more business travellers depend on their laptops. Mobile computers work on limited battery power. So they are likely to let you down when you need them most. PocketPower smart inverters put you on the safe side. Connected in the line between the laptop and the cigarette lighter, the compact units take power from the 12-volt vehicle battery to ensure hassle-free operation of your mobile computer by keeping its battery fully

charged all the time. The inexpensive **PocketPower SI102** generates a sine-wave-like 230-volt alternating voltage, which is perfectly adequate for many applications. **PocketPower TSI102** is the best choice to ensure the safe and smooth operation of highly sensitive electrical appliances: its pure sine wave voltage, earthed safety socket and other comfort features place this product in a class of its own.

WAECO PocketPower TSI102

Handy, convenient, one-of-a-kind!

Unique to the market, WAECO PocketPower TSI102 is the first smart inverter that delivers a pure sine wave voltage and features an earthed safety socket. Treating yourself to this kind of “everyday luxury” means providing connected appliances with the best possible choice – and yourself, too ...

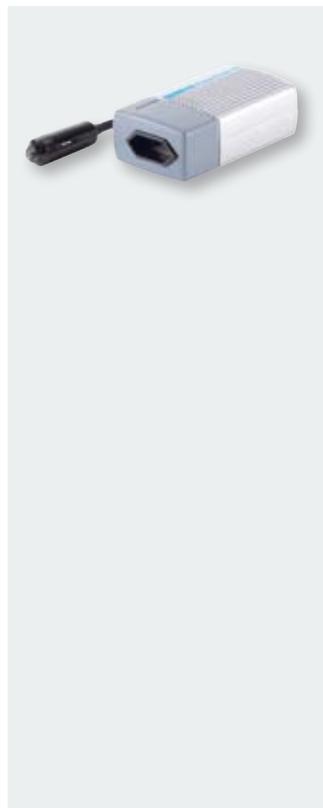

WAECO PocketPower SI 102

Smart inverter 100 watts for mobile use

Turns 12 volts battery voltage into 230 volts AC

3.29

**Features & functions**

- › Lightweight, small, handy
- › For operation of laptops and other low-power appliances
- › Low-voltage and over-voltage cut-off
- › Overload and short-circuit protection
- › With USB charging port
- › Mounting bracket
- › Euro socket

Inverters with modified sine wave voltage

230 volts for many commonly used appliances

High product quality, distinctive design, top technology, numerous comfort features – WAECO PerfectPower series inverters have all the hallmarks of a premium product. The units up to 550 watts are particularly light and compact. They turn 12- or 24-volt battery voltage into a sine-wave-like 230-volt alternating voltage, which is fully adequate for a multitude of applications.

This inverter generation demonstrates great potential. Take installation for instance: adjustable clip-on mounts allow for **perfect adaptation to individual needs**. For those who are looking for extra comfort and prefer activating their inverter from the dashboard there is an additional outlet for an external switch.

High-performance inverters

Modified sine wave voltage for powerful 230-volt appliances

Microwave ovens and coffee makers are real “power burners”. Even so, using them on board is no problem with a high-performance inverter from the WAECO PerfectPower series described above. The 1000- or 2000-watt models generate a sine-wave-like 230-volt alternating voltage for particularly powerful appliances. User benefits add up to an all-round treat including perfect design, premium quality, and a variety of technical extras for enhanced comfort.

Just take the **mains priority circuit** designed to switch over to mains power as soon as it is available. Or the soft-start function, which ensures gentle starting even where powerful appliances are concerned. Cable organisers, exhaust air adapter, outputs for remote control and external ON/OFF switch, adjustable mounts, mounting plate – PerfectPower high-performance inverters leave nothing to be desired!

Front with input and mains input fuse

Nice and neat: all cables on the back

WAECO PerfectPower PP 1002 – PP 2004

Integrated mains priority circuit

All larger inverters of the SinePower series come with an integrated mains priority circuit, which automatically gives priority to mains power as soon as it is available. Consequently, the inverter is switched off and the battery saved as soon as you have access to an external mains supply.

Sine wave inverters

Pure sine wave voltage for sensitive appliances

The high quality SinePower sine wave inverters feature the distinctive WAECO design and have recently won the 'Caravanning Design Award' 2009. They turn 12- or 24-volt battery power into pure 230-volt AC, just like the power from your domestic source. This makes them **ideal for electrical appliances that are sensitive to**

fluctuations in the on-board power supply. Even the "smaller" models up to 350 watts provide plenty of comfort details: adjustable mounts, outputs for remote control and an external ON/OFF switch, soft-start function.

A "garage" for 12- or 24-volt plugs (MSP 162 and MSP 164 models)

Pure sine wave voltage

Microprocessor-controlled electronics for pure sine wave voltage

Overload and short circuit protection

Can be switched on or off by external switch

Individually adjustable clip-on mounts

Output for remote control

Ideal for low-power electronic appliances, such as computers, TV / satellite units, DVD, VCR

Sine wave inverters up to 2500 watts

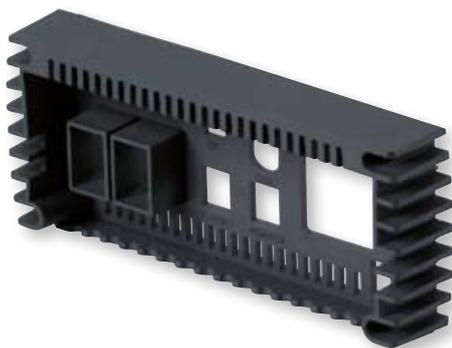

Perfect in quality, design and features

Prize-winning prior to market launch: hardly surprising, the SinePower inverter series has been able to convince the most demanding jurors. With continuous power ratings of 700 watts and more, the larger models clearly come up to **professional standards**. Delivering pure sine wave voltage they are the best possible choice for highly sensitive and powerful electrical appliances. They meet industry standards and combine ultimate user comfort with even more technical features than their smaller "mates".

These features include the **mains priority circuit with voltage synchronisation**, which gives priority to external mains power whenever it is available, and ensures uninterrupted voltage supply to the connected devices with a "smooth" switch-over. Or the automatic activation of the sleep mode when no 230-volt appliances are being operated – an energy-saving feature that reduces the strain on the vehicle battery.

- 1 Battery - connection
- 2 Battery + connection
- 3 DIP switches for configuration
- 4 Mains input fuse
- 5 Output for remote control 1
- 6 Output for remote control 2 (RS232)

- 7 Mains input socket
- 8 Inverter output socket
- 9 Earth connection
- 10 Exhaust air adapter

WAECO SinePower MSP 702 – MSP 2524

Mains priority circuit with voltage synchronisation

Here's why it makes sense. Many 230-volt appliances depend on an uninterrupted power supply. Moreover, it is vital to ensure a "smooth" voltage switch-over, which is exactly what the MSP 702 to 2524 sine wave inverters provide. In these units the inverter voltage is synchronised to match the mains voltage. The switch-over takes place in a fraction of a second at the zero-voltage point, when the phases are synchronised. Only this integrated solution – the combination of inverter and mains priority circuit – permits a smooth switch-over and provides optimum protection for electrical appliances.

Display

A particularly well-designed detail including the main switch (ON / OFF / remote) and three LEDs to indicate the operating status, power output and input voltage range. The display is integrated in the unit at a 45° angle so that it can easily be checked from various positions.

Sleep mode

When not in use the sine wave inverter automatically turns to sleep mode to reduce the strain on the vehicle battery.

Cable organiser

With cable guides ready at hand and all connections on one side, everything can be kept nice and neat.

DIP switches

Using the DIP switches you can activate the power-save mode and set the desired output rating. When a connected appliance requires an output higher than the set value, the inverter will run in normal mode. When the output is lower than the one set it will run in the power-save mode.

Clip-on mounts

Individually adjustable clip-on mounts permit adaptation to special installation requirements with perfect results. Additionally, each unit is supplied with a mounting plate, especially helpful for (vertical) mounting of the heavier units.

Accessories

Two remote control models make the assets of the SinePower sine wave inverters complete. You can choose the inexpensive standard model or opt for the high-end version, either is suitable for switchboard mounting.

Professional power for any situation

Great design, great performance

The multi-functional PowerPack keeps sufficient on-board energy in store for you – regardless of where you are. A flat battery on an early, frosty morning? No problem, your PowerPack is within easy reach. With its starting current of up to 400 amps the compact battery jump starter gets any passenger car, van or small truck with 12-volt on-board circuit going again.

But the compact energy pack has even more to offer than that: it supplies **fresh energy** on the move **for small gadgets between 4.5 and 12 volts**. It even has a USB

connection for charging mobile phones, PDAs and the like. The energy for all that comes from a maintenance-free, long-life 18-Ah battery.

The jump starter cable comes with insulated battery clamps for **safe and easy handling**. It has its own place in the PowerPack handle for storage. Intelligent electronics prevent accidental activation in case of a short circuit or reverse poling. And the integrated work lamp shows everything in the right light.

The “power pack” for all situations

- › Mobile starting aid, versatile energy supply and work lamp in one unit
- › The compact all-round companion for workshop, garage and on-the-move use
- › Integrated USB port – fresh energy for mobile phones, PDAs, etc.

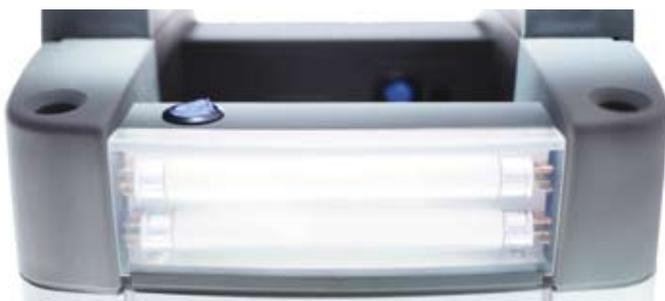

USB charging port for mobile phones, PDAs and the like

Energy supply for 12-volt coolers and more

Integrated work lamp

Multi-functional unit

Mobile energy for all situations – WAECO PowerPack MPS 500 is always reliable. At a short-time starting current of 400 amps, it has enough power to jump-start even large-capacity Diesel engines. The integrated 12-volt socket can be used to run and recharge portable coolers or other DC appliances. There's a second output for CD players and radios, plus a USB port for recharging of mobile phones, etc.

WAECO PowerPack MPS 500

Multi-functional battery jump starter

3.20

Features & functions

- › Starting aid function (400 A short-time)
- › Practical storage compartment for accessories such as mains adapter, jump starter cable, etc.
- › Energy supply with 4.5 volts, 6 volts, 9 volts, 12 volts output
- › Parking position for battery clamps in the carrying handle
- › USB port for charging mobile phones, PDAs, etc.
- › High-quality design in aluminium / plastic
- › Can also be used on damp ground, e.g. on lawns (base section water-proof up to 7 cm height)

| | |
|--------------------------------|---|
| Max. starting current | 400 A short-time |
| Output voltages | 4.5 volts, 6 volts, 9 volts, 12 volts 5 volts (USB) |
| Max. continuous current | 10 A at 12 volts 1 A at 4.5 volts, 6 volts, 9 volts 0.5 A (USB) |
| Lead gel battery | 12 volts / 18 Ah, maintenance-free |
| Dimensions (W x H x D) | 252 x 295 x 243 mm |
| Weight | 10.5 kg |

Scope of delivery: PowerPack MPS 500, 230 V mains adapter, DC cable, jump starter cable, operating instructions

| | |
|-------------------|-----------------|
| Product | Ref. No. |
| PowerPack MPS 500 | PS-500-12 |

Powerful jump starter with 18 Ah battery

Outputs for 12 volts as well as 4.5 volts, 6 volts, 9 volts

USB port

Integrated work lamp

Storage compartment for accessories

Mobile power generators for universal use

TEC 29 - highly compact petrol generator

A “flyweight” of just 44 kilograms and easily accommodated thanks to its optimised dimensions. Ideal also for permanent fitting under the vehicle floor.

Providing 2,600 watts on a continuous basis, this petrol generator is as powerful as conventional predecessor models, yet more quiet and economical in operation. An absolute top seller!

TEC 30EV - fuel-saving diesel generator

Specially designed for use in utility vehicles, this generator provides powerful performance at minimal fuel consumption [0.7 litres Diesel/h].

Excellent sound insulation makes for low-noise operation. State-of-the-art inverter technology prevents over- and undersupply of connected electrical appliances.

- High continuous output ratings of 2.6 kW [TEC 29] or 2.5 kW [TEC 30EV]
- Low fuel consumption, generator rpm adjusts to the load applied
- Innovative inverter technology allows for parallel use of two TEC 29 or two TEC 30EV units
- 12-volt output for battery charging with integrated charging regulator [10 amps max.]
- Robust design in stainless steel cabinet
- Easy operation with remote control, the illuminated display shows all essential operating parameters
- High operating safety with several alarm function

Dometic TEC 29

2.6 kW generator

For 230 volts alternating current, fuelled by unleaded petrol [RON 91]

3.39

| | |
|-------------------------------|--|
| Output voltage / curve | 230 volts AC $\pm 1\%$ [continuous] / pure sine wave \sim |
| THDV | 1 % |
| Frequency | 50 Hz $\pm 1\%$ |
| Max. starting current | 33 A |
| Continuous output | 2600 watts |
| Peak output | 2900 watts |
| Engine output | 4.0 kW / 5.5 HP |
| Fuel | Unleaded petrol RON 91 |
| Consumption | 1.2 l/h max. |
| Sound level at 7 m | 54/59 dBA |
| Guaranteed sound level | 86 dBA |
| Dimensions [W x H x D] | 290 x 480 x 385 mm |
| Width with suspension | 580 mm |
| Net weight | 44.0 kg |
| Quality features | Remote control, 12-volt output for battery charging, automatic low-oil cut-off, electrical starter, protected against overload and short circuit |
| Test marks | CE, E13 |
| Product | Ref. No. |
| Dometic TEC 29 | 9102900007 |

High continuous power output**Low consumption**

Parallel use of two TEC 29 units possible for twice the output

Remote control with indication of all essential operating parameters

Fuelled by unleaded petrol [RON 91]

Dometic TEC 30EV

2.5 kW generator

For 230 volts alternating current, fuelled by diesel

3.39

| | |
|-------------------------------|--|
| Output voltage / curve | 230 volts AC $\pm 1\%$ [continuous] / pure sine wave \sim |
| THDV | 1 % |
| Frequency | 50 Hz $\pm 1\%$ |
| Max. starting current | 33 A |
| Continuous output | 2500 watts |
| Peak output | 2900 watts |
| Engine output | 3.3 kW / 4.5 HP |
| Fuel | Diesel |
| Consumption | 0.7 l/h max. |
| Sound level at 7 m | 60 dBA |
| Guaranteed sound level | 84 dBA |
| Dimensions [W x H x D] | 462 x 484 x 406 mm |
| Width with suspension | 572 mm |
| Net weight | 70.0 kg |
| Quality features | Remote control, 12-volt output for battery charging, automatic low-oil cut-off, electrical starter, protected against overload and short circuit |
| Test marks | CE, E13 |
| Product | Ref. No. |
| Dometic TEC 30EV | 9102900033 |

High continuous power output**Very low consumption**

Parallel use of two TEC 30EV units possible [for a continuous output of approx. 4,800 watts]

Remote control with indication of all essential operating parameters

Fuelled by diesel

Accessories for generators**3.39**

Fancy more ...?

New products. New catalogues.

2010

"On the Move"

The Dometic WAECO specialist catalogue for camping and caravanning. A comprehensive range of products – mobile refrigeration, air conditioning, electronics, reversing video systems, vehicle accessories, lights, windows, kitchen and sanitation equipment.

"More Comfort on Board"

The Dometic WAECO specialist marine catalogue. Tailor-made comfort solutions for yachts and boats – refrigeration, air conditioning, electronics, power supply, sanitation, lighting and galley equipment.

"More Driving Pleasure"

Safety and comfort accessories for cars. From parking aids to cruise controls and battery care products. Plus a wide choice of car coolers.

You can order our catalogues on the internet at
www.dometic-waeco.com

What else can we do for you?

The friendly Dometic WAECO team are always glad to help.

You are interested in our products, but still have some questions you'd like to ask? Or perhaps you need advice on a product you've just bought? Get in touch with us! After all, fun and convenience for mobile people is our philosophy. Buying one of our products is just the start. Our aim is to delight you with a whole range of mobile technology in future, too.

You'd like to find out more? Just order the comprehensive catalogues.

Your contact to Dometic WAECO:

www.dometic-waeco.com

info@dometic-waeco.com

Always a good link: the Dometic WAECO website. That's where you will find the complete product range. You'll get a clear view of the products along with detailed information. Plus interesting news about our company and the latest special offers. And of course you can order all our catalogues online.

Dometic GROUP is a customer-driven, world-leading provider of leisure products for the RV, automotive, truck and marine markets. We supply the industry and aftermarket with a complete range of air conditioners, refrigerators, awnings, cookers, sanitation systems, lighting, mobile power equipment, comfort and safety solutions, windows, doors and other equipment that make life more comfortable away from home.

Dometic GROUP supplies a wide range of workshop equipment for service and maintenance of built-in air conditioners.

Dometic GROUP also provides specially designed refrigerators for hotel rooms, offices, wine storage and transport and storage of medical products.

Our products are sold in almost 100 countries and are produced mainly in wholly-owned production facilities around the world.
